The International Journal of Neuropsychopharmacology

Editor:

Alan Frazer, San Antonio, USA

The International Journal of Neuropsychopharmacology (INJP) serves as a major forum for the rapid publication and wide dissemination of high quality, influential research in neuropsychopharmacology, in the basic and clinical domains. The central focus of the journal is on research which advances understanding of existing and new neuropsychopharmacological agents, including their mode of action and clinical application, or which provides insights into the biological basis of neuropsychiatric disorders and thereby advances their pharmacological treatment. Such research might derive from the full spectrum of biological and psychological fields of inquiry, encompassing classical and novel techniques in neuro-psychopharmacology, as well as strategies such as neuroimaging, genetics, psycho-neuroendocrinology and neuropsychology. *INJP's* rapid publication policy is facilitated by web-based submission and review, and the journal publishes the definitive versions of papers online, ahead of the printed issues. All papers are indexed in PubMed and ISI Journal Citation Reports.

The official scientific journal of the Collegium Internationale Neuro-Psychopharmacologicum

Cambridge Quarterly of Healthcare Ethics

The International Journal for Healthcare Ethics and Ethics Committees

Cambridge Quarterly of Healthcare Ethics is designed to address the challenges of biology, medicine and healthcare and to meet the needs of professionals serving on healthcare ethics committees in hospitals, nursing homes, hospices and rehabilitation centres.

The aim of the journal is to serve as the international forum for the wide range of serious and urgent issues faced by members of healthcare ethics committees, physicians, nurses, social workers, clergy, lawyers and community representatives.

Cambridge Quarterly of Healthcare Ethics is published by Cambridge University Press and is a partner journal of the American Society for Bioethics and Humanities

CAMBRIDGE
UNIVERSITY PRESS

Journal of the International Neuropsychological Society

Editor-in-Chief: Kathleen Y. Haaland, NM VA Healthcare System, Albuquerque, NM,

Journal of International Neuropsychological Society (JINS) publishes peer-reviewed articles covering all areas of neuropsychology with either an experimental or clinical focus. Original research with an option for fast, short communications, critical reviews and dialogues that make a theoretical contribution to the field, and transactions of the annual meetings of the International Neuropsychological Society are published.

JINS is indispensable for: *psychologists, cognitive scientists, brain scientists, neuroscientists.*

Contributions reflect the interest of all areas of neuropsychology, including but not limited to:

development of cognitive processes,

brain-behaviour relationships,

adult neuropsychology,

child neuropsychology,

developmental neuropsychology,

disorders of speech and language .

and very importantly the interface of neuropsychology with related areas such as:

cognitive neuroscience,

behavioural neurology,

& neuropsychiatry.

CAMBRIDGE
UNIVERSITY PRESS

International Journal of Technology Assessment in Health Care

Instructions for Contributors

The editors welcome submissions of articles that deal with the wide range of topics related to assessment for health care policy and practice, including issues of technology diffusion, economics, ethics, law, and social and cultural perspectives. All manuscripts are screened by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 10 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Spelling, capitalization, and punctuation should conform to the 15th Edition of *The Chicago Manual of Style* (University of Chicago Press). Articles and correspondence should be sent *by email only* to **Egon Jonsson** at the following email address: ejonsson@ihe.ca; Egon Jonsson Ph.D, Professor; Executive Director and CEO; Institute of Health Economics; 1200, 10405 Jasper Avenue; Edmonton, Alberta; Canada T5J 3N4; Email address: ejonsson@ihe.ca; Telephone: +1-780-448-4881; Fax: +1-780-448-0018.

