

# KYBERNETES

*International Journal of Cybernetics and Systems*  
(a quarterly)

EDITOR: Dr J. Rose

ASSISTANT EDITORS:

Professors

F. H. George (U.K.), T. C. Helvey (U.S.A.),  
E. Nicolau (Romania) and Guang-Ming Shen (China)

ADVISORY BOARD:

Professors

S. Dillon Ripley (U.S.A.), U. S. von Euler (Nobel Laureate, Sweden),  
Hua Luogeng (China), M. Manescu (Romania),  
Sir Harry Massie (U.K.) and E. Wolff (France)

There are also 15 section editors from 8 countries and 21 members of the  
Editorial Board from 11 countries

This journal is concerned with the interdisciplinary study of cybernetics and systems in the widest sense. Among the extensive range of topics covered are the following: *Artificial Intelligence, Automation, Cybernetic Modelling, Computer Simulation, Biocybernetics, Economic and Social Systems, Nature and Validation of General Systems, Ecosystems, Adaptive Systems, Philosophy of Cybernetics, the Interrelation between Cybernetics and other Sciences.*

**Kybernetes**, now in its thirteenth year of publication, aims to endow cybernetics and general systems with an authoritative voice of its own and to establish a competent forum for the exchange of knowledge and information in relevant fields. One of the primary objectives of this publication is to weed out pseudo-cybernetics claims and to base cybernetics on a sound foundation; hence, highly speculative papers that lie on the fringe of cybernetics and systems sciences will not be published. The journal contains only *original papers*; it is the official publication of the World Organisation of General Systems and Cybernetics.

Enquiries and orders to:

Thales Publications (W.O.) Ltd  
4 Pleck Farm Avenue  
Blackburn BB1 8PE  
England  
(Tel. 0254-55307)

SUBSCRIPTION RATES PER VOLUME OF FOUR QUARTERLY ISSUES  
(includes air mail delivery to countries outside Europe):

Great Britain . . . £50.00  
Outside Great Britain . . . (U.S.)\$120.00

For Advertising Rates and Back Issues enquire at Thales Publications (W.O.) Ltd,  
as above.

A PRESTIGE PUBLICATION, INDISPENSABLE TO  
YOUR ORGANISATION AND TO YOU

## INDEX TO VOLUME 1

- Bell, D. A.** Employment in the age of robots, 103–104
- Bock, P.** English as a command language for robot control (*HIROB*), 19–24
- Cayla, C.** *See* Luneau, Richetin & Cayla
- Coiffet, P.** *See* Zapata, Dauchez & Coiffet
- Dauchez, P.** *See* Zapata, Dauchez & Coiffet
- Davis, A. F. & Nevill, Jr., G.E.** Corrugated PVDF bimorphs as tactile sensors and micro-actuators—A research note, 239–240
- Esat, I. I.** *See* Taylor, Lavie & Esat
- Havlik, Š.** A new elastic structure for a compliant robot wrist, 95–102
- Hockham, J. F. & O'Connor, B. M.** Application of a robot in a working cell, 139–145
- Hoffman, J. D. & Malstrom, E. M.** Teaching a miniature robotic manipulator to play chess, 197–203
- Hoshino, H.** *See* Kuno, Numagami, Ishikawa, Hoshino, Nakamura & Kidode
- Ishikawa, M.** *See* Kuno, Numagami, Ishikawa, Hoshino, Nakamura & Kidode
- Jarvis, R. A.** Expedient range enhanced 3-D robot colour vision, 25–31
- Kato, I.** Coming robot new era (a viewpoint), 9–13
- Kidode, M.** *See* Kuno, Numagami, Ishikawa, Hoshino, Nakamura & Kidode
- Kinoshita, G.** Representation and tactile sensing of 3-D objects by a gripper finger, 217–222
- Klein, A.** Energy consumption of three-link manipulators as a function of geometric features and trajectory parameters, 79–83
- Kuno, Y., Numagami, H., Ishikawa, M., Hoshino, H., Nakamura, Y. & Kidode, M.** Robot vision implementation by high-speed image processor TOSPIX: Battery inspection, 223–230
- Lavie, D.** *See* Taylor, Lavie & Esat
- Lenarčič, J.** A new method for calculating the Jacobian for a robot manipulator, 205–209
- Lowe, D. B.** Robots—from concept to commissioning (company profile), 161–165
- Luneau, P., Richetin, M. & Cayla, C.** Sequential learning of automata from input–output behaviour, 151–159
- Malstrom, E. M.,** *See* Hoffman & Malstrom
- Malstrom, E. M.** *See* Schafer & Malstrom
- Nakamura, Y.,** *See* Kuno, Numagami, Ishikawa, Hoshino, Nakamura & Kidode
- Nevill, Jr., G. E.** *See* Davis & Nevill
- Numagami, H.** *See* Kuno, Numagami, Ishikawa, Hoshino, Nakamura & Kidode
- O'Connor, B. M.** *See* Hockham & O'Connor
- Red, W. E.** Minimum distances for robot task simulation, 231–238
- Rees Jones, J.** Vibration due to motion discontinuities in hydraulically actuated robots, 211–215
- Richetin, M.** *See* Luneau, Richetin & Cayla
- Salter, R. M.** Planning in a continuous domain—An introduction, 85–93
- Schafer, H. S. & Malstrom, E. M.** Testing the efficiency and motion economy of two-finger robotic grippers, 127–137
- Schnurr, L. E.** Precision robotics—within our grasp?—A viewpoint, 147–149
- Taylor, J. E.** R & D in human aspects of robotic technology, 15–17
- Taylor, W. K., Lavie, D. & Esat, I. I.** A curvilinear snake arm robot with gripper-axis fibre-optic image processor feedback, 33–39
- Umetani, Y. & Yonemoto, K.** Japan's robotics research for the next generation, 189–196.
- Yager, R. R.** Robot planning with fuzzy sets, 41–50
- Yonemoto, K.** *See* Umetani & Yonemoto
- Zapata, R., Dauchez, P. & Coiffet, P.** Co-operation of robots in gripping tasks: the exchange problem, 73–77

