JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800010357 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy, University of Manchester, Manchester M*13 9*PL, England*

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C of the per copy fee indicated in the code on the first page of the article. This consent does not extend to multiple copying for promotional or commercial purposes.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 110, Cambridge CB2 3RL and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 23 and 24 (1980) is £49.00 net per volume (US $145.00 in the U.S.A. and Canada) for institutions; £24.50 (US $72.50) per volume for individuals. Single parts cost £18.50 each (US $55.00 in the U.S.A. and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York. N.Y. *POSTMASTER*: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

CONTENTS TO VOLUME 24

PART 1 AUGUST 1980

Super-ion-beam accelerator for the ignition of thermonuclear reactions. F. WINTERBERG *page* 1

Nonlinear phenomena in plasma with relativistic high-frequency electron motion. V. I. BEREZHIANI, N. L. TSINTSADZE and D. D. TSKHAKAYA 15

Parametric instability driven by density modulation in velocity space. D. SHERWELL and R. A. CAIRNS 25

The stability properties of cylindrical force-free fields: effect of an external potential field. C. CHIUDERI, G. EINAUDI, S. S. MA and G. VAN HOVEN 39

Nonlinear coupling of five waves in non-uniform streaming plasma. G. C. PRAMANIK 55

Re-ionization of a partially ionized plasma by an Alfvén wave of moderate amplitude. M. H. BRENNAN and M. L. SAWLEY 65

Energy loss of relativistic electrons in plasma in accordance with covariant Fokker–Planck formalism. P. S. RAY 75

On self-consistent waves and their stability in warm plasmas. Part 2. Instability of circularly polarized waves both in the presence and the absence of an ambient magnetic field. M. A. LEE and I. LERCHE 89

Transverse MHD shock waves in a partly ionized plasma. Part 1. Structure equations and topology. C. D. MATHERS 103

Transverse MHD shock waves in a partly ionized plasma. Part 2. Shock structure in hydrogen. C. D. MATHERS 121

A generalization of kinetic ponderomotive effects. HANS SCHAMEL and GEORGE SCHMIDT 149

Solitary Alfvén waveguide structures in a magnetized plasma. J. P. SHEERIN and R. S. B. ONG 157

Resonance cones and guided wave modes. CROCKETT L. GRABBE 163

Nonlinear electron-acoustic waves in a multi-species plasma. B. BUTI 169

On the resistive diffusion of force-free magnetic fields. B. C. LOW 181

REVIEW

Solar System Plasma Physics, edited by L. J. Lanzerotti, C. F. Kennel and E. N. Parker 191

https://doi.org/10.1017/S0022377800010357 Published online by Cambridge University Press

PART 2 OCTOBER 1980

On the instability of a spatially confined electron beam in a magnetized plasma. R. J. STRANGEWAY 193

Kelvin–Helmholtz problem in a rotating Hall plasma. A. T. GRANIK 213

Low-frequency electrostatic instability due to anti-loss-cone electrons. K. G. BHATIA and G. S. LAKHINA 221

Low-frequency linear response of a cylindrical tokamak with arbitrary cross-section to 'helical' perturbations. TORKIL H. JENSEN and MING S. CHU 229

Longitudinal electron modes in plasma. E. L. BYDDER and B. S. LILEY 237

The stability of parallel flow of a multi-component plasma. R. J. LUCAS 251

Plasmadynamical description of two-component weakly coupled plasma. W. ROZMUS 265

Langmuir turbulence as a critical phenomenon. Part 1. Destruction of the statistical equilibrium of an interacting-modes ensemble. GUY PELLETIER 287

Unified treatment of symmetric MHD equilibria. JOHANN W. EDENSTRASSER 299

Theory of double resonance parametric excitation in plasma. Part 2. BURTON D. FRIED, ALLEN ADLER and ROBERT BINGHAM 315

Scattering from electron density irregularities in a compressible, anisotropic plasma. T. OKUZAWA and T. H. NGUYEN 341

Langmuir probe measurements of double-layers in a pulsed discharge. J. S. LEVINE and F. W. CRAWFORD 359

PART 3 DECEMBER 1980

The microinstabilities of high-β plasma flow with a non-uniform velocity profile. A. B. MIKHAILOVSKII and V. A. KLIMENKO 385

Dispersion formulae for waves in a magneto-active relativistic plasma. P. MISRA and J. N. MOHANTY 409

Langmuir turbulence as a critical phenomenon. Part 2. Application of the dynamical renormalization group method. G. PELLETIER 421

Modulational instability of electrostatic ion cyclotron wave in a two-electron-temperature plasma. M. LISAK 445

Plasma equilibrium in toroidal $l = 3$ stellarators. P. J. FIELDING and W. N. G. HITCHON 453

Convective instability of a plasma slab in a magnetic field. B. K. SHIVAMOGGI and M. S. UBEROI 479

https://doi.org/10.1017/S0022377800010357 Published online by Cambridge University Press

Effect of collisions on the relativistic electromagnetic instability. T. Okada and K. Niu 483

Functional calculus in strong plasma turbulence. G. Ahmadi and A. Hirose 489

Slowly propagating instabilities in plasmas with Margenau–Davydov electron distribution function. V. J. Žigman and B. S. Milić 503

The only three classes of symmetric MHD equilibria. J. W. Edenstrasser 515

A unified approach to some integral formulae for reflexion processes in an isotropic plasma. J. Heading 519

Self-induced magnetic force of a toroidal current. T. Yeh 533

A.C. conductivity in a homogeneous plasma from a convergent collision integral. J. P. Mondt and R. L. Guernsey 541

Self-similar state of a weakly turbulent plasma. R. Balescu 551

Author Index to Volume 24 577
