

NEW FRONTIERS IN APPLIED PROBABILITY

A Festschrift for SØREN ASMUSSEN
Edited by P. GLYNN, T. MIKOSCH and T. ROLSKI

PUBLICATIONS OF SØREN ASMUSSEN

APPLIED PROBABILITY TRUST
AUGUST 2011

PUBLICATIONS OF SØREN ASMUSSEN

1975

- [1] *Statistisk Forsøgsplanlægning [Design and Analysis of Experiments]*. Institute of Mathematical Statistics, University of Copenhagen.

1976

- [2] Convergence rates for branching processes. *The Annals of Probability* **4**, 139–146.
[3] (WITH N. KAPLAN) Branching random walks. I. *Stochastic Processes and Their Applications* **4**, 1–13.
[4] (WITH N. KAPLAN) Branching random walks. II. *Stochastic Processes and Their Applications* **4**, 15–31.
[5] (WITH H. HERING) Strong limit theorems for general supercritical branching processes with applications to branching diffusions. *Zeitschrift für Wahrscheinlichkeitstheorie und Verwandte Gebiete* **36**, 195–212.
[6] (WITH H. HERING) Strong limit theorems for supercritical immigration-branching processes. *Mathematica Scandinavica* **39**, 327–342 (1977).
[7] Almost sure behaviour of linear functionals of branching processes. Technical Report No. 4, Institute of Mathematical Statistics, University of Copenhagen.

1977

- [8] Almost sure behavior of linear functionals of supercritical branching processes. *Transactions of the American Mathematical Society* **231**, 233–248.
[9] (WITH H. HERING) Some modified branching diffusion models. *Mathematical Biosciences* **35**, 281–299.

1978

- [10] (WITH N. KEIDING) Martingale central limit theorems and asymptotic estimation theory for multitype branching processes. *Advances in Applied Probability* **10**, 109–129.
[11] Some martingale methods in the limit theory of supercritical branching processes. In *Branching Processes* (Conference, Saint Hippolyte, Quebec, 1976; *Advances in Probability and Related Topics* **5**), Dekker, New York, pp. 1–26.
[12] *Measure-Theoretic Foundations of Probability Theory in Polish Spaces*. Institute of Mathematical Statistics, University of Copenhagen.
[13] (editor) *Problems and Exercises in Probability Theory*. Institute of Mathematical Statistics, University of Copenhagen.

1980

- [14] (WITH T. G. KURTZ) Necessary and sufficient conditions for complete convergence in the law of large numbers. *The Annals of Probability* **8**, 176–182.
[15] On some two-sex population models. *The Annals of Probability* **8**, 727–744.

1981

- [16] Equilibrium properties of the $M/G/1$ queue. *Zeitschrift für Wahrscheinlichkeitstheorie und Verwandte Gebiete* **58**, 267–281.
[17] Time-dependent approximations in some queueing systems with imbedded Markov chains related to random walks. Technical Report No. 6, Institute of Mathematical Statistics, University of Copenhagen.

1982

- [18] Conditioned limit theorems relating a random walk to its associate, with applications to risk reserve processes and the $GI/G/1$ queue. *Advances in Applied Probability* **14**, 143–170.
[19] On the role of a certain eigenvalue in estimating the growth rate of a branching process. *The Australian Journal of Statistics* **24**, 151–159.

© *Applied Probability Trust* 2011

This bibliography was compiled with the assistance of Jim Pitman, whose work was supported in part by the National Science Foundation grant 0835773 (Bibliographic Knowledge Network).

- [20] Contributions to the theory of branching processes. Dissertation for the degree of Dr Scientiarum, Institute of Mathematical Statistics, University of Copenhagen, 13pp.
- [21] Branching processes. In *Encyclopedia of Statistical Sciences*, edited by S. Kotz, N. L. Johnson and C. B. Read, John Wiley, New York, pp. 316–319.

