## CURRENT RESEARCH INVENTORY

---

THE CURRENT RESEARCH INVENTORY SECTION LISTS POST-DOCTORAL RESEARCH on Latin America, Spain, and Portugal currently underway in the United States, Latin America, and Canada.\* The purpose of this section is to acquaint researchers working in the Latin American area with the various social science projects *currently* being carried out in the field. (Published research is not listed.) It is hoped that the information will provide an impetus toward communication among scholars concerning their own work and reduce duplication.

The projects listed in the following section of this issue include projects being carried out by researchers at institutions in the mid-western region of the United States, in Middle America, and in the northern tier of Latin America. Included are projects previously described, but still in progress. For a detailed description of these continuing projects, the reader is referred back to the issue in which the projects were originally announced. In the next issue, the Fall issue, projects being carried out by researchers in the Far Western region of the U.S., in Canada, and in the southern tier of Latin America (Argentina, Bolivia, Brazil, Chile, Ecuador, Paraguay, Peru, and Uruguay) will be listed.

The projects are arranged alphabetically, according to institutions, under

\* For information about research being carried out in Europe see, *Boletín Informativo sobre Estudios Latinoamericanos*, published by Centro de Estudios y Documentación Latinoamericanos at the University of Amsterdam in Holland; for research on Latin America originating in German universities see *Informationsdienst der Arbeitsgemeinschaft der Deutschen Lateinamerika-Institute* (Köln, Germany). Research originating in Europe, Latin America, and the United States may be found in *Aportes*, a quarterly published by Instituto Latinoamericano de Relaciones Internacionales in Paris, France. *América Latina*, published by the Centro Latino-Americano de Pesquisas em Ciências Sociais (Rio de Janeiro), covers research originating in Latin America. *Desarrollo Económico* published by El Instituto de Desarrollo Económico y Social (*Buenos Aires*), reports on research being carried out by sociologists in Argentina. Archaeological research in Latin America is reported in the Current Research section of *American Antiquity* published by the Society for American Archaeology.

### *Latin American Research Review*

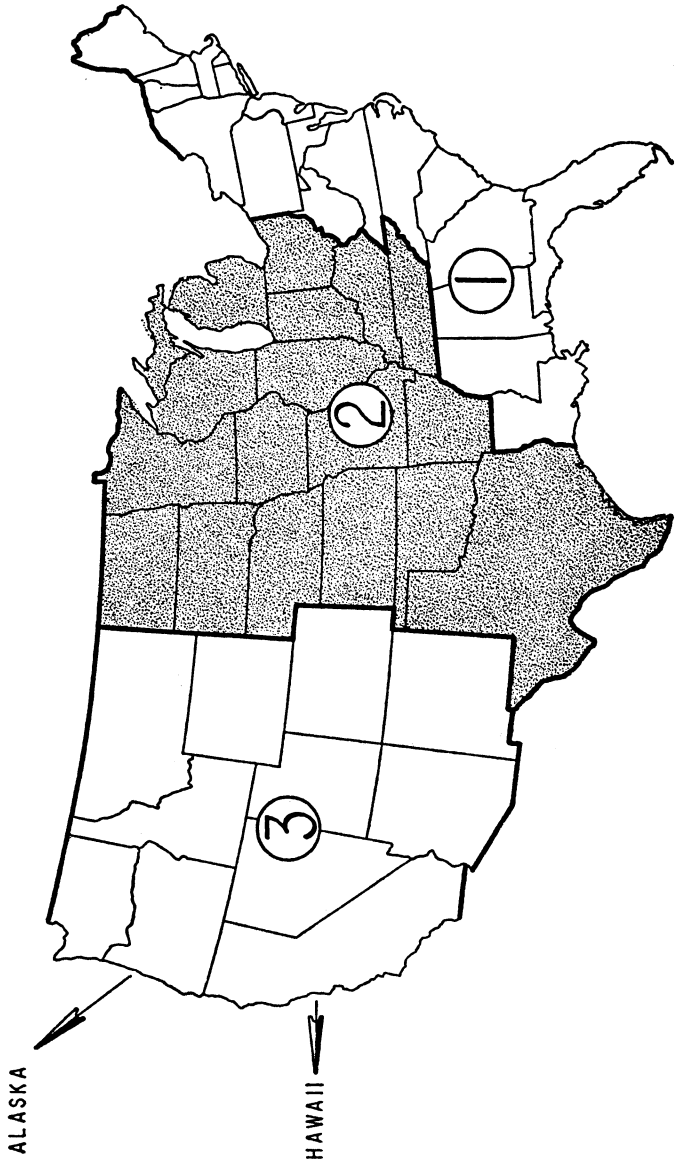

two main classifications—*United States Institutions* and *Latin American Institutions*. Material within each project is arranged in the following order:

