### **In the Pipeline for July 2023**

Groups, conics and recurrence relations	<i>A. F. Beardon</i>
The repayment of financial debt: some mathematical considerations	<i>John Stubbs and Jacob Adetunji</i>
How effective is the efficiency gap?	<i>Thomas Q. Sibley</i>
Yet more characterisations of parallelograms	<i>Mowaffaq Hajja and Panagiotis T. Krasopoulos</i>
The lost boarding pass problem: converse results	<i>Shohei Kubo, Toshio Nakata and Naoki Shiraishi</i>
On the circumradius of an integer triangle	<i>Emrys Read</i>
Developing new picture proofs that the sums of the first odd integers are squares	<i>Chris Sangwin and Fenner Stanley Tanswell</i>
A graph related to the Euler $\phi$ function	<i>Nima Ghanbari, Saeid Alikhani</i>
Approximating Lipschitz and continuous functions by polynomials; Jackson's theorem	<i>G. J. O. Jameson</i>
What makes a good maths teacher?	<i>Tony Gardiner, Chris Tew</i>