1983

- [22] (WITH H. HERING) *Branching Processes* (Progress in Probability and Statistics **3**). Birkhäuser, Boston, MA.
- [23] (WITH D. EDWARDS) Collapsibility and response variables in contingency tables. *Biometrika* **70**, 567–578.
- [24] (editor) *Opgaver i Teoretisk Statistik. Statistik 2* [*Exercises in Theoretical Statistics for Statistik 2*]. Institute of Mathematical Statistics, University of Copenhagen.
- [25] Køteori: hverdagsproblemer og teoretisk matematik [Queueing theory: daily life problems and theoretical mathematics]. *Hovedområdet Naturligvis* 20–21.

1984

- [26] Approximations for the probability of ruin within finite time. *Scandinavian Actuarial Journal* **1984**, 31–57. (Correction: **1985** (1985), 64.)

1985

- [27] Conjugate processes and the simulation of ruin problems. *Stochastic Processes and Their Applications* **20**, 213–229.

1986

- [28] (WITH H. JOHANSEN) Über eine Stetigkeitsfrage betreffend das Bedienungssystem $GI/GI/s$. *Elektronische Informationsverarbeitung und Kybernetik* **22**, 565–570.
- [29] Estimation theory for multitype branching processes. In *Semi-Markov Models* (Brussels, 1984), Plenum, New York, pp. 385–395.

1987

- [30] *Applied Probability and Queues*. John Wiley, Chichester.
- [31] (WITH H. THORISSON) A Markov chain approach to periodic queues. *Journal of Applied Probability* **24**, 215–225.
- [32] The heavy traffic limit of a class of Markovian queueing models. *Operations Research Letters* **6**, 301–306.
- [33] Hvor farligt er det at være medlem af Dansk Bjergklub? [How dangerous is it being a member of the Danish mountaineering club?] *Dansk Bjergklub* 17–19.

1988

- [34] (WITH H. THORISSON) Large deviation results for time-dependent queue length distributions. *Communications in Statistics–Stochastic Models* **4**, 99–116.
- [35] (WITH S. SCHOCK PETERSEN) Ruin probabilities expressed in terms of storage processes. *Advances in Applied Probability* **20**, 913–916.

1989

- [36] Risk theory in a Markovian environment. *Scandinavian Actuarial Journal* **1989**, 69–100.
- [37] Validating the heavy traffic performance of regenerative simulation. *Communications in Statistics–Stochastic Models* **5**, 617–628.
- [38] Aspects of matrix Wiener–Hopf factorisation in applied probability. *The Mathematical Scientist* **14**, 101–116.
- [39] Exponential families generated by phase-type distributions and other Markov lifetimes. *Scandinavian Journal of Statistics: Theory and Applications* **16**, 319–334.

1990

- [40] Exponential families and regression in the Monte Carlo study of queues and random walks. *The Annals of Statistics* **18**, 1851–1867.
- [41] (WITH V. RAMASWAMI) Probabilistic interpretations of some duality results for the matrix paradigms in queueing theory. *Communications in Statistics–Stochastic Models* **6**, 715–733.
- [42] (WITH R. Y. RUBINSTEIN) The performance of the score function method in sensitivity analysis and stochastic optimization. In *Simulation and Optimization* (Lecture Notes in Economics and Mathematical Systems **374**), edited by G. Pflug and U. Dieter, Springer, pp. 1–13.

- [43] Nogle vekselvirkninger mellem sandsynlighedslære og datalogi [Some interplays between probability and computer science]. *Jubileumsforelæsning*, 11pp.