1. Discipline
2. Name of principal researcher(s)
3. Other researchers (*O*) or collaborator (*C*)
4. Title of project
5. Description
6. Date research was begun and the expected date of completion (EDC) or *fecha aproximada de terminación* (FAT)
7. Related research published by the researcher
8. Source of support, if any.

Research reports are based solely on the information obtained from questionnaires which have been sent to individual researchers. These questionnaires may be obtained from LARR upon request. Such requests are appreciated and the forms are sent out immediately.

A geographical index to the projects listed in the Current Research Inventory section is included in each issue. Annual geographic and subject indexes are provided in the last issue of each volume.

### UNIVERSITY OF AKRON

#### History

407. Sheldon B. Liss

Venezuela in Hemispheric Affairs.

Description and analysis of Venezuelan foreign policy, with emphasis upon the twentieth century. Includes relations with American Republics; World War I, World War II, Cold War, and subversion; participation in international organizations. Does not include international aspects of the petroleum industry. EDC, 1970. /University of Akron research grant.

408. ———

Man, State, and Society in Latin American History.

Covers periods from pre-Columbian civilizations to World War II. See LARR III:2 (434) for detailed description. The first of this two-volume series will be published by Praeger in 1969.

### ALBION COLLEGE

#### Literature

409. Karl H. Heise

Today's Novel of the Ecuadorian Tropics.

Study aims to determine the course of the novel from tropical Ecuador. Since the mid-1940's the novel from the Ecuadorian tropics (i.e., from the coast, principally in and around Guayaquil) has shown a tendency to move away from themes of a local nature dealing with social problems, to ones of a more universal nature dealing with problems applicable to men everywhere. Researcher hopes to move toward a determination of the course of that novel as it applies to this phenomenon of universal expression. Researcher will give special attention to the novelist from Guayaquil, Alfredo Pareja Diezcanseco, whose work covers both the thirties and the forties and contemporary times. Begun, 1969. EDC, 1970. /Albion College Summer Faculty Research Fellowship.

### ANTIOCH COLLEGE

#### Sociology

410. Raymond L. Gorden

Contrastive Analysis of Cultural Differences which Inhibit Communication between North Americans and Colombians.

Continues as described in LARR III:2 (439). EDC, 1969. Three units of instructional materials have been produced to date: The Initial Immersion in the Foreign Culture, The Spanish Personal Naming System, and the American Guest in the Colombian Home. These are now in mimeograph form and will be published later as books.

### AUSTIN COLLEGE

#### History

411. Ronnie C. Tyler

The Era of Cotton: Santiago Vidaurri and the Confederacy, 1861-1864.

A description of the relationship between Vidaurri and the Confederacy up to 1864 when Vidaurri fled Monterrey to escape the invading French armies and a confrontation with President Benito Juarez. Begun, 1967. Manuscript completed. A related article, "Las afirmaciones de Patricio Milmo," appeared in *Humanitas* (Nuevo Leon) in 1969. /Faculty research grant from Austin College.

412. ———

Fugitive Slaves in Mexico.

Study deals with attempts made by Texans to retrieve slaves who had fled to Mexico in search of freedom. Researcher describes the conditions of the slaves in Mexico and the conditions that led to their flight as well as the intrigue between Santiago Vidaurri, governor of Nuevo León and Coahuila, and the Texans. Begun, 1964. EDC, 1969.

Inter-American Management Development Program.

