Long Lives

Chinese Elderly and the Communist Revolution

Deborah Davis-Friedmann

In this account of the impact of the Communist revolution on China's elderly, Davis-Friedmann examines the social and economic positions of this group from 1949 to 1979. Using a rare combination of sources—Chinese media reports, drama and fiction, and interviews with the elderly and their families—the author reveals Chinese attitudes toward the old, key dimensions of their home and work environments, and the patterns of social exchange with their children and grandchildren.

Comparative Essays on Australia*

Louis Dumont

Dumont is widely recognized as one of a handful of contemporary social theorists whose voices reverberate far beyond the confines of their specialities. The studies collected here, presented together for the first time, show a consistent focus on affinity as a value of equal status with consanguinity in South India. This theme is further explored in two essays on aboriginal Australian societies.

The success secrets of the Japanese.

Six new films to celebrate
The UN World Communications Year for 1983

There is nothing simple about the Japanese. The obvious answers to questions about their current success as a society have all been given.

This series of six LCA films, **The Human Face of Japan**, takes a deeper and more exacting look at a group of Japanese citizens and their families. Filmed in classic documentary style, these films tell you more than you could possibly find out in a short visit to the country.

You spend time involved with a student, a top-level business manager, a factory worker, a budding popular singer, a fisherman, and the people with whom they interact. You see how they spend their working days, and their free time. You learn about their schooling, their ambitions, and their attitudes toward life and country. And just as importantly, you learn what a personal cost they pay to live in this highly productive, carefully structured and fiercely competitive society.

Most of the real answers about the Japanese are in this effective new series from LCA.

Patriarchy and Socialist Revolution in China

In this feminist analysis of the Chinese Communist revolution, Stacey investigates the processes that simultaneously brought the Communists to state power and rebuilt a patriarchal family system. "The best book on the condition of rural Chinese women and the problem of feminism in China during the last fifty years."

Action in Late Ming Thought

The Reorientation of Lu K'un and Other Scholar-Officials

by JOANNA F. HANDLIN

This is the first full-length study of Lu K'un (1536–1618), an outstanding representative of a change in orientation that accompanied commercialization in the countryside and the spread of literacy in China during the late Ming dynasty. In a thematic analysis of Lu's writings, Handlin shows that the reorientation prompted new assumptions about the organization of society and the policies officials ought to pursue. \$28.50

Confucianism and Autocracy

Professional Elites in the Founding of the Ming Dynasty

by JOHN W. DARDESS

Dardess suggests a new way of comprehending Confucianism, taking it as a professional collegial body, distinct from lay society and from the bureaucratic state that employed so many of its members, and he argues that Confucianism does have a relevant sociology peculiar to itself. The understanding advanced here will prove useful in other periods and contexts of Chinese history. \$35.00 hardcover, \$12.50 paperback

Ninety years of scholarly excellence

Modern Japanese Poets and the Nature of Literature

Makoto Ueda. The first comprehensive study of major contemporary Japanese poets in English, this volume has two purposes: to examine the poetic theories of eight poets who are rapidly gaining prominence in world literature and to increase the Western-oriented reader's understanding of their poetry. Their works, ranging from the traditional tanka and haiku through free verse, provide a unique and stimulating introduction to the world of modern Japanese poetry. \$28.50

Flowers in Salt *The Beginnings of Feminist Consciousness in Modern Japan*

Sharon L. Sievers. This book traces the roots of Japanese feminism to women's struggle for individual rights and new political, social, and economic roles in the changing society that followed the Meiji Restoration of 1868. It concentrates on those Japanese women who were outspoken critics of their society and the roles women were assigned in it, but also assesses the contributions women made to Japan during a period of rapid modernization. Haruko's World *A Japanese Farm Woman and Her Community*

Gail Lee Bernstein. This study of farm women's lives in the present era underscores the profound changes that have occurred in Japanese family farming over the last two decades. Its central figure is Haruko, a 42-year-old farm wife who both exemplifies and makes a mockery of the stereotype of Japanese women. Haruko's story provides an intimate account of the work routine, family relationships, and social life of women who have become the virtual mainstay of Japanese agriculture. Illus. \$19.50

The Sacred Edict, by F. W. Baller.

The Sacred Edict, the last great expression of the Neoconfucian ethic, was created by the Emperor K'ang-Hsi. Its 16 maxims were later put into a literary language by his son Yong Ch'eng, and still later into the dialect of the people who, for over 100 years, were called together monthly in every village to hear it read. This facsimile reprint of the Baller edition of 1924 gives the Chinese with English translations. The essence of Kang's wisdom, as understood by the man in the street, is distilled here with dramatic power.