PREPARATION OF MANUSCRIPT. The entire manuscript (in word format), including all notes and references, must be typed, *double-spaced* on 8½ × 11 inch or A4 paper, with at least 1-inch (2.54 cm) margins. Manuscript pages should be numbered consecutively. Manuscripts should be arranged as follows: 1) cover sheet with title and short title; 2) abstract and key words; 3) acknowledgments, including source of funding; 4) text; 5) references; 6) tables with titles; and 7) figures, with captions on a separate page. Manuscripts should typically have *no more than 4,000 words*—including the abstract, which should not exceed 250 words. There should be no more than a total of four tables and illustrations together and no more than 25 references. Tables and illustrations exceeding these limits may be posted on the Journal's web site (www.journals.cambridge.org/thc) as supplementary materials. Supplementary figures and tables should be numbered separately from the figures and tables in the printed issue, beginning with Supplementary Figure 1 and Supplementary Table 1. Where relevant, all manuscripts should include one paragraph on the policy implications of the findings of the study. Acronyms should be clearly spelled out on first use. The use of product trade names should be avoided; generic names should be used except where discussion of proprietary brands is essential to the manuscript.

COVER SHEET AND COVER LETTER. A cover letter, signed by all authors, must attest that 1) each named author contributed to both the conception/design and/or analysis/interpretation of the project and the writing of the paper; 2) each has approved the version being submitted; and 3) the content has not been published nor is being considered for publication elsewhere.

As relevant to the content of the paper, the letter should also attest to the fact that any research with human or animal subjects conforms to the legal and standards of the country in which it was performed. *All authors must disclose any financial arrangements with companies whose products are discussed in the paper or their competitors*; such information will not be revealed to reviewers but may be included in a suitable format in the final publication if the manuscript is accepted. The cover letter should also provide all authors' full names, professional degrees, and institutional mailing addresses.

The cover sheet should list the article's title, the name, complete mailing address, telephone and fax numbers, and e-mail ad-

dress of the corresponding author, and a short title (50 characters or less) for the running head.

ABSTRACT AND KEYWORDS. A 100- to 250-word abstract, submitted on a separate page, should *summarize* the objectives of the study or analysis, the article's major arguments and/or results, and its conclusions/recommendations. *Abstracts must be submitted in four sections:* Objectives; Methods; Results; and Conclusions, except where the subject and/or format of the article do not permit. Three to five key words, using terms from the Medical Subject Headings from *Index Medicus*, should follow the abstract.

REFERENCES AND NOTES. Bibliographic citations in the text should be indicated by numbers in parentheses usually at the end of the sentence after the period. When authors are mentioned in the text, the citation number should immediately follow the name(s) as follows: **In-text citations:** "Jones and Smith (7) maintained that. . ." *The reference list must be in alphabetical order* If a work has more than five authors, the first three authors should be listed, followed by et al. Abbreviate journal titles according to the listing in the current *Index Medicus*.

Book: 1. Jones AB, Smith JK. *Computer diagnosis and results*. New York: Penta Publishers; 1998.

Journal: 1. Jones AB, Smith JK. The relationship between health needs, the hospital, and the patient. *J Chron Dis*. 1995;32:310-312.

Article in edited work: 1. Jones AB, Smith JK. The diagnostic process. In: Brown R, Wilson T, eds. *New technology and its medical consequences*, vol. 1. New York: Apple Publishers; 1992:101-134.

In the reference list, do not include material that has been submitted for publication but has not yet been accepted. This material, with its date, should be noted in the text as "unpublished data" as follows:

Unpublished data: "Similar findings have been noted by L. W. Smith (unpublished data, 1998)."

The Journal does not accept footnotes or appendices.

TABLES AND FIGURES. Tables and figures should be numbered consecutively. All tables and figures must have a caption and must be cited in the text. Abbreviations in tables and figures should be avoided, except in the case of acronyms already used in the text. Table footnotes appear directly after the table; table references follow the footnotes. Figures must be submitted in Excel, PageMaker, or equivalent.

PERMISSIONS. Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors will be asked to assign their copyrights to Cambridge University Press.

COPYEDITING AND PROOFREADING. The publishers reserve the right to copyedit and proofread all accepted articles. Page proofs will be sent to the lead author for final review.

REPRINTS. The lead author will receive 25 reprints free of charge; additional numbers may be purchased if ordered at proof stage.
