INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

Journal of Glaciology publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

Journal of **GLACIOLOGY**

CONTENTS Vol 63 No 242 2017

- 937 **Joseph Mallalieu, Jonathan L. Carrivick, Duncan J. Quincey, Mark W. Smith, William H.M. James**
An integrated Structure-from-Motion and time-lapse technique for quantifying ice-margin dynamics
- 950 **Christian G. Sommer, Michael Lehning, Charles Fierz**
Wind tunnel experiments: saltation is necessary for wind-packing
- 959 **Mette K. Gillespie, Wendy Lawson, Wolfgang Rack, Brian Anderson, Donald D. Blankenship, Duncan A. Young, John W. Holt**
Geometry and ice dynamics of the Darwin–Hatherton glacial system, Transantarctic Mountains
- 973 **Thomas E. Shaw, Ben W. Brock, Álvaro Ayala, Nick Rutter, Francesca Pellicciotti**
Centreline and cross-glacier air temperature variability on an Alpine glacier: assessing temperature distribution methods and their influence on melt model calculations
- 989 **L. Nicholson, J. Mertes**
Thickness estimation of supraglacial debris above ice cliff exposures using a high-resolution digital surface model derived from terrestrial photography
- 999 **Marijke Habermann, Martin Truffer, David Maxwell**
Error sources in basal yield stress inversions for Jakobshavn Isbræ, Greenland, derived from residual patterns of misfit to observations
- 1012 **Dorothee Vallot, Rickard Pettersson, Adrian Luckman, Douglas I. Benn, Thomas Zwinger, Ward J. J. Van Pelt, Jack Kohler, Martina Schäfer, Björn Claremar, Nicholas R. J. Hulton**
Basal dynamics of Kronebreen, a fast-flowing tidewater glacier in Svalbard: non-local spatio-temporal response to water input
- 1025 **Bo Cao, Baotian Pan, Weijin Guan, Jie Wang, Zhenling Wen**
Changes in ice volume of the Ningchan No.1 Glacier, China, from 1972 to 2014, as derived from in situ measurements
- 1034 **Anders Damsgaard, Jenny Suckale, Jan A. Piotrowski, Morgane Houssais, Matthew R. Siegfried, Helen A. Fricker**
Sediment behavior controls equilibrium width of subglacial channels
- 1049 **Geoffrey W. Evatt, Christoph Mayer, Amy Mallinson, I. David Abrahams, Matthias Heil, Lindsey Nicholson**
The secret life of ice sails
- 1063 **Thomas Goelles, Carl E. Bøggild**
Albedo reduction of ice caused by dust and black carbon accumulation: a model applied to the K-transect, West Greenland
- 1077 **Kira G. Olsen, Meredith Nettles**
Patterns in glacial-earthquake activity around Greenland, 2011–13
- 1090 **Wei Yang, Tandong Yao, Meilin Zhu, Yongjie Wang**
Comparison of the meteorology and surface energy fluxes of debris-free and debris-covered glaciers in the southeastern Tibetan Plateau
- 1105 **Lauren J. Vargo, Brian M. Anderson, Huw J. Horgan, Andrew N. Mackintosh, Andrew M. Lorrey, Merijn Thornton**
Using structure from motion photogrammetry to measure past glacier changes from historic aerial photographs
