What Evangelicals Really Want

**Christian Smith**

"Explodes many of the stereotypes associated with evangelicals. Contrary to the view presented in the media and shared by many liberals, Smith conclusively demonstrates that the typical evangelical is not a political extremist, nor does he or she believe in forcing their world view on others. Instead, most evangelicals share the same cultural values of tolerance and individualism that are common to mainstream America."—Donald E. Miller, author of *Reinventing American Protestantism*

## The Right to Property in Commonwealth Constitutions

**Thomas Allen**

This book examines constitutional rights to property in Commonwealth countries. It concentrates on the central issues of a right to property, such as the meaning of "property," and "adequate" or "fair" compensation. Many judges use comparative law to resolve constitutional cases. However, very few books have been written on comparative law in the Commonwealth. It also examines the historical background in the fundamental principles of the British constitution and the colonial system. The analysis is both practical and theoretical, and it will be useful to academic and practicing lawyers.

## Market Integration, Regionalism and the Global Economy

**Richard E. Baldwin, Daniel Cohen, Andre Sapir, and Anthony J. Venables, Editors**

This is a study of the nature and the policy implications of changes in the global economy in relationship to the process of regional integration, using the newest techniques of economic analysis. The principal message drawn from these analytical and policy insights is that in a world characterized by trade distortions and nonlinearities, regional integration may or may not foster global integration, and may or may not advance regional or global convergence. The key is good economic policy based on sound economic analysis.

## Contested Economic Institutions

The Politics of Macroeconomics and Wage Bargaining in Advanced Democracies

**Torben Iversen**

This book helps explain one of the most intriguing and politically salient puzzles in comparative political economy: why some countries have much higher unemployment rates than others. Contrary to new classical economics the focus is on explaining distribution and equilibrium unemployment, and contrary to neo-corporatist theory the role of monetary policy and rational expectation is integral to the analysis. The book makes two central arguments. The first is that monetary policies affect equilibrium employment whenever wages are set above the firm level. The second argument focuses on the distributive effects of different institutions, and models institutional design as a strategic game between partisan governments and cross-class alliances of unions and employers.

## Normative Theory in International Relations

A Pragmatic Approach

**Molly Cochran**

Molly Cochran offers an account of the development of normative theory in international relations over the past two decades. In particular, she analyzes the tensions between cosmopolitan and communitarian approaches to international ethics, paying attention to differences in their treatments of a concept of the person, the moral standing of states and the scope of moral arguments. The book draws connections between this debate and the tension between foundationalist and antifoundationalist thinking and offers an argument for a pragmatic approach to international ethics.

## Policy-Making and Diversity in Europe

Escape from Deadlock

**Adrienne Héritier**

*Policy-Making and Diversity in Europe* examines the European Union and its policy-making processes. In particular, it asks how an institution that is so riddled with veto points manages to be such an active policy maker. Héritier argues that the diversity of actors' interests and the need for consensus in European institutions would almost inevitably lead to deadlock, were it not for the existence of creative informal strategies and policy-making patterns. Termed by the author "subterfuge," these strategies prevent political impasses and "make Europe work."

Focusing on the United States and Western Europe, it combines theory and empirical data in questioning how and why states have established the exclusive right to authorize and regulate the movement of people.

## Delegating Powers

A Transaction Cost Politics Approach to Policy Making Under Separate Powers

**David Epstein and Sharyn O'Halloran**

In this path-breaking book, David Epstein and Sharyn O'Halloran produce the first unified theory of policy making between the legislative and executive branches. Examining major US policy initiatives from 1947 to 1992, the authors describe the conditions under which the legislature narrowly constrains executive discretion, and when it delegates authority to the bureaucracy. In doing so, the authors synthesize diverse and competitive literatures, from transaction cost and principal-agent theory in economics, to information models developed in both economics and political science, to substantive and theoretical work on legislative organization and on bureaucratic discretion.

## Contesting the Australian Way

States, Markets and Civil Society

**Paul Smyth and Bettina Cass, Editors**

Since the 1980s Australian public policy has been perceived as being in crisis. Many argue that consolidating the market imperative in economic and social policy is the solution. Here, a leading group of writers challenge this view, calling for reassertion of a "mixed" rather than a "market" economy, and for reaffirmation of the egalitarianism that has characterized past Australian social policy. Asking whether economic and social policy can be reintegrated in a shared vision, this groundbreaking book argues the case for reinventing government rather than marginalizing it.

## Security, Identity and Interests

A Sociology of International Relations

**Bill McSweeney**

The study of security has been dominated for four decades by a scientific perspective that has been under attack since the end of the Cold War. In this book, Bill McSweeney discusses the inadequacy of this approach and criticizes the most recent attempts to surmount it. Drawing on contemporary trends in sociology, he develops a theory of the international order within which the idea of security takes on a broader range of meaning, inviting a more interpretative approach to understanding the concept and formulating security policy.