1991

- [44] Ladder heights and the Markov-modulated $M/G/1$ queue. *Stochastic Processes and Their Applications* **37**, 313–326.
- [45] (WITH E. JONSSON) A dependability measure for non-repairable and degradable computing systems. Technical Report No. 116, Department of Computer engineering, Chalmers University of Technology, Gothenburg. Abridged and revised variants have appeared in several conference proceedings (in part co-authored with Mikael Andersson):
- A practical measure for some attributes in degradable computing systems. In *Compendium from the Nordic Seminar on Dependable Computing Systems* (NS-DCD'92, Trondheim, August 1992), edited by P. E. Heegaard and B. E. Helvik, pp. 413–426.
- A practical dependability measure for embedded computer systems. In *12th IFAC Triennial World Congress* (Sydney, Australia, July 1993), pp. 647–652.
- A practical dependability measure for degradable computer systems with non-exponential degradation. In *IFAC Fault Detection, Supervision and Safety for Technical Processes* (SAFEPROCESS'94, Espoo, Finland, June 1994), pp. 231–237.
- An attempt to quantitative modelling of behavioural security. In *Proceedings of the 11th International Security Conference* (IFIP/SEC'95, Cape Town, South Africa, 1995), pp. 44–57.
- [46] (WITH O. NERMAN) Fitting phase-type distributions via the EM algorithm. In *Symposium i Anvendt Statistik* (Copenhagen, January 1991), edited by K. Vest Nielsen, pp. 335–346.
- [47] Phase-type representations of waiting times. In *Queueing, Performance and Control in ATM*, edited by J. W. Cohen and C. D. Pack, North-Holland, pp. 157–159.

1992

- [48] Queueing simulation in heavy traffic. *Mathematics of Operations Research* **17**, 84–111.
- [49] Phase-type representations in random walk and queueing problems. *The Annals of Probability* **20**, 772–789.
- [50] (WITH R. Y. RUBINSTEIN) The efficiency and heavy traffic properties of the score function method in sensitivity analysis of queueing models. *Advances in Applied Probability* **24**, 172–201.
- [51] Light traffic equivalence in single-server queues. *The Annals of Applied Probability* **2**, 555–574.
- [52] On coupling and weak convergence to stationarity. *The Annals of Applied Probability* **2**, 739–751.
- [53] (WITH T. ROLSKI) Computational methods in risk theory: a matrix-algorithmic approach. *Insurance: Mathematics & Economics* **10**, 259–274.
- [54] (WITH D. PERRY) On cycle maxima, first passage problems and extreme value theory for queues. *Communications in Statistics—Stochastic Models* **8**, 421–458.
- [55] (WITH O. HÄGGSTRÖM AND O. NERMAN) EMPHT—A program for fitting phase-type distributions. Technical Report No. 4, Mathematical Statistics, Chalmers University of Technology and the University of Gothenburg. The associated software can be downloaded from <http://home.imf.au.dk/asmus>.
- [56] (WITH P. W. GLYNN AND H. THORISSON) Stationarity detection in the initial transient problem. *ACM Transactions of Modeling and Computer Simulation* **2**, 130–157.

1993

- [57] (WITH S. FOSS) Renovation, regeneration, and coupling in multiple-server queues in continuous time. In *Proceedings of the Third Finnish-Soviet Symposium on Probability Theory and Mathematical Statistics* (Turku, Finland, August 1991; *Frontiers in Pure and Applied Probability* **1**), edited by H. Niemi, G. Hognas, A. N. Shiryaev and A. V. Melnikov, VSP, Utrecht, pp. 1–6.
- [58] (WITH R. Y. RUBINSTEIN) Response surface estimation and sensitivity analysis via efficient change of measure. *Communications in Statistics—Stochastic Models* **9**, 313–339.
- [59] (WITH V. SCHMIDT) The ascending ladder height distribution for a certain class of dependent random walks. *Statistica Neerlandica. Journal of the Netherlands Society for Statistics and Operations Research* **47**, 269–277.
- [60] (WITH G. KOOLE) Marked point processes as limits of Markovian arrival streams. *Journal of Applied Probability* **30**, 365–372.
- [61] A tutorial on queueing networks. In *Networks and Chaos—Statistical and Probabilistic Aspects* (Monographs on Statistics and Applied Probability **50**), Chapman & Hall, London, pp. 251–275.
- [62] (WITH R. Y. RUBINSTEIN AND A. SHAPIRO (editors)) *Sensitivity Analysis and Optimization of Discrete Events Systems* (Annals of Operations Research **39**). Science Publishers, Red Bank, NJ.