A pilot program to explore the use of confrontation techniques to identify critical cultural variables which affect international management relationships. The program has been designed to bring together Mexican and U.S. managers (probably 15 from each group in the research stage) for sessions focusing on cultural differences between the groups and the way these manifest themselves in terms of managerial activity patterns. The participants will be discussing various issues such as the differences between ethical and value systems, social structure, family life, etc. In addition they will be playing some management games which will put them under great stress with respect to organization for decision making. The decision-making sessions will be videotaped and the patterns of group interaction will be analyzed via videotaped playback to discuss the various patterns which emerge. The program will be bilingual. Researchers hope to determine the degree of intercultural understanding which can be attained in a bilingual program and through the use of computerized games, video-tape, behavioral analysis, and lectures and discussions which are based on anthropological and cultural systems. Begun, 1968. EDC, 1969.

Robert E. Scott (coordinator).

Modernization and Urbanization Problems in Latin America.

A macro-project designed to provide immediate useful data and recommendations to Latin American and United States policy makers faced with the disruption of rapid change. Projects are designed to contribute to the program's broader goal—evolving a middle range theory on the process of development that might be applied either in developing countries or in the U.S. where appropriate. Thirteen regular staff members and twenty graduate students will participate in field research on twelve separate but closely related projects. The projects cluster in three Latin American areas representing differing levels of change; Mexico, Brazil, and the Andean countries.

The project titles are listed below. Those prefixed with an asterisk are described in more detail under their respective discipline heading. EDC, 1971. /The University of Illinois Center for Latin American Studies in collaboration with the Center for International Comparative Studies.

in Peru.

The main hypotheses to be tested are (1) whether Peru's industrial development (concentrated in Lima) in the post-war period took place at the expense of agriculture and (2) whether decentralization of industrial development is a viable alternative in Peru. From the above analysis policy conclusions will be arrived at with respect to Peru's public investment, exchange rate, tariffs, and industrial and agricultural promotional policy. In note stage. The Determination of the Cultural Development of the Preceramic Occupations of Colombia, S.A.

In an archaeological survey of Paleo-Indian sites in the Sabana de Bogota, made in 1967, several caves and sites on open terraces of rivers and extinct lakes were located which have definite evidence of pre-ceramic occupations. For example, in a rock shelter on the *Hacienda El Abra*, a test produced organic samples which have been dated by radiocarbon analysis from 9,000–12,000 years ago. This site and others in the region will be intensively excavated during the summer, 1969. Additional surveys also will be made to locate new sites. Survey is completed, archaeological excavations to begin this summer. Begun, 1967. EDC, 1970. /NSF, Latin American Studies of Indiana Univ.

Sociological Factors Influencing Birth Rates in the Atitlán Area.

Towns around Lake Atitlán are very similar culturally, yet have experienced marked differences in birth rates over the past two decades. Research has centered upon the community of Santa María Visitación, where birth rates have remained the lowest, permitting

comparisons with two other communities (Panajachel and Santa Catarina) known in some detail from previous research where birth rates are markedly higher. Explanations of the differences rest principally upon changes in economic conditions which have differentially influenced age of marriage, ease of contracting marriage, availability of medical services and hence infant mortality. Simulation of Population Densities of Central America with Complex Dynamic Models.

The project is designed to simulate the dynamic process of growth and spread of human settlements in Central America, using special data of population densities of that area which have already been compiled. Specific objectives include: 1) development of analog and digital computer models which permit spatial parameters to be considered in traditional demographic models; 2) use of the above models to analyze the especially prepared data for purposes of making forecasts of population densities for each of 18,500 data units (12½ sq. miles in size) in Central America for the years 1970, 1980, 1990, and 2000; 3) experimentation with hybrid analog-digital models. The Social Characteristics of Mexican-American Converts to Protestantism.

This investigation is addressed to a comparison of social and economic attributes of Mexican-Americans who convert to Protestantism and those who remain Catholics. It is hypothesized that conversion to Protestantism, especially Pentecostal sects, will associate highly with differential perceptions of the means to attain upward mobility, and the utilization of shared church membership as a surrogate for familial ties, severed as a result of spatial mobility. Will cover the American southwest and the metropolitan Chicago area. Begun, 1968. EDC, 1970. A related work by the researcher is "Concepts of Disease in Mexican-American Culture," published in

Ritual Dissociation and Possession Belief in Caribbean Negro Religion.