## INDEX OF BOOKS REVIEWED IN VOLUME 1

The name of the reviewer of the book is given in parentheses

- Adey, R. A.** (Ed.) *Software for Engineering Problems*. (I. SOMMERVILLE) 242.
- Barr, A. & Feigenbaum, E. A.** *The Handbook of Artificial Intelligence*, Vols. I and II. (A. M. ANDREW) 110.
- Boden, M.** *Artificial Intelligence and Natural Man*. (A. M. ANDREW) 111.
- Brady, M.** (Ed.) *Robot Motion: Planning and Control*. (DR D. MYERS) 109.
- Brady, M., Hollerbach, J. M., Johnson, T. L., Lozano-Perez, T. & Mason, M. T.** (Eds) *Robot Motion*. (W. K. TAYLOR) 242.
- Cohen, P. R. & Feigenbaum, E. A.** *The Handbook of Artificial Intelligence*, Vol. III. (A. M. ANDREW) 110.
- Engelberger, J. F.** *Robotics in Practice*. (M. W. THRING) 169.
- Evans, D. J.** (Ed.) *Parallel Processing Systems—An Advanced Course*. (B. H. RUDALL) 53–54.
- Faugeras, O. D.** (Ed.) *Fundamentals in Computer Vision*. (I. ALEKSANDER) 169–170.
- Fossum, E.** (Ed.) *Computerization of Working Life*. (A. M. ANDREW) 112.
- Fu, K. S.** (Ed.) *Communications and Cybernetics Series No. 10. Digital Pattern Recognition*. (B. H. RUDALL) 54.
- Gheorghe, A.** *Applied Systems Engineering*. (P. E. STRINGER) 113.
- Hayes, J. E. & Michie, D.** (Eds) *Intelligent Systems: The Unprecedented Opportunity*. (A. M. ANDREW) 242–243.
- Hayes, J. E., Michie, D. & Pao, Y.-H.** (Eds) *Machine Intelligence 10*. (A. M. ANDREW) 52–53.
- Huang, T. S.** (Ed.) *Two-Dimensional Digital Signal Processing—Volumes I and II*. (I. ALEKSANDER) 54.
- Hung, Y. S. & MacFarlane, A. G. F.** *Review of Multivariable Feedback a Quasiclassical Approach*. (R. MITCHELL) 110–111.
- Isata 82 Proceedings**. (P. G. RANKY) 111–112.
- Kandel, A.** *Fuzzy Techniques in Pattern Recognition*. (A. M. ANDREW) 170.
- Milne, A. D.** (Ed.) *Mos Devices—Design and Manufacture*. (P. J. HICKS) 112–113.
- Mitrani, I.** *Simulation Technique for Discrete Event Systems*. (P. A. LUKER) 170–171.
- Néel, D.** (Ed.) *Tools and Notions of Program Construction*. (C. M. P. READE) 54–55.
- Oh, Y. L.** *A Report on Robot Technology*. (J. ROSE) 110.
- Oh, Y. L.** (Ed.) *Robots and Australian Industry*. (E. W. REED) 52.
- Pugh, A.** (Ed.) *Robot Vision*. (I. ALEKSANDER) 241–242.
- Rooks, B.** *Developments in Robotics 1983*. (H. H. ROSENBRock) 241.
- Schwefel, H.-P.** *Numerical Optimization of Computer Models*. (A. M. ANDREW) 53.
- Simons, G. L.** *Towards Fifth Generation Computers*. (B. H. RUDALL) 171.
- Thring, M. W.** *Robots and Telechairs*. (DR D. A. BRADLEY) 241.
- Toda, M.** *Man, Robot and Society: Models and Speculations*. (A. M. ANDREW) 51–52.
- Warring, R. H.** *Robotics and Robotology*. (F. ROSE) 109.

