

# JOURNAL OF PLASMA PHYSICS

VOLUME 47

1992

CAMBRIDGE UNIVERSITY PRESS

*Cambridge*

*New York Port Chester Melbourne Sydney*

## INSTRUCTIONS TO AUTHORS

Authors wishing to have papers published in the *JOURNAL* should communicate them to any one of the editorial board, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the *JOURNAL* free of charge, and additional offprints can be purchased if ordered in advance.

**JOURNAL OF  
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,  
Silver Street, Cambridge CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,  
Stanford University, Stanford, California 94305, USA*

PROF. E. INFELD

*Centre for Nonlinear Dynamics and its Applications, University College London,  
Gower Street, London WC1E 6BT*

PROF. P. K. KAW

*Institute for Plasma Research, Bhat, Gandhinagar 382 424, India*

PROF. D. B. MELROSE

*Research Centre for Theoretical Astrophysics, School of Physics,  
The University of Sydney, Sydney NSW 2006, Australia*

PROF. G. J. PERT

*Department of Physics, University of York, Heslington, York YO1 5DD*

DR PADMA K. SHUKLA

*Institut für Theoretische Physik IV, Ruhr-Universität Bochum, D-4630 Bochum 1, Germany*

DR GARY P. ZANK

*Bartol Research Institute, University of Delaware, Newark DE19716-4793, USA*

*Copying*

This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/92 \$5.00 + .00.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

*For all other use*, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and Journals Department, 40 West 20th Street, New York, NY 10011-4211.

Three parts form a volume. The subscription price (which includes postage) of Volumes 47 and 48 (1992) is £130.00 net UK, per volume (US \$249.50 in the USA and Canada) for institutions; £65.00 (US \$180.00) per volume for individuals. Single parts cost £45.00 each (US \$86.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, and Canada to *Journal of Plasma Physics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573-9864.

## CONTENTS TO VOLUME 47

### PART 1 FEBRUARY 1992

Nonlinear electromagnetic waves in an inhomogeneous plasma. G. CICONI	1
Parallel solitary Alfvén waves in warm multi-species beam-plasma systems. F. VERHEEST and B. BUTI	15
Parallel solitary Alfvén waves in warm multi-species beam-plasma systems. Part 2. Anisotropic pressures. F. VERHEEST	25
Solitary Alfvén waves in inhomogeneous streaming plasma. B. BUTI	39
The transformation of plasma equations to normal form in mode conversion theory. B. SABZEVARI	49
Electron-acoustic solitons in a weakly-relativistic plasma. R. L. MACE, M. A. HELLBERG, R. BHARUTHRAM and S. BABOOLAL	61
The Zakharov–Kuznetsov equation for nonlinear ion-acoustic waves. K. MURAWSKI and P. M. EDWIN	75
Evolution of small-amplitude intermediate shocks in a dissipative and dispersive system. C. C. WU and C. F. KENNEL	85
Expansion of a polarized source into an ambient plasma. M. DOBROWOLNY and E. MELCHIONI	111
Time-scales and efficiency of resonant absorption in periodically driven resistive plasmas. S. POEDTS and W. KERNER	139
Relativistic and non-relativistic analysis of whistler-mode waves in a hot anisotropic plasma. S. S. SAZHIN, A. E. SUMNER and N. M. TEMME	163

### PART 2 APRIL 1992

Long nonlinear axisymmetric surface-wave propagation in a magnetic tube. M. S. RUDERMAN	175
On the continuity equation for electrons in microwave-afterglow plasmas. H. I. ABDEL-GAWAD	193
Classical free-electron lasing in an undulating electrostatic field in the axial direction. S. H. KIM	197
Free-electron lasing in the wake field of an elliptical pill-box cavity. S. H. KIM	219

The propagation of a plasma wave with trapped particles in a weakly inhomogeneous plasma. V. L. KRASOVSKY	235
Stabilisation of collisional drift waves by kinetic Alfvén waves. C. KAR, S. K. MAJUMDAR and A. N. S. IYENGAR	249
Poloidal electric field due to electron-cyclotron resonance heating in tokamaks. M. TAGUCHI	261
Effects on electrostatic fields excited by radio-frequency waves in a bounded plasma due to ponderomotive force. C. R. GUTIERREZ-TAPIA	271
Effects of trapped alpha particles on internal kink modes in tokamaks. P. HELANDER and M. LISAK	281
Wave propagation in equal-mass plasmas. G. A. STEWART and E. W. LAING	295
Resonant structures within incompressible ideal MHD. C. ZORZAN and P. S. CALLY	321
PART 3 JUNE 1992	
Toroidal equilibrium of a non-neutral plasma with toroidal current, inertia and pressure. S. N. BHATTACHARYYA and K. AVINASH	349
Kinetic theory for MHD-wave coupling coefficients. R. ELVSÉN	361
On the relaxation of non-thermal plasmas. A. D. MCGOWAN and J. J. SANDERSON	373
Surface-wave-particle interactions in a cylindrical plasma. A. DENGRA and J. BALLESTEROS	389
Nonlinear drift phase-space structures. S. RATH and P. K. KAW	401
The temporal helicon-wave echo in a plasma with steepened density profile. E. A. FEDUTENKO and V. I. LAPSHIN	431
Drift-dissipative instability of the electromagnetic convection mode in a low-temperature plasma. H. SALEEM and M. Y. YU	439
Ion-acoustic wave instability driven by drifting electrons in a generalized Lorentzian distribution. Z. MENG, R. M. THORNE and D. SUMMERS	445
Phase-space description of plasma waves. Part 1. Linear theory. T. BIRO and K. RÖNNMARK	465
Phase-space description of plasma waves. Part 2. Nonlinear theory. K. RÖNNMARK and T. BIRO	479
An inhomogeneous plasma equilibrium: asymptotic self-similar solutions. E. SAIZ, J. GUTIERREZ and Y. CERRATO	491

*Contents*

vii

Relativistic quantum kinetic theory of simulated bremsstrahlung of an axial vacuum mode by an electron beam travelling in a uniform magnetic field. S. H. KIM	505
Effect of finite spectral width on the modulational instability of Alfvén waves. P. C. ROY and J. C. BHAKTA	521
AUTHOR INDEX TO VOLUME 47	533
