

IAU Transactions No. XXIXA

Reports on Astronomy: Commission Legacy Reports

IAU Transactions XXIXA reports on the IAU Commissions that were created at the very first IAU General Assembly in Rome in 1922, which were terminated by the Executive Committee during the XXIX General Assembly in Honolulu in 2015. It includes the final Business Meetings of these 'old' Commissions and Working Groups (which historically appeared in the *Transactions of the IAU 'B'* volumes). In addition to these transactions, many of the Commission Presidents have enhanced their contributions with historical perspectives on their Commissions, going back in time a couple of triennia, sometimes longer. This volume, subtitled *Commission Legacy Reports*, is therefore unique in the organisation's history. It signals the end of an era, and the beginning of another, looking ahead to the organisation's 100th anniversary in 2019, whose celebrations will begin at the XXX General Assembly in Vienna, 2018.

Proceedings of the International Astronomical Union
Editor in Chief: Dr. Thierry Montmerle

This series contains the proceedings of major scientific meetings held by the International Astronomical Union. Each volume contains a series of articles on a topic of current interest in astronomy, giving a timely overview of research in the field. With contributions by leading scientists, these books are at a level suitable for research astronomers and graduate students.
