Thomas A Edison Papers

Here, in the first published microfilm edition of the Edison Papers, scholars can glimpse the detailed workings of this inventive genius, as well as the conditions and atmosphere in which he worked. The editors have done a magnificent job of indexing, cataloging, and photocopying over 45,000 pages of notebooks, correspondence, and official records. The microfilm is accompanied by a 152-page guide that describes the history of this collection and contains indexes to authors and recipients of correspondence and to technical papers, drawings, and financial documents. This collection will be a valuable addition to any research library.

—Choice

Inventor, businessman, scientist, industrialist, entrepreneur, engineer—Thomas Alva Edison developed many of the technologies that have shaped the modern world. Perhaps more than any other single figure, Edison helped to integrate the worlds of science, technology, business, and finance. Edison's work laid the foundation for the age of electricity, recorded sound, and motion pictures. In addition, he utilized team research and development with such great success at his Menlo Park and West Orange laboratories that he helped introduce the era of modern industrial research. In a manner unprecedented in the history of technological discovery, Edison's work brought together the laboratory and the marketplace in a unique, cooperative venture. It was a combination that was to transform the industrial, economic, and social landscape of America.

The life, the work, and the vision of Thomas Edison are documented in the laboratory notebooks, diaries, business records, correspondence, and related papers that have survived the more than fifty years since his death. Access to these papers will be a boon to scholars in many areas of study: the history of science and technology, business and economic history, the history of popular culture, film history, social and labor history, and other diverse interests. Because of the massive quantity of material, its dispersal all over the world, and its limited accessibility, these resources have been neglected. Now, through the Thomas A. Edison Papers project, the papers of Edison and his associates are being published for the first time.

Ordering Information _____

THOMAS A. EDISON PAPERS. A Selective Microfilm Edition.

Part I (1850–1878).

Newcomen Awards in Business History

For the best article published in the *Business History Review* during the previous year the Society will award a prize of \$300 and a scroll. For the best article published in the *Business History Review* during the previous year by a graduate student or a recent Ph.D. who has not published a book in business history, the Society will award a special prize of \$150 and a scroll. Criteria for selection include originality, value, breadth and interest of contribution, quality of research materials and methods, and quality of presentation.

Winners will be selected by a panel of judges consisting of the editors and the members of the editorial board of the *Business History Review*, none of whom shall be eligible to receive a prize. The awards are administered by the editorial office of the *Review*. No special prize will be awarded in years when, in the opinion of the judges, no eligible article suitable for the prize was published, and no person may be awarded both prizes in any one year.

Thomas Newcomen Book Award in Business History

The Newcomen Society of the United States, in cooperation with the *Business History Review*, will award in 1988 the ninth in a series of triennial prizes consisting of \$1,000 and a scroll for the best book on the history of business published in the United States between 1985 and 1987. "Business history" is defined in its broadest sense to include not only the history of firms or industries, but books tracing interactions of business leaders, analyses of business philosophy or behavior, and studies of the adjustment of businesses and businesspeople to their economic, political, and social environments. Criteria for selection will include contribution to knowledge, depth of analysis, soundness of reasoning, clarity of style and organization, and general readability and format.

Judges for the 1988 award will be announced at an appropriate time by the Harvard Business School and the Newcomen Society of the United States.

MANAGING BIG BUSINESS

Essays from the Business History Review

Edited by Richard S. Tedlow and Richard R. John, Jr.

MANAGING BIG BUSINESS is a collection of the most imaginative and influential essays published in the Business History Review, with an introduction by the editors that places them in context. It focuses on the history of the modern corporation, addressing it from the diverse perspectives of entrepreneurship, technology, industrial organization, law and public policy, labor, and women in the work force. Altogether the essays demonstrate how business history has expanded its horizons and has contributed to a more comprehensive portrait of our nation's corporate past.

THE CHASE

The Chase Manhattan Bank, N.A., 1945-1985

John Donald Wilson

THE CHASE recounts half a century of the bank's history, chronicling decade by decade the far-reaching changes in activities, organizations, and corporate culture that helped to reshape the U.S. banking industry. Here is the story behind the emergence of the Chase Manhattan Bank as one of the world's great leaders in finance.

"THE CHASE" is an excellent book. Wilson interprets as well as records to provide significant and interesting background on key decisions and evaluates rather candidly which were correct and which proved faulty. No one reading the book can fail to appreciate the power of personal leadership in shaping the course of a company." —Walter E. Hoadley