1994

- [63] (WITH T. ROLSKI) Risk theory in a periodic environment: the Cramér–Lundberg approximation and Lundberg’s inequality. *Mathematics of Operations Research* **19**, 410–433.
- [64] (WITH R. Y. RUBINSTEIN AND C.-L. WANG) Regenerative rare events simulation via likelihood ratios. *Journal of Applied Probability* **31**, 797–815.
- [65] (WITH B. MELAMED) Regenerative simulation of TES processes. *Acta Applicandae Mathematicae. An International Survey Journal on Applying Mathematics and Mathematical Applications* **34**, 237–260.
- [66] (WITH L. FLØE HENRIKSEN AND C. KLÜPPELBERG) Large claims approximations for risk processes in a Markovian environment. *Stochastic Processes and Their Applications* **54**, 29–43.
- [67] Busy period analysis, rare events and transient behavior in fluid flow models. *Journal of Applied Mathematics and Stochastic Analysis* **7**, 269–299.
- [68] (WITH M. BLADT) Poisson’s equation for queues driven by a Markovian marked point process. *Queueing Systems—Theory and Applications* **17**, 235–274.
- [69] (WITH M. BLADT) A sample path approach to mean busy periods for Markov-modulated queues and fluids. *Advances in Applied Probability* **26**, 1117–1121.
- [70] Markov chains and related topics. A short second course. Internal Report IR-94-2031, Department of Mathematics and Computer Science, Aalborg University.

1995

- [71] Stationary distributions for fluid flow models with or without Brownian noise. *Communications in Statistics—Stochastic Models* **11**, 21–49.
- [72] (WITH D. PERRY) Rejection rules in the $M/G/1$ queue. *Queueing Systems—Theory and Applications* **19**, 105–130.
- [73] (WITH P. GLYNN AND J. PITMAN) Discretization error in simulation of one-dimensional reflecting Brownian motion. *The Annals of Applied Probability* **5**, 875–896.
- [74] (WITH V. SCHMIDT) Ladder height distributions with marks. *Stochastic Processes and Their Applications* **58**, 105–119.
- [75] (WITH H. M. NIELSEN) Ruin probabilities via local adjustment coefficients. *Journal of Applied Probability* **32**, 736–755.
- [76] (WITH R. Y. RUBINSTEIN) Steady state rare events simulation in queueing models and its complexity properties. In *Advances in Queueing*, CRC, Boca Raton, FL, pp. 429–461.
- [77] Stationary distributions via first passage times. In *Advances in Queueing*, CRC, Boca Raton, FL, pp. 79–102.
- [78] (WITH A. FREY AND T. ROLSKI) Does Markov-modulation increase the risk? *ASTIN Bulletin. The Journal of the International Actuarial Association* **25**, 49–66.

1996

- [79] (WITH C.-L. WANG) Variance reduction for simulating transient $GI/G/1$ behavior. *Probability in the Engineering and Informational Sciences* **10**, 197–205.
- [80] (WITH M. BLADT) Phase-type distributions and risk processes with state-dependent premiums. *Scandinavian Actuarial Journal* **1996**, 19–36.
- [81] (WITH O. KELLA) Rate modulation in dams and ruin problems. *Journal of Applied Probability* **33**, 523–535.
- [82] (WITH K. SIGMAN) Montone stochastic recursions and their duals. *Probability in the Engineering and Informational Sciences* **10**, 1–20.
- [83] (WITH J. L. TEUGELS) Convergence rates for $M/G/1$ queues and ruin problems with heavy tails. *Journal of Applied Probability* **33**, 1181–1190.
- [84] (WITH C. KLÜPPELBERG) Large deviations results for subexponential tails, with applications to insurance risk. *Stochastic Processes and Their Applications* **64**, 103–125.
- [85] Rare events in the presence of heavy tails. In *Stochastic Networks* (New York, 1995; Lecture Notes in Statistics **117**), Springer, New York, pp. 197–214.
- [86] (WITH O. NERMAN AND M. OLSSON) Fitting phase-type distributions via the EM algorithm. *Scandinavian Journal of Statistics* **23**, 419–441.

