

Reading the Isotopic Clocks.

Your research in age determination and stable isotopes requires reliable data and custom service. Teledyne Isotopes has the expertise and experience to meet these requirements.

We have been pioneers in the industry since 1955 and are the only commercial laboratory that offers all major age determination techniques.

These include:

Radiocarbon

Stable isotopes: $^{13}\text{C}/^{12}\text{C}$ • $^{18}\text{O}/^{16}\text{O}$ • H/D
K/Ar • Rb/Sr • U/Pb • Pb/Pb

We can assure you of reliable data because of well-staffed and well-equipped labs, intercalibration with major universities and government facilities, and through use of N.B.S. and international standards.

For the most reliable reading of the isotopic clocks, come to the experts.

Join an Archaeological Expedition

Take your pick - looking for the Origins of Agriculture (Archaic and Early Man) near Las Cruces, New Mexico under the direction of Scotty MacNeish and Stead Upham; investigating the Maya Classic in Belize in a team headed by Leslie Shaw; digging up the Earliest Human Remains (10,000-30,000 years old) in Bolivia under more rugged conditions at Mizque near Cochabamba in conjunction with a field party directed by Donald Brockington. The digs are all exciting and the accompanying laboratory work is intriguing, involving the most up-to-date interdisciplinary techniques that the ANDOVER FOUNDATION FOR ARCHAEOLOGICAL RESEARCH and Scotty MacNeish are best known for!!!

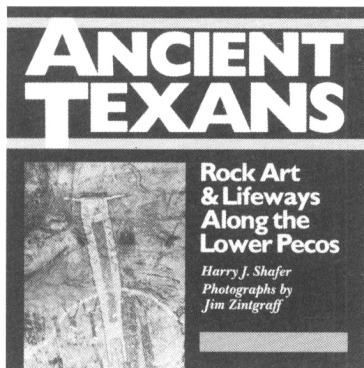

We need

1. Aspiring archaeological professionals (about 20 **students**) to join us for 12 to 14 weeks. Some will make a tax-exempt contribution of \$2000 to the Foundation to cover their room and board. A limited number of students -perhaps 6- may be sponsored by the **PATRONS** of AFAR. Please send in your CVs now for consideration, indicating which field party you want to join and whether you can make a donation or want to be a sponsored student. Successful candidates will be selected 4 months before our respective field seasons begin.

2. **FRIENDS** of the Foundation who may join our expeditions for 2 weeks in New Mexico (\$1000), Belize (\$1200), or Bolivia (\$1500). For \$600 more you may join us for a month. Please send your application with preferred expedition, dates of participations and qualifications as we have scheduling and logistic problems and do not want to disappoint you! In fact, send it **NOW!**

3. **Sponsors** and **Patrons**, to provide for tax-deductible contributions to be used for our general research fund, interdisciplinary research, to pay for (or to be) equipment, to sponsor a student (all or part) and for defraying incidental expenses such as transportation, housing, food, etc. - take your pick, but tell us.

APPLICATIONS AND REQUESTS FOR FURTHER INFORMATION SHOULD BE SENT TO:
Dr. R.S. MacNeish, Box 83, Andover, MA 01810-0083 — Tel: 617-470-0840

\$29.95 cloth
256 pages, 150 illustrations,
24 color photographs

The stark eroded lands and canyons between the lower reaches of the Pecos and Devils rivers have harbored human populations for at least nine thousand years. The canyon dwellers embellished the walls of rock shelters with mysterious, striking, and colorful imagery. World authorities on cave art place Lower Pecos rock paintings among the most important in the Western Hemisphere. *Ancient Texans* is a brilliant work, permitting an intimate, firsthand view.

Mesoamerican Studies

THE SOUTHEAST MAYA PERIPHERY

Edited by PATRICIA A. URBAN and
EDWARD M. SCHORTMAN

A significant study, the first to deal with the Periphery as a coherent unit and the only up-to-date work on the area, with articles addressing such topics as epigraphy and iconology, architecture, site planning, settlement patterns, and ceramics as well as basic information on chronology. For the non-Maya zone, a variety of sites and subregions are explored: the Lower Motagua Valley in Guatemala; the Naco, Sula, and Comayagua valleys and the site of Playa de los Muertos in Honduras; and the Zapotitan Valley and the sites of Cihuatan and Santa Leticia in El Salvador. Heavily illustrated with 55 line drawings, 24 maps, 21 tables, 3 photographs. \$37.50 hardcover

THE LOWLAND MAYA POSTCLASSIC

Edited by ARLEN F. CHASE and
PRUDENCE M. RICE

"A turning point in the study of an area and a time that are crucial to our knowledge of the Maya before and during the conquest."

—GEORGE STUART,
National Geographic Society

The Lowland Maya Postclassic presents an entirely updated picture of Postclassic Maya civilization in the Southern Lowlands. The predominant focus is on the traditional heartland of the Classic Maya, but the areas that border this region are also considered in order to place the Postclassic Maya into a broader context. These studies emphasize the vibrant and changing quality of Postclassic Maya society prior to the onset of Spanish domination. They also exemplify the new research directions and problems that are being investigated within the Maya discipline. \$32.50 hardcover

Prehistoric Adaptation in the American South-West

Rosalind L. Hunter-Anderson

This book offers both a general theoretical framework for interpreting the archaeological record of the American South-West and a persuasive evolutionary model for the shift from a hunter-gatherer economy to horticulture at the Mogollon/Anasazi interface.

