JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800010771 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

Department of Astronomy, University of Manchester, Manchester M13 9PL, England

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C of the per copy fee of $02.50. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/81/2828–0001 $02.50.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 25 and 26 (1981) is £60.00 net per volume (US $177.00 in the U.S.A. and Canada) for institutions; £30.00 (US $88.50) per volume for individuals. Single parts cost £22.50 each (US $66.50 in the U.S.A. and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y., and at additional mailing offices. *POSTMASTER*: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

CONTENTS TO VOLUME 26

PART 1 AUGUST 1981

Studies of strong laboratory double layers and comparison with computer simulation. K. D. BAKER, N. SINGH, L. P. BLOCK, R. KIST, W. KAMPA and H. THIEMANN *page* 1

The theory of ionizing shock waves in a magnetic field. Part 1. Skew and oblique shock waves, boundary conditions and ionization stability. M. A. LIBERMAN and A. L. VELIKOVICH 29

The theory of ionizing shock waves in a magnetic field. Part 2. Transverse, normal and switch-off shock waves and the piston problem. M. A. LIBERMAN and A. L. VELIKOVICH 55

The effect of electron temperature anisotropy on the propagation of whistler waves. T. NAMIKAWA, H. HAMABATA and K. TANABE 83

Propagation of hydromagnetic waves through a collisionless, heat-conducting plasma. T. NAMIKAWA and H. HAMABATA 95

Spontaneous excitation of magnetic fields and collapse dynamics in a Langmuir plasma. M. KONO, M. M. ŠKORIĆ and D. TER HAAR 123

Influence of relaxation processes on the structure of a thermal boundary layer in partially ionized argon. M. E. H. VAN DONGEN, R. B. VAN P. VAN ECK, H. J. L. HAGEBEUK, A. HIRSCHBERG, A. C. B. HUTTEN-MANSFELD, H. J. JAGER and J. F. H. WILLEMS 147

Eigenmode analysis of resistive MHD stability by matrix shooting. J. P. FREIDBERG and D. W. HEWETT 177

PART 2 OCTOBER 1981

Electrostatic instabilities and anomalous transport excited by an energetic ion beam. E. H. DA JORNADA, J. D. GAFFEY and M. Z. CAPONI 193

Nonlinear interaction of electrostatic surface waves in a semi-infinite plasma. Part 1. Derivation of the coupled mode equations. V. ATANASSOV, E. MATEEV and I. ZHELYAZKOV 217

Nonlinear interaction of electrostatic surface waves in a semi-infinite plasma. Part 2. Time-dependence solutions to the coupled mode equations. V. ATANASSOV, E. MATEEV and I. ZHELYAZKOV 231

The parametric excitation of kinetic Alfvén waves by a magnetic pump. N. F. CRAMER and I. J. DONNELLY 253

https://doi.org/10.1017/S0022377800010771 Published online by Cambridge University Press

A generalized treatment of the electrostatic instability of rippled non-neutral magnetically focused electron beams. S. CUPERMAN and F. PETRAN *page* 267

Effects of toroidal field ripple on supra-thermal ions in tokamak plasmas. R. J. GOLDSTON and H. H. TOWNER 283

Langmuir solitons in a two-temperature plasma. B. BUTI and M. Y. YU 309

Marginal stability and critical thickness of strong double layers. C. WAHLBERG 317

Reciprocity relations between currents and fields in plane-stratified magnetoplasmas. A. SCHATZBERG and C. ALTMANN 333

Resistive instability of interchange mode due to anomalous diffusion. V. P. PAVLENKO and J. WEILAND 345

Feedback stabilization of tokamaks against slow axisymmetric MHD instabilities. T. H. JENSEN 351

Production of plasma vortices by lower-hybrid waves. M. Y. YU, P. K. SHUKLA and H. U. RAHMAN 359

Stability of parallel flow of a multi-component cylindrical plasma to electrostatic perturbations. R. J. LUCAS 369

PART 3 DECEMBER 1981

The plasma wake of mesosonic bodies. Part 2. An experimental parametric study of the mid-wake ion density peak. N. H. STONE 385

Nonlinear electrostatic waves: oblique propagation. R. W. JACKSON 399

Three-wave coupling coefficients for non-uniform plasmas. T. LINDGREN, J. LARSSON and L. STENFLO 407

Nonlinear theta-pinch equilibria. B. ABRAHAM-SHRAUNER 419

Stability of Doublet III plasmas against axisymmetric resistive MHD modes. F. W. McCLAIN and T. H. JENSEN 431

Steady-state solutions for the penetration of a rotating magnetic field into a plasma column. I. R. JONES and W. N. HUGRASS 441

A numerical study of the generation of an azimuthal current in a plasma cylinder using a transverse rotating magnetic field. W. N. HUGRASS and R. C. GRIMM

An experimental investigation of current production by means of rotating magnetic fields. W. N. HUGRASS, I. R. JONES and M. G. R. PHILLIPS 465

https://doi.org/10.1017/S0022377800010771 Published online by Cambridge University Press

Magnetic diffusion and current profiles during current reversal. I. P. Shkarofsky and M. Shoucri *page* 481

Parametric instability of hydromagnetic waves with oblique propagation. K. Yumoto 497

Resonant generation of electromagnetic surface wave by inhomogeneous relativistic electron stream. V. M. Čadež, S. Vuković, V. V. Frolov and A. Yu. Kyrie 509

A quasi-moment description of the evolution of an electron gas towards a state dominated by a reduced transport equation. A. H. Øien 517

Equilibrium and stability of collisionless systems in the paraxial limit. W. A. Newcomb 529

Review

Plasma Physics and Nuclear Fusion Research, edited by R. D. Gill 585