# RUSSIA'S LIBERAL PROJECT

State-Society Relations  
in the  
Transition from Communism

## Russia's Liberal Project

*State-Society Relations in the Transition from Communism*

MARCIA A. WEIGLE

A study of contemporary politics in Russia, assessing the attempted transition from totalitarianism to liberal democracy under Gorbachev and Yeltsin.

"This book is distinctive in the extent to which it integrates the discussion of theoretical literature with the analysis of recent trends in Russian politics, and in the degree to which it covers changes under both Gorbachev and Yeltsin. No other book of which I am aware goes as far in trying to answer the questions of how much a civil society has developed in Russia and how much the emergence of civil society in that country has been matched by the growth of representative political institutions. Professor Weigle's book should achieve favorable recognition among scholars studying Russian and postcommunist politics. The author combines a broad comparative perspective with a perceptive analysis that is sensitive to unique features of the Russian social and political experience."

— Alfred B. Evans Jr., California State University, Fresno

## Retrieving Political Emotion

*Thumos, Aristotle, and Gender*

BARBARA KOZIAK

An effort to resurrect ancient Greek ideas about emotion and show their relevance to modern political philosophy.

"*Retrieving Political Emotion* is a work of remarkable range and insight, a wonderful blend of solid learning and analytic clarity. Koziak's fascinating readings of Greek poetry and philosophy, modern social science, and contemporary feminist critique add up to a powerful case for a new way of thinking about emotions and political life."

—Stephen Salkever, Bryn Mawr

*Retrieving Political Emotion* argues that *thumos* (typically translated as spiritedness, heart, or anger) has been misinterpreted by many scholars, resulting in a failure to understand what role emotion plays in political philosophy. Interpreted as a general capacity for emotion following the lead of Aristotle, *thumos* should contribute to a renovated theory of political emotion and, through connection with the ethics of caring, can enter into the dialogue of current feminist thought.

## Rousseau, Nature, and the Problem of the Good Life

LAURENCE D. COOPER

A new interpretation of Rousseau's thought that focuses on his complex concept of nature as one major key to understanding his legacy to modern political philosophy.

"A freshly original reading of Rousseau without 'doing' anything to him (i.e., distorting or perverting him just to put him in a 'new light'). Among other strengths, this book contains the fullest and most important treatment in the English language of a crucial Rousseauian distinction—that between *amour de soi* and *amour-propre*."

—Patrick Riley, University of Wisconsin, Madison

The rise of modern science created a crisis for Western moral and political philosophy, which had theretofore relied either on Christian theology or Aristotelian natural teleology as guarantors of an objective standard for "the good life." This book examines Rousseau's effort to show how and why, despite this challenge from science (which he himself intensified by equating our subhuman origins with our natural state), nature can remain a standard for human behavior.

## Veto Bargaining

Presidents and the Politics of Negative Power

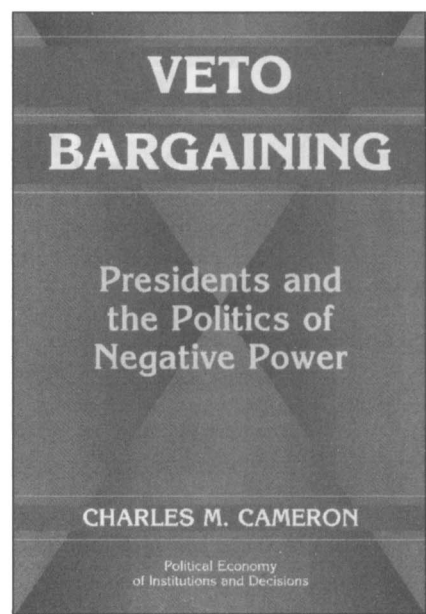

**Charles M. Cameron**

With one party controlling the presidency and the opposing party controlling Congress, the veto has inevitably become a critical tool of presidential power. Combining sophisticated game theory with unprecedented data, this book analyzes how divided party presidents use threats and vetoes to wrest policy concessions from a hostile Congress. Case studies of the most important vetoes in recent history add texture to the analysis, detailing how President Clinton altered the course of Newt Gingrich's Republican Revolution. Offering the first book-length analysis to bring rational choice theory to bear on the presidency, *Veto Bargaining* is a major contribution to our understanding of American politics in an age of divided party government.

## Moral Purity and Persecution in History

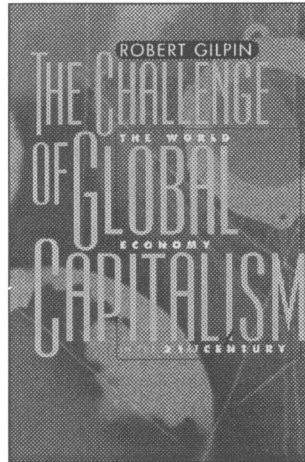

Barrington Moore, Jr.

