

Since 1991, *European Psychiatry* has been the official journal of the Association of European Psychiatrists (AEP).

*European Psychiatry* presents the results of original research relative to those numerous diverse fields currently of interest to psychiatrists: psychopathology, nosography, chemotherapy, psychotherapy, clinical methodology, biological disorders and mental pathology, psychophysiology, neuropsychophysiology, relative to therapeutics, clinical and basic research as well as animal behaviour.

This wide scope is aimed at encouraging the exchange of ideas and research within Europe and establishing within the international

psychiatric community an improved level of scientific communication.

*European Psychiatry* endeavours to publish not only high scientific level original articles, short communications, editorials, and letters to the Editor, but also AEP newsletters, book reviews, information on new regulations in Europe and a conference calendar. Supplements are also devoted to specific symposia.