1997

- [87] (WITH M. BLADT) Renewal theory and queueing algorithms for matrix-exponential distributions. In *Matrix-Analytic Methods in Stochastic Models* (Flint, MI; Lecture Notes in Pure and Applied Mathematics **183**), Dekker, New York, pp. 313–341.
- [88] (WITH C. KLÜPPELBERG) Stationary $M/G/1$ excursions in the presence of heavy tails. *Journal of Applied Probability* **34**, 208–212.

- [89] (WITH M. TAKSAR) Controlled diffusion models for optimal dividend pay-out. *Insurance: Mathematics & Economics* **20**, 1–15.
- [90] Phase-type distributions and related point processes: fitting and recent advances. In *Matrix-Analytic Methods in Stochastic Models* (Flint, MI; Lecture Notes in Pure and Applied Mathematics **183**), Dekker, New York, pp. 137–149.

- [92] Sällsynta händelser: Hur tillförlitliga är sannoliketskalkyler? [Rare events: how reliable are probability calculations?]. *Lundaforskare Föreläsar* **29**, 14–19.

1998

- [93] (WITH D. PERRY) An operational calculus for matrix-exponential distributions, with applications to a Brownian (q, Q) inventory model. *Mathematics of Operations Research* **23**, 166–176.
- [94] A probabilistic look at the Wiener–Hopf equation. *SIAM Review* **40**, 189–201.
- [95] Subexponential asymptotics for stochastic processes: extremal behavior, stationary distributions and first passage probabilities. *The Annals of Applied Probability* **8**, 354–374.
- [96] (WITH T. S. TUROVA) Stationarity properties of neural networks. *Journal of Applied Probability* **35**, 783–794.
- [97] (WITH C. A. O’CINNEIDE) Representations for matrix-geometric and matrix-exponential steady-state distributions with applications to many-server queues. *Communications in Statistics–Stochastic Models* **14**, 369–387.
- [98] Extreme value theory for queues via cycle maxima. *Extremes. Statistical Theory and Applications in Science, Engineering and Economics* **1**, 137–168.
- [99] (WITH P. NILSSON AND T. FAGERSTRÖM) The evolution of postponed germination in temporally homogeneous environments. Unpublished manuscript, Department of Theoretical Ecology, Lund University.
- [100] (WITH M. OLSSON) Phase-type distributions. In *Encyclopedia of Statistical Sciences, Update Volume 2*, edited by S. Kotz, C. B. Read and D. L. Banks, Wiley-Interscience, New York, pp. 525–530.
- [101] Køteori [Queueing theory]. In *Danmarks Nationalleksikon [The Danish National Encyclopedia]*, Volume 11, edited by J. Lund, Gyldendal, p. 526.
- [102] Stationær process [Stationary process]. In *Danmarks Nationalleksikon [The Danish National Encyclopedia]*, Volume 18, edited by J. Lund, Gyldendal, p. 30.
- [103] Stokastisk process [Stochastic process]. In *Danmarks Nationalleksikon [The Danish National Encyclopedia]*, Volume 18, edited by J. Lund, Gyldendal, p. 116.
- [104] Stokastisk variabel [Random variable]. In *Danmarks Nationalleksikon [The Danish National Encyclopedia]*, Volume 18, edited by J. Lund, Gyldendal, p. 117.