Barrington Moore's *Social Origins of Dictatorship and Democracy* was a foundational work of historical sociology that influenced a generation of social scientists and, decades later, continues to be widely read and taught. Here Moore takes up the same tools of historical comparison to investigate why groups of people kill and torture each other. His answer is arresting—simple: people persecute those whom they perceive as polluting due to their "impure" religious, political, or economic ideas.

"This is a stimulating, highly original set of essays by a master of comparative historical analysis. . . ."

## The Challenge of Global Capitalism

The World Economy in the 21st Century

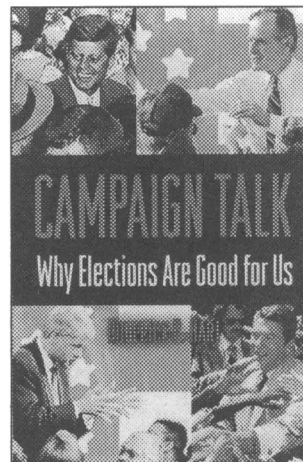

Robert Gilpin

Many individuals proclaim that global capitalism is here to stay. Robert Gilpin urges us, however, not to take an open and integrated global economy for granted. Rather we must consider the political circumstances that have enabled global markets to function and the probability that these conditions will continue.

This is a magisterial inquiry into the contemporary world political economy. Gilpin demonstrates the fragility of a global and integrated economy and recommends what can be done to strengthen it.

## Campaign Talk

Why Elections Are Good for Us

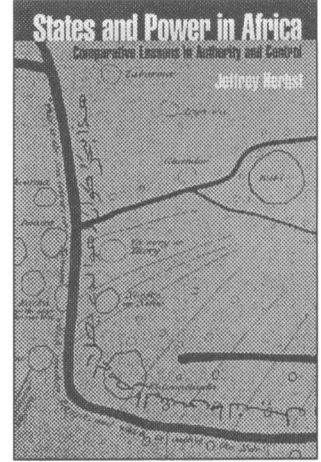

Roderick P. Hart

Roderick Hart may be among the few Americans who believe that what politicians say in a campaign actually matters. He also believes that campaigns work. Hart's wide-ranging, objective investigation upends many of our stereotypes about political life and presents a new understanding of contemporary electoral behavior.

## States and Power in Africa

Comparative Lessons in Authority and Control

Jeffrey Herbst

Theories of international relations, assumed to be universally applicable, have failed to explain the creation of states in Africa. In his groundbreaking book, Jeffrey Herbst places the African state-building process in a truly comparative perspective. Herbst's bold contention—that the conditions now facing African state-builders existed long before European penetration of the continent—is sure to provoke controversy.

## Political Economy in Macroeconomics

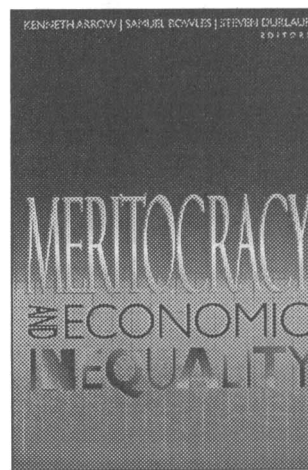

Allan Drazen

Originally, economics was called political economy, and those studying it readily accepted that economic decisions are made in a political world. Recently, an increasing number of economists have turned their attention to the old question of how politics shape economic outcomes. Here, in the first full-length examination of how political forces affect economic policy decisions, Allan Drazen provides a systematic treatment giving definition and structure to the field.

"Allan Drazen is not only a leading practitioner of the art; he is a first-rate expositor. A survey, textbook, and critique all in one, this book informs, teaches, and stimulates. You will not need another book on political economy for some time to come."

Representation in U.S. Senate Delegations

Wendy J. Schiller

Congressional scholars have vastly underappreciated how representation in the U. S. Senate differs from the House of Representatives. *Partners and Rivals* demonstrates how the competitive structure of Senate delegations creates the potential for broad and responsive representation in the Senate. In this provocative new study, Wendy J. Schiller develops a theory of dual representation—where two legislators share the same geographical constituency—to explain Senators' behavior.

## OVER THE WALL

### Protecting Religious Expression in the Public Square

*Frank Guliuzza III*

*Over the Wall* enters the extensive, and often heated, contemporary debates over both religion and politics and the desired relationship between church and state. Author Frank Guliuzza links the process of “secularization” with the Supreme Court’s penchant for “separation,” and argues that should policymakers desire to do something about the former, they need to reevaluate the latter.

