

ADDENDUM

Development of a digital twin operational platform using Python Flask—ADDENDUM

Matthew S. Bonney, Marco de Angelis, Mattia Dal Borgo, Luis Andrade, Sandor Beregi, Nidhal Jamia and David J. Wagg

DOI: 10.1017/dce.2022.1 Published online by Cambridge University Press: 31 January 2022.

The editors and publisher of *Data-Centric Engineering* have awarded the Open Data and Open Materials badges to this article Bonney M, De Angelis M, Dal Borgo M, Andrade L, Beregi S, Jamia N and Wagg D (2022).

Open Data Badge—indicates that data necessary to reproduce the reported results are available in an open access repository, under an open licence, with an accompanying description of the data.

Open Materials Badge—indicates that any infrastructure, instruments, or equipment related to the reported methodology are available in an open access repository and are described in sufficient detail to allow a researcher to reproduce the procedure.

The original article has been updated to include the badges.

Please refer to the Data Availability Statement to find the identifier linking to the open data or open materials.