Paper centers on a comparison between Afro-American spirit cults, as typified by Haitian voodoo, and on Pentecostal churches, as typified by St. Vincent Spiritual Baptists. Study shows the centrality of dissociational states in these diverse groups and the variety of cultural patterning involved. The aim of the paper is the furthering of a typology of ritual dissociation. It is part of a larger study, entitled Cross-Cultural Study of Dissociational States, supported by NIMH. Illness and Possession: Elements for a Comparative Study.

Paper attempts to delineate a typology of possession cults, with illness as a central concept. In Haiti, possession illness is not linked to the possession cult and represents a separate complex associated with sorcery. While the concept of possession is involved in both contexts, dissociation (trance) is part of voodoo possession, but not part of the possession illness complex. A study of the economy of smaller Latin American countries which has revealed a little noted tendency. While most of these countries appear to have highly static economies tied to the export of primary products, a dynamic element was discerned when members of 20 leading Nicaraguan families were interviewed; namely, that capital is shifted from on activity to another within family holdings (various types of agriculture, business, manufacturing) based almost entirely upon the profit motive and thus provides a certain degree of flexibility.

Tranquility, Individualism and Value Conflicts Related to Changing Worldview in a Developing Area.

Research focuses on the extent to which worldview influences and affects social integration, cooperation, and receptivity to innovations. The importance of the seeking of tranquility as a major value orientation in Spain has not been discussed in the literature and has not been researched by anthropologists. ### Government

630. Lawrence S. Graham  
Mexican State Government.  
The purpose of this project is to examine the administrative and political functions fulfilled by the state government of Michoacán in order to determine the degree to which the state capital, Morelia, serves as a broker between the demands and the needs of the communities located in the state and the national government. The central proposition on which the study is based is that the functions of state government in Mexico meet essentially the requirements of a prefectural system, not those of a federal system, and that the role of governor approaches more that of an "elected prefect" than the political role assigned to his North American counterpart. Field research being carried out. Begun, 1969. EDC, 1969. To be published by the Institute of Public Affairs at the University of Texas (Austin), in 1970. A related work by the researcher is *Politics in a Mexican Community* published by the University of Florida Press, Social Science Monograph No. 35, in 1968. /Univ. of Texas, Institute of Public Affairs.

A Cross-National Study of School Children: Coping Style and Achievement.

A study of the way children handle particular problems, with special attention to school attendance and character-related activities. A theory of coping behavior, interaction, educational and motivational elements has been involved from the early stages of the study. It is being tested by a battery of eight instruments in nine research centers and eight countries (Brazil, England, Italy, Germany, Japan, Mexico, United States, Yugoslavia). The first stage assessed eight-thousand children, stratified by age, sex, and social class. The second stage comprised an intensive interview of a 10% sample of the children's parents. The third stage is a group validation assessment, with revised instruments, of four-thousand additional children. Begun, 1965. EDC, 1970. /United States Office of Education, Grant No. OE-5-85-063.

Family and Fertility among Mexican Americans.

The purpose of the proposed study is to investigate, largely within the context of the family, the social and cultural factors that support high fertility among Mexican-Americans in Austin, Texas. Four hundred couples will be interviewed. Husbands and wives will be interviewed separately by interviewers of the same sex. To take into account socio-economic differences, the sample will be drawn equally from lower and middle-class sectors. The couples will be restricted to that stage in the family life cycle when they are likely to have had at least two children and therefore considerations of family limitation will have begun to manifest themselves. Demographic Patterns of Marriage among the Mexican American (Spanish-surname) and Anglo-American Populations in San Antonio, Texas.

Particular emphasis in this investigation is placed on secular changes in the extent of intermarriage between Mexican-Americans and Anglo-Americans since this should serve as a good index of assimilation. Sample data have been compiled from marriage licenses in San Antonio from 1940 to 1967. Plans are underway for extending the investigation to selected years in the nineteenth century and it is hoped that marriage records can be matched with original nineteenth century census schedules. El proceso de urbanización en México.