New Studies in Archaeology

About \$39.50

Hunters in Transition

Mesolithic Societies of Temperate Eurasia and their Transition to Farming

Marek Zvelebil, Editor

An analysis of the emergence of postglacial hunter-gatherer communities and farming. Drawing on extensive research in eastern Europe and temperate Asia, the book argues persuasively for the essential unity of all postglacial adaptations whether leading to the dispersal of farming or the retention and elaboration of existing hunter-gatherer strategies.

Peruvian Prehistory

Richard W. Keatinge

Offers an authoritative survey of the cultural evolution of Peru from the appearance of the first inhabitants around 10,000 B.C. to the arrival of the Spanish in 1534. It is the first collective assessment of Peruvian archaeology for a generation.

Cloth about \$39.50 Paper about \$11.95

Now in paperback...

Ceramic Theory and Cultural Process

Dean E. Arnold

Drawing on theoretical perspectives of systems theory, cybernetics, and cultural ecology, the author develops cross-cultural generalizations to explain the origins of the craft of pottery making and suggests that these processes are organized into a series of feedback mechanisms which limit or stimulate the initial production of pottery and its transition from a part- to full-time specialized activity.

Peer Polity Interaction and Socio-Political Change

Colin Renfrew, John Cherry, Editors

The common aim of the thirteen contributors to this book is to explain the remarkable formal similarities that exist among institutions, ideologies and material remains in a variety of cultures characterized by independent political centers yet to be brought under the control of a single, unified jurisdiction. A statement of the conceptual approach is followed by ten case studies from a wide varieties of times and places.

ARCHAEOLOGY AND THE FEDERAL GOVERNMENT PUBLICATION SERIES

Vol.1 THE BRIEFING BOOK ON ARCHAEOLOGY ISSUES

The foremost authority on current archaeological issues at the federal level. Current issues cover six broad areas: appropriations, cultural properties/looting, land management, government organization, research and public outreach. Yearly subscription with 10 updates. \$150.

Vol.2 THE POLITICS OF ARCHAEOLOGY

Contains essential information on how the system works, who is spending the money for what and how you can increase your influence and the political power of archaeology in Washington, D.C.
(Revised edition) \$15.00

Vol.3 THE PROCUREMENT OF ARCHAEOLOGY

A primer for those interested in obtaining federal funding. Provides information on procurement laws and proposal preparation, and contains appendix of federal agencies funding archaeology.
(Revised edition) \$15.00

REFERENCE GUIDE - A Supplement to Vols. 2 & 3

Yearly updates on lists of Members of Congress, their staff, committee assignments, major federal agencies funding archaeology and many politically active historic preservation groups. \$20.00

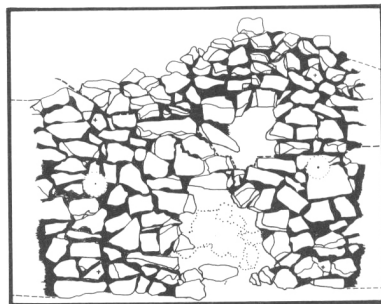

Vol.4 New in the Series!

FEDERAL ARCHAEOLOGY LEGISLATION: A COMPENDIUM

A compilation of federal laws pertaining to archaeology and historic preservation. \$20.00

CLOSE-RANGE TERRESTRIAL • AERIAL ANALYTICAL PHOTOGRAMMETRY for ARCHAEOLOGICAL APPLICATIONS

COMPLETE MEASUREMENT PROJECTS:

Consultation, planning & design • Control • Photography • Contour, planimetric, profile, x-section, area and volumetric data collection • Digital data • Maps & drawings • Training in imagery acquisition • PhD-level staff archaeologist

APPLICATIONS:

Site mapping • Profiles • Erosion, damage, vandalism & stability monitoring • Detailing site features & artifacts • Complete excavation recording • Measurement of fragile/oddly-shaped/ inaccessible features or artifacts • Microscopic artifact analysis • Complete HABS-HAER documentation • Spatial analysis • Predictive modeling • Database generation for statistical analysis

EQUIPMENT & SOFTWARE:

Kern DSR-II Analytical Stereocompiler with digital layering features • HP 24 x 36 drum plotter • Analytical aerotriangulation • Kogo • Close Range Image Set-up package for metric or non-metric imagery • MAPS 300 Interactive Graphics Package • DEC, IBM & HP formats • Disk, tape, modem, or hardcopy outputs.

DISTINGUISHED SERVICE AWARD NOMINATIONS SOLICITED

The Distinguished Service Award established by the Society for American Archaeology is presented annually to a member for specific accomplishments of extraordinary quality. Recognition can be granted in a wide range of areas relating to archaeology including, for example, teaching (academic as well as public education), research (theory, method, application of new technology, analysis, etc.), and conservation of archaeological data (curatorial, legal, managerial), as long as two basic criteria are met. First, the contribution must be truly extraordinary in nature (not expected in the normal course of events) and must be widely recognized as such, and second, it must be of a positive and lasting quality.

The Society is accepting nominations from members for the 1987 Award, which will be presented at its Annual Meeting in May 1987, in Toronto, Ontario. Each recommendation should be supported by a statement documenting concisely and thoroughly the achievements of the nominee. Mail by November 28, 1986, to Dr. Charles L. Redman, Chair, DSA Committee, Department of Anthropology, Arizona State University, Tempe, AZ 85287.
