Journal of Child Language

Editor

Heike Behrens, University of Basel, Switzerland

A key publication in the field, *Journal of Child Language* publishes articles on all aspects of the scientific study of language development and behaviour in children, the principles which underlie it, and the theories which may account for it. The international range of authors and breadth of coverage allow the journal to forge links between many different areas of research including psychology, linguistics, cognitive science, speech pathology and anthropology. The interdisciplinary and crosslinguistic perspective spans a wide range of interests: phonology, phonetics, morphology, syntax, vocabulary, semantics, pragmatics, sociolinguistics and other recognised aspects of language study. In addition to articles and brief research reports, the journal also features occasional review articles plus invited commentaries.

Applied Psycholinguistics

Editor

Martha Crago, *Dalhousie University, Canada*

Applied Psycholinguistics publishes original research papers on the psychological processes involved in language. It examines language development and disorders in adults and children with and without developmental disabilities. Articles in *Applied Psycholinguistics* address the nature, acquisition, and impairments of language expression and comprehension, including writing and reading. This journal gathers together the best work from a variety of fields including linguistics, psychology, reading, education, language learning, sociology, speech and hearing, and neurology. In addition, issues include reviews of important new books, problem-oriented reviews of important or emergent areas, discussions of previously published papers, and methodological notes.