El estudio tiene por objeto: a) conocer la naturaleza, magnitud y dinámica de las fuerzas que han intervenido en la actual distribución geográfica de población y de actividades socio-económicas, para coadyuvar a la explicación de la desigualdad del desarrollo regional; b) determinar los factores condicionantes y los efectos más significativos del fenómeno de la urbanización en México en sus distintas regiones; c) definir la probable estructura urbana del país en 1970, 1975, y 1980. El programa general de investigaciones consta de 3 partes, una primera parte descriptiva, una segunda explicativa en donde se analizan las condicionantes y los efectos del proceso de urbanización, y una última proyectiva, en donde se hace la proyección de la estructura urbana para el período 1960–1980. El marco geográfico del estudio lo constituye el país y su división política en entidades federativas; se tratará de abarcar el período 1940–1960 en todos los análisis que se realicen. Se harán publicaciones a medida que se obtengan resultados, principalmente en la *Revista Demográfica y Económica* de El Colegio de México. La investigación sigue en marcha tal como se anunció en LARR III:2 (773). Se ha iniciado el tratamiento estadístico de los datos antropométricos y a la fecha se han obtenido los valores promedio y de variabilidad correspondientes a la talla y el peso en escolares de ambos sexos y edades de 6 a 13 años, lo cual ha permitido la integración de las tablas de normas de edad y la construcción de las gráficas respectivas, en cuyo análisis e interpretación se está actualmente trabajando. La castellanización en México.

Se están tratando de determinar y, en lo posible, de medir las actitudes de los indígenas y de los hispanoparlantes mexicanos en relación con los problemas de la castellanización de los propios indígenas, y de reaccionarlas con creencias, modos de comportamientos y experiencias sociales, a fin de descubrir los puntos de mayor resistencia o de mayor vulnerabilidad, precisar las modalidades de esa resistencia y determinar los métodos más adecuados para combatirla, a fin de lograr una comunicabilidad total entre todos los mexicanos. Para ese fin, se han realizado entrevistas con indígenas, pedagogos y políticos y se han tratado de localizar los territorios en que se concentran al máximo los indígenas monolingües y bilingües para particularizar así las formas de ataque del problema. A Socio-Economic Study of the Patients Entering into Asociación Pro-Salud Maternal, A.C., 1959-1968.

The study evaluates and correlates significant factors of the socio-economic status of 11,000 women of the lower income groups who have visited the clinic since its opening in 1959. Information is based on the patients' records when they entered the clinic. Income, expenditure, living conditions, births, abortions and educational level are the prime variables. Project is a pilot study of a longer three-year interdisciplinary project. Patients of the urban clinic and of the four rural sub-clinics will be interviewed in the future to determine the effects of family planning on the family. EDC, 1969. Will be published by Tlateloco Economic Monographs Series in Mexico City.

Labor Mobility in the Valleys of Mexico, Toluca and Puebla, 1967-1969.

Study includes a survey of firms located in the old industrial area of Mexico (Valley of Mexico—twenty years); in a young industrial area (Valley of Toluca—six years) and in a new area (Valley of Puebla—two years). Though each of the areas has had some industrialization for a much longer period of time, a new push towards industrialization began in each in the times stated above. The study is composed of three stages: 1) a questionnaire and the evaluation of its findings for individual laborers in the firm; 2) a questionnaire and the evaluation of its findings for the personnel manager of the firm; and 3) a questionnaire and evaluation of findings for top management of the firm. The object of the study is to determine 1) labor's movement into a firm and then its vertical movement in the firm. Begun, 1967. EDC, 1969. To be published in Tlateloco Economic Monographs.

La vivienda rural en Venezuela.

El trabajo anunciado en LARR III:2 (809) se transformó en dos trabajos. La primera parte quedó constituida por una historia de la vivienda en Caracas que se ha publicado en el volumen II, tomo 2 del *Estudio de Caracas* editado por la Universidad Central de Venezuela. Apareció con el título "La vivienda de los pobres" (páginas 631-893). El trabajo en proceso trata de reunir material de todas las regiones del país, relativo a materiales de

construcción, modos de edificación, plantas tradicionales, ubicación geográfica, etc. Esta segunda parte resulta necesaria porque la vivienda rural tradicional en Venezuela ha desaparecido en un gran porcentaje y tiende a ser sustituida en forma total por nuevos tipos de edificaciones. Ello se debe al traslado de cientos de miles de campesinos a la periferia de las ciudades; a la industrialización parcial del campo venezolano; a las propagandas sanitarias; a la penetración de diversas instituciones en el campo que enseñan nuevos modos de construcción de vivienda. Iniciada, 1960. En preparación.
