ENTERED AT STATIONERS' HALL

"We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions."—*British Medical Journal*, May 3, 1890.

LISTERINE

*A safe, non-poisonous, unirritating
antiseptic solution*

LISTERINE is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle, or douche, in catarrhal conditions of the nose and throat.

LISTERINE in proper dilution may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

LISTERINE embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents—thyme, eucalyptus, mentha, gaultheria, and ethyl alcohol—a film of boracic and benzoic acids remains upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection.

LISTERINE is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on.

LISTERINE in teaspoonful doses will often afford relief in fermentative dyspepsia, and is largely prescribed, with excellent results, in the various forms of diarrhœa occurring in infants and adults.

LISTERINE literature, including special pamphlets upon *Respiratory Diseases*, may be had, by physicians, upon application to

MAYER & MELTZER,

Surgical Instrument Makers.

“Emandem” Aural Syringe

Devised by
P. FERGUSON, F.R.C.S.Eng.

- The efferent tube fitted into a speculum gives a flat stream of water.
- The outflow from the speculum being greater than the ingoing stream, considerable force may be used without danger.
- The operator has the meatus under inspection while syringing, and can manœuvre to remove any foreign body.
- The smaller nozzle shown in engraving forms a safe syringe to entrust to a patient for self-use.

“Emandem” Improved Metallic Filament Lamp.

(Registered Design.)

Gives a light of intense brilliancy (40–50 c.p.), almost equal to the Nernst Lamp, which is now unobtainable.

Full particulars on application.

MAYER & MELTZER, 71, GT. PORTLAND STREET, LONDON.

And at MELBOURNE, CAPETOWN, JOHANNESBURG.
