567 Inclined slow acoustic waves incident to stagnation point probes in supersonic flow
T. Schilden & W. Schröder

598 Experimental study of negatively buoyant finite-size particles in a turbulent boundary layer up to dense regimes
L. J. Baker & F. Coletti

630 A variational principle for three-dimensional interactions between water waves and a floating rigid body with interior fluid motion
H. Alemi Ardakani

660 The vortex-entrainment sheet in an inviscid fluid: theory and separation at a sharp edge
A. C. DeVoria & K. Mohseni

S 689 Active and passive in-plane wall fluctuations in turbulent channel flows
T. I. Józsa, E. Balaras, M. Kashtalyan, A. G. L. Borthwick & I. M. Viola

721 Motion of an oil droplet through a capillary with charged surfaces
P. Grassia

S 759 Resolving wave and laminar boundary layer scales for gap resonance problems
H. Wang, H. A. Wolgamot, S. Draper, W. Zhao, P. H. Taylor & L. Cheng

776 Quantifying the non-equilibrium characteristics of heterogeneous gas–solid flow of smooth, inelastic spheres using a computational fluid dynamics–discrete element method
J. Wang, X. Chen, W. Bian, B. Zhao & J. Wang

791 Simulations of the bi-modal wake past three-dimensional blunt bluff bodies
L. Dalla Longa, O. Evstafyeva & A. S. Morgans

810 Proposal of control laws for turbulent skin friction reduction based on resolvent analysis
A. Kawagoe, S. Nakashima, M. Luhar & K. Fukagata

841 Gravity–capillary jet-like surface waves generated by an underwater bubble
Y. J. Kang & Y. Cho

865 General formalism for a reduced description and modelling of momentum and energy transfer in turbulence
A. Cimarelli, A. Abbà & M. Germano

897 Turbulent kinetic energy production and flow structures in flows past smooth and rough walls
P. Orlandi

929 CORRIGENDUM

JFM Rapids (online only)

R1 No net motion for oscillating near-spheres at low Reynolds numbers
K. Lippera, O. Dauchot, S. Michelin & M. Benzaquen

R2 Coalescence dynamics of a compound drop on a deep liquid pool
H. Deka, G. Biswas, K. C. Sahu, Y. Kulkarni & A. Dalal

S R3 Long frontal waves and dynamic scaling in freely evolving equivalent barotropic flow
B. H. Burgess & D. G. Dritschel

R4 Pulsatile flow in a constricted channel: flow behaviour and equilibrium states
J. A. Isler, R. S. Gioria & B. S. Carmo

S indicates supplementary data or movies available online.

866 ISSN 0022-1120
Journal of Fluid Mechanics 10 May 2019

1 Mixing hot and cold with sound
N. Nama

5 Nonlinear spectral model for rotating sheared turbulence
Y. Zhu, C. Cambon, F. S. Godeferd & A. Salhi

S 33 Study of non-isothermal liquid evaporation in synthetic micro-pore structures with hybrid lattice Boltzmann model
F. Qin, L. Del Carro, A. Mazloomi Moqaddam, Q. Kang, T. Brunschwiler, D. Derome & J. Carmeliet

61 Universal evaporation dynamics of ordered arrays of sessile droplets
S. Hatte, K. Pandey, K. Pandey, S. Chakraborty & S. Basu

82 Kinematics and wake of freely falling cylinders at moderate Reynolds numbers
C. Toupoint, P. Ern & V. Roig

112 On standing gravity wave-depression cavity collapse and jetting
D. Krishna Raja, S. P. Das & E. J. Hopfinger

132 Analysis and modelling of Reynolds stresses in turbulent bubbly up-flows from direct numerical simulations
A. du Cluzeau, G. Bois & A. Toutant

169 Vortex axis tracking by iterative propagation (VATIP): a method for analysing three-dimensional turbulent structures
L. Zhu & L. Xi

216 How the turbulent/non-turbulent interface is different from internal turbulence
G. E. Elsinga & C. B. da Silva

239 Low-frequency selectivity in flat-plate boundary layer with elliptic leading edge
B. Wang, X. Mao & T. A. Zaki

Contents continued on inside back cover.

S 263 Bulbous head formation in bidisperse shallow granular flow over an inclined plane
I. F. C. Denissen, T. Weinhart, A. Te Voortwis, S. Luding, J. M. N. T. Gray & A. R. Thornton

298 A theory on the spreading of impacting droplets
J. M. Gordillo, G. Riboux & E. S. Quintero

316 Acoustic oscillations driven by boundary mass exchange
A. Offner, R. Yang, D. Felman, N. Elkayam, Y. Agnon & G. Z. Ramon

350 Interference and transmission of spatiotemporally locally forced internal waves in non-uniform stratifications
R. Supekar & T. Peacock

S 369 Drag force on an accelerating submerged plate
E. J. Grift, N. B. Vijayaragavan, M. J. Tummers & J. Westerweel

399 Transient growth in the near wake region of the flow past a finite span wing
Navrose, V. Brion & L. Jacquin

431 The Basset problem with dynamic slip: slip-induced memory effect and slip–stick transition
A. R. Premlata & H.-H. Wei

450 Direct numerical simulation of open-channel flow over smooth-to-rough and rough-to-smooth step changes
A. Rouhi, D. Chung & N. Hutchins

S 487 The vanishing of strong turbulent fronts in bent pipes
E. Rinaldi, J. Canton & P. Schlatter

503 Large-eddy simulation of turbulent flow over a parametric set of bumps
R. Matai & P. Durbin

526 Conditional statistics and flow structures in turbulent boundary layers buffeted by free-stream disturbances
J. You & T. A. Zaki
