

## ERRATUM

---

DRURY, S. A. 1986. Remote sensing of geological structure in temperate agricultural terrains. *Geological Magazine* 123, 113–21.

The editors and printers apologize for the transposition of two photographs in this article. The photograph for Figure 7 was printed above the caption for Figure 5, and the photograph for Figure 5 above the caption for Figure 7.

The corrected pages 117–120 have been enclosed at the back of the current issue. They can be inserted in the March issue by gently prising apart the binding between pages 118 and 119, pulling out pages 117–120 and inserting the new pages 117–120. A small amount of glue along the fold would be advisable. The binding will not fall apart with this treatment as the pages are stitched in.
