

Parasitology

Back volumes. Vols. 1–71: Inquiries should be addressed to Wm. Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Vols. 72 onwards: quotations for parts still in print may be obtained from Cambridge or the American Branch of Cambridge University Press.

Copying. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0031–1820/2016 \$16.00.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service. 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Claims for missing issues can only be considered if made immediately after receipt of the subsequent issue.

Advertising. Details of advertising in *Parasitology* may be obtained from the publisher.

Online submission. Authors are encouraged to submit their manuscripts online. Go to <http://mc.manuscriptcentral.com/par/> to open an author's account for *Parasitology*. Manuscript Central is helping to improve the speed of the publication process for the journal.

Front Cover illustration: Flow chart and photograph illustrate the cattle-brucellosis system in Tanzania described in Mafalda et al. (this issue).

PARASITOLOGY

CONTENTS

SPECIAL ISSUE

INVITED CONTRIBUTIONS

Mathematical modelling of infectious diseases

Andy Fenton 801

Models for managing wildlife disease

Hamish McCallum 805

Integrating serological and genetic data to quantify cross-species transmission: brucellosis as a case study

Mafalda Viana, Gabriel M. Shirima, Kunda S. John, Julie Fitzpatrick, Rudovick R. Kazwala, Joram J. Buza, Sarah Cleaveland, Daniel T. Haydon and Jo E. B. Halliday 821

Pertussis immunity and epidemiology: mode and duration of vaccine-induced immunity

F. M. G. Magpantay, M. Domenech de Cellès, P. Rohani and A. A. King 835

Past and future perspectives on mathematical models of tick-borne pathogens

R. A. Norman, A. J. Worton and L. Gilbert 850

Dengue and chikungunya: modelling the expansion of mosquito-borne viruses into naïve populations

Helen J. Wearing, Michael A. Robert and Rebecca C. Christofferson 860

Vector species richness increases haemorrhagic disease prevalence through functional diversity modulating the duration of seasonal transmission

Andrew W. Park, Christopher A. Cleveland, Tad A. Dallas and Joseph L. Corn 874

Body size and meta-community structure: the allometric scaling of parasitic worm communities in their mammalian hosts

Giulio A. de Leo, Andrew P. Dobson and Marino Gatto 880

Integrating immune mechanisms to model nematode worm burden: an example in sheep

Romain Garnier, Bryan T. Grenfell, Alasdair J. Nisbet, Jacqueline B. Matthews and Andrea L. Graham 894

The role of models in translating within-host dynamics to parasite evolution

Megan A. Greischar, Sarah E. Reece and Nicole Mideo 905

The adaptive evolution of virulence: a review of theoretical predictions and empirical tests

Clayton E. Cressler, David V. McLeod, Carly Rozins, Josée van den Hoogen and Troy Day 915