## Notes for Contributors

**1.** Manuscripts should preferably be written in English, but papers in French and German will also be accepted. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favourable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Deputy Editor or the Editor.

**2.** Typescripts should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, position and affiliations.

**3.** A short abstract of about 80 words should precede the main text. *List of symbols:* A typewritten list of any special symbols should be submitted with the manuscript. The list should not define the symbols mathematically, but should serve to identify them typographically. The list will not appear in print, but is essential to help the typesetter and to avoid costly correction in proof.

**4.** One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.

**5.** One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy. Figures should be numbered consecutively, with arabic numerals, have descriptive captions, and be mentioned in the text. The correct position for each figure should be indicated in the margin of the manuscript.

**6.** Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables. Number tables

consecutively with roman numerals. Each should have a brief heading. Exceptionally lengthy tables may be summarized for publication with a note that copies of details can be obtained from the authors.

**7. Equations:** Wherever possible, mathematical equations should be typewritten, with subscripts and superscripts clearly indicated. The printer will set all mathematical symbols in italics unless otherwise indicated; symbols or letters to be set in roman (upright) type should be encircled in pencil, while bold letters should be shown by a wavy underline.

**8. References:** In the text, references are indicated by superior arabic numbers (without brackets), and should be confined to publish work that is directly pertinent. References should be listed at the end of the paper in numerical order. Authors' initials should precede their names; cited article titles should be quoted in full, enclosed in quotation marks; and abbreviations of journal names should follow the style of *Chemical Abstracts* or *Physical Abstracts*, and be underlined for italics: P.W. Anderson, "More is different" *Science* **177**, 393 (1972) C.V. Negoita, *Fuzzy Systems* (Abacus Press, Tunbridge Wells, UK, 1980)

Citations such as 'personal communication', 'unpublished work', etc., are not acceptable as numbered references but can be included in parenthesis in the text. Do not use summaries as references.

**9. Proofs:** Page proofs will be sent to authors for correction, for return within 48 hours by airmail. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.

**10.** Manuscripts, whether accepted or rejected, will not be returned to the authors.

**11.** Submission of an article will be taken to imply that it has not been previously published and that it is not on offer to any other publisher.

# ROBOTICA

Volume 2 Part 1

January 1984

## CONTENTS

<b>Introduction to the special issue on robotic vision, R. A. Jarvis and Y. L. Oh.</b>	<b>1</b>
<b>Application-oriented robotic vision – a review, R. A. Jarvis (Australia)</b>	<b>3</b>
<b>Servoed world models as interfaces between robot control systems and sensory data, Ernest W. Kent and James S. Albus (U.S.A.)</b>	<b>17</b>
<b>Special computer architectures for image analysis, K. S. Fu (U.S.A.)</b>	<b>27</b>
<b>Parallel processing in machine vision, Stanley R. Sternberg (U.S.A.)</b>	<b>33</b>
<b>A sealing robot system with visual seam tracking, Susumu Sawano, Junichi Ikeda, Noriyuki Utsumi, Yukio Ohtani, Akira Kirkuchi and Yoshimasa Ito (Japan)</b>	<b>41</b>
<b>Ultrasonic imaging system for robots using an electronic scanning method, Shin-ichi Kuroda, Akio Jitsumori and Takahiko Inari (Japan)</b>	<b>47</b>
<b>Reports and Surveys, B. H. Rudall (U.K.)</b>	<b>55</b>
<b>Announcements</b>	<b>61</b>