1999

- [105] (WITH H. SCHMIDLI AND V. SCHMIDT) Tail probabilities for non-standard risk and queueing processes with subexponential jumps. *Advances in Applied Probability* **31**, 422–447.
- [106] (WITH B. HØJGAARD) Approximations for finite horizon ruin probabilities in the renewal model. *Scandinavian Actuarial Journal* **1999**, 106–119.
- [107] (WITH V. KALASHNIKOV) Failure rates of regenerative systems with heavy tails. In *Proceedings of the 18th Seminar on Stability Problems for Stochastic Models, Part III* (Hajdúszoboszló, 1997; Journal of Mathematical Sciences (New York) **93**), pp. 486–500.
- [108] (WITH C. KLÜPPELBERG AND K. SIGMAN) Sampling at subexponential times, with queueing applications. *Stochastic Processes and Their Applications* **79**, 265–286.
- [109] (WITH J. R. MØLLER) Tail asymptotics for $M/G/1$ type queueing processes with subexponential increments. *Queueing Systems—Theory and Applications* **33**, 153–176.
- [110] (WITH M. BLADT) Point processes with finite-dimensional conditional probabilities. *Stochastic Processes and Their Applications* **82**, 127–142.
- [111] (WITH J. F. COLLAMORE) Exact asymptotics for a large deviations problem for the $GI/G/1$ queue. *Markov Processes and Related Fields* **5**, 451–476.
- [112] (WITH C. A. O’CINNEIDE) Matrix-exponential distributions—distributions with a rational Laplace transform. In *Encyclopedia of Statistical Sciences, Supplementary Volume*, edited by S. Kotz, N. L. Johnson and C. B. Read, John Wiley, New York, pp. 435–440.
- [113] Semi-Markov queues with heavy tails. In *Semi-Markov Models and Applications* (Compiègne, 1998), Kluwer, Dordrecht, pp. 269–284.
- [114] On the ruin problem for some adapted premium rules. In *Probabilistic Analysis of Rare Events: Theory and Problems of Safety, Insurance and Ruin*, edited by V. V. Kalashnikov and A. M. Andronov, Riga Aviation University, pp. 1–19.
- [115] *Statistical Methods and Models* (Course Lecture Notes). Department of Mathematical Statistics, Lund University, 141pp.
- [116] *Stochastic Simulation. With a View towards Stochastic Processes* (MaPhySto Lecture Notes **2**). MaPhySto, Aarhus University.

2000

- [117] (WITH O. KELLA) A multi-dimensional martingale for Markov additive processes and its applications. *Advances in Applied Probability* **32**, 376–393.
- [118] (WITH K. BINSWANGER AND B. HØJGAARD) Rare events simulation for heavy-tailed distributions. *Bernoulli. Official Journal of the Bernoulli Society for Mathematical Statistics and Probability* **6**, 303–322.
- [119] (WITH B. HØJGAARD AND M. TAKSAR) Optimal risk control and dividend distribution policies. Example of excess-of-loss reinsurance for an insurance corporation. *Finance and Stochastics* **4**, 299–324.
- [120] *Ruin Probabilities* (Advanced Series on Statistical Science & Applied Probability **2**). World Scientific, River Edge, NJ.
- [121] Matrix-analytic models and their analysis. *Scandinavian Journal of Statistics–Theory and Applications* **27**, 193–226.
- [122] Rare events simulation, exponential change of measure and boundaries. In *Symposium in Honour of Ole E. Barndorff-Nielsen* (Aarhus, 2000; *Memoirs* **16**), University of Aarhus, Aarhus, pp. 1–6.

2001

- [123] (WITH O. KELLA) On optional stopping of some exponential martingales for Lévy processes with or without reflection. *Stochastic Processes and Their Applications* **91**, 47–55.
- [124] (WITH J. R. MØLLER) Calculation of the steady state waiting time distribution in $GI/PH/c$ and $MAP/PH/c$ queues. *Queueing Systems–Theory and Applications* **37**, 9–29.
- [125] (WITH J. ROSIŃSKI) Approximations of small jumps of Lévy processes with a view towards simulation. *Journal of Applied Probability* **38**, 482–493.

2002

- [126] (WITH P. FÜCKERIEDER, M. JOBMANN AND H.-P. SCHWEFEL) Large deviations and fast simulation in the presence of boundaries. *Stochastic Processes and Their Applications* **102**, 1–23.
- [127] (WITH V. KALASHNIKOV, D. KONSTANTINIDES, C. KLÜPPELBERG, AND G. TSITSIAHVILI) A local limit theorem for random walk maxima with heavy tails. *Statistics & Probability Letters* **56**, 399–404.
- [128] (WITH F. AVRAM AND M. USABEL) Erlangian approximations for finite-horizon ruin probabilities. *ASTIN Bulletin. The Journal of the International Actuarial Association* **32**, 267–281.
- [129] (WITH C. O’CINNEIDE) On the tail of the waiting time in a Markov-modulated $M/G/1$ queue. *Operations Research* **50**, 559–565.
- [130] (WITH M. JOBMANN AND H.-P. SCHWEFEL) Exact buffer overflow calculations for queues via martingales. *Queueing Systems–Theory and Applications* **42**, 63–90.
- [131] Large deviations in rare events simulation: examples, counterexamples and alternatives. In *Monte Carlo and Quasi-Monte Carlo Methods 2000* (Hong Kong), Springer, Berlin, pp. 1–9.