## MARX AND ENGELS

### Their Contribution to the Democratic Breakthrough

*August H. Nimitz, Jr.*

“Nimitz has set out to change the way we think about Marx and Engels’s place in history by asking not just what they said and wrote, but how this related to what they actually did, and studying this practical side of their work in detail—something which has been surprisingly neglected. It is an original and timely book. Whether or not one accepts the claim that Marx and Engels played the leading role in the ultimately successful struggle for democracy, contrary to the opposite claim of so many ‘marxologists,’ Nimitz has made a very powerful case for it.” — Colin Leys, coeditor of *The Communist Manifesto Now*; *Socialist Register* 1998

The appearance of this comet caused so many panicked inquiries to be made of Pierre Bayle, one of the Enlightenment’s greatest thinkers, that he decided to formally respond to them, hence the present work, which first appeared in 1682.

# POLITICAL ANALYSIS

Westview Press is pleased to be publishing the new quarterly journal *Political Analysis*

*Political Analysis* is concerned with the entire range of interests and problems centering upon how political inquiry can be conducted: measurement, estimation and specification, and theory development. Any manuscript dealing with this broad set of interests is appropriate for submission to *Political Analysis*. Science implies method, and we cannot have a science of politics without more attention to methodological issues.

# PROCEEDINGS POLITICAL RESEARCH ONLINE

## What is PROceedings?

PROceedings is the online, searchable collection of APSA Annual Meeting papers and abstracts.

The PROceedings project aims to disseminate political science research more broadly and directly, to continue the scholarly exchange of the annual meetings beyond their setting, to encourage the instructional use of research and to facilitate individual and library access to the annual meeting papers.

PROceedings, a collaborative effort of APSA, Harvard University Library, and The College of New Jersey under the direction of William J. Ball, was introduced at the 1997 Annual Meeting and is supported by a grant from the Andrew W. Mellon Foundation.

## How does it work?

All annual meeting paper authors are encouraged to submit their papers to the collection prior to the Annual Meeting. Submission is simple: papers can be submitted online, via email, or on disk. Authors can begin submitting papers in early July.

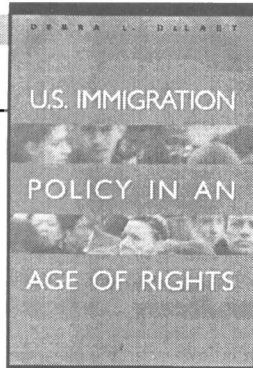

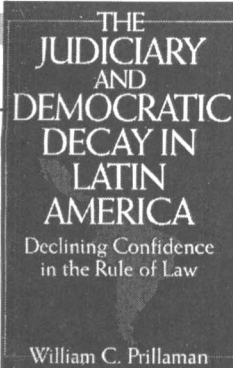

Papers are made available two weeks prior to the annual meeting and remain online for one full year.

Papers can be located through keyword searches or by browsing the APSA Annual Meeting program. The collection features numerous subfields of political science, making it a valuable resource for research and teaching.

More than 1,000 papers from APSA's 1999 Annual Meeting are now online.

<http://pro.harvard.edu>

Annual Meeting paper authors will receive detailed instructions about participating in PROceedings in May 2000. If you have questions about, or suggestions for, PROceedings, please write to [proceedings@apsanet.org](mailto:proceedings@apsanet.org).

## The Judiciary and Democratic Decay in Latin America

*Declining Confidence in the Rule of Law*

By William C. Prillaman

"Dr. Prillaman's study is an important and innovative contribution to our discussion of democratic consolidation in Latin America. This book helps explain why judicial reform has been overlooked in the overall reform agenda and why it must receive a very high priority if we are to avoid an alarming trend toward democratic decay."

"This book presents a new assessment of post-Mao changes, with new insights into many controversial issues in the post-Mao Deng's reform. ## With Malice Toward All?

*The Media and Public Confidence in Democratic Institutions*

By Patricia Moy and Michael Pfau

"Is the decline in public confidence in America's political institutions largely attributable to a cynical news media? Patricia Moy and Michael Pfau's study demonstrates that the question is a complex one that cannot be answered with sweeping generalizations. Not everyone will agree with their conclusions, or even the way that they chose to examine the question, but their book is the best study yet of this important topic. *With Malice Toward All?* should be on the reading list of everyone who seeks a fuller understanding of the news media's role in American public life."

## European Politics into the Twenty-First Century

*Integration and Division*

By Hans Slomp

"In fewer than 300 pages, this book analyses the differences between the U.S. and European political systems according to four dimensions: language-based ethnicity, parliamentary democracy, religion, and social class. Slomp offers no dry exposition but a slicing, even witty, analysis of European politics for an American audience. It is an ideal supplementary text for the introductory course, and I plan to use it."