2003

- [132] (WITH J. R. MØLLER) Risk comparisons of premium rules: optimality and a life insurance study. *Insurance: Mathematics & Economics* **32**, 331–344.
- [133] (WITH S. FOSS AND D. KORSHUNOV) Asymptotics for sums of random variables with local subexponential behaviour. *Journal of Theoretical Probability* **16**, 489–518.
- [134] *Applied Probability and Queues* (Applications of Mathematics (New York) **51**), 2nd edition. Springer, New York.

2004

- [135] (WITH F. AVRAM AND M. R. PISTORIUS) Russian and American put options under exponential phase-type Lévy models. *Stochastic Processes and Their Applications* **109**, 79–111.
- [136] (WITH M. PIHLGÅRD) Transient properties of many-server queues and related QBDs. *Queueing Systems–Theory and Applications* **46**, 249–270.
- [137] (WITH S. RASMUS AND M. WIKTORSSON) Pricing of some exotic options with NIG -Lévy input. In *Computational Science—ICCS 2004. Part IV* (Lecture Notes in Computer Science **3039**), Springer, Berlin, pp. 795–802.
- [138] Terminal distributions for skipfree Markov additive processes with absorption. Technical Report No. 14, Thiele Center, Aarhus University.
- [139] (editor) Section 10: Probability Theory. In *Encyclopedia of Actuarial Sciences*, edited by J. L. Teugels and B. Sundt, John Wiley, New York.
- [140] Random variable. In *Encyclopedia of Actuarial Sciences*, edited by J. L. Teugels and B. Sundt, John Wiley, New York, pp. 1369–1372.
- [141] Rare event. In *Encyclopedia of Actuarial Sciences*, edited by J. L. Teugels and B. Sundt, John Wiley, New York, pp. 1378–1379.

- [142] Simulation of stochastic processes. In *Encyclopedia of Actuarial Sciences*, edited by J. L. Teugels and B. Sundt, John Wiley, New York, pp. 1570–1572.
- [143] Stochastic processes. In *Encyclopedia of Actuarial Sciences*, edited by J. L. Teugels and B. Sundt, John Wiley, New York, pp. 1610–1613.

2005

- [144] (WITH D. P. KROESE AND R. Y. RUBINSTEIN) Heavy tails, importance sampling and cross-entropy. *Stochastic Models* **21**, 57–76.
- [145] (WITH M. PIHLISGÅRD) Performance analysis with truncated heavy-tailed distributions. *Methodology and Computing in Applied Probability* **7**, 439–457.

2006

- [146] (WITH D. P. KROESE) Improved algorithms for rare event simulation with heavy tails. *Advances in Applied Probability* **38**, 545–558.
- [147] (WITH H. ALBRECHER) Ruin probabilities and aggregate claims distributions for shot noise Cox processes. *Scandinavian Actuarial Journal* **2006**, 86–110.
- [148] (WITH H. ALBRECHER AND D. KORTSCHAK) Tail asymptotics for the sum of two heavy-tailed dependent risks. *Extremes. Statistical Theory and Applications in Science, Engineering and Economics* **9**, 107–130.
- [149] (WITH R. SHEAHAN, L. LIPSKY AND P. M. FIORINI) On the completion time distribution for tasks that must restart from the beginning if failure occurs. *ACM SIGMETRICS Performance Evaluation Review* **34**, 24–26.

2007

- [150] (WITH M. PIHLISGÅRD) Loss rates for Lévy processes with two reflecting barriers. *Mathematics of Operations Research* **32**, 308–321.
- [151] (WITH L. ROJAS-NANDAYAPA) Efficient simulation of finite horizon problems in queueing and insurance risk. *Queueing Systems—Theory and Applications* **57**, 85–97.
