JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

OCTOBER 1966

VOL. 8 PART 3

OLIVER & BOYD LTD  
EDINBURGH AND LONDON

INFORMATION FOR CONTRIBUTORS TO  
*ANIMAL PRODUCTION*

*Animal Production* publishes papers on original research provided that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made. *Contributions* may be in the field of animal production, or in any related scientific field. Reports on techniques will be published only as appendices to scientific papers. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. *Notes* are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

*Manuscripts* should be typewritten in double spacing with wide margins. Each page and the lines on each page should be numbered. *Two* copies of the typescript (one of illustrations) should be sent to

Dr. Gerald Wiener,  
A.R.C. Animal Breeding Research Organisation,  
West Mains Road, Edinburgh 9.

Manuscripts are not returned with proofs; authors should therefore retain copies.

For guidance to the general style which should be adopted in the writing and presentation of papers authors are referred to *General Notes on the Presentation of Scientific Papers* (2nd revised ed., 1965) published by the Royal Society, London (price 5s.). Points of detail applying particularly to *Animal Production* are given below.

*Illustrations* (figures and plates) should be simple and few, otherwise a charge may have to be made to authors. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board or stout tracing paper. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil. Costs of touching-up diagrams found to be incomplete or unsuitable for line-block reproduction will be charged to authors.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors. Part of their cost may have to be borne by authors.
- (c) Colour plates will not be accepted unless authors bear the cost.

*Tables* should be as simple and as few as possible; if they are very large or numerous a charge may have to be made to authors. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

## COMMONWEALTH BUREAU OF ANIMAL NUTRITION

The chief task of the Bureau is the production of *Nutrition Abstracts and Reviews*. In this quarterly journal, which covers the fields of human and animal nutrition, are published about 10,000 bibliographical references a year, over half of them accompanied by informative abstracts. The information contained in the volumes of *Nutrition Abstracts and Reviews* published since 1951, amounting at present to about 100,000 references, is now coded on punched cards for mechanical retrieval. The Bureau is prepared to answer enquiries and provide bibliographies on specific nutritional topics. In addition, sets of cards to be used in conjunction with the abstracts in the journal may be ordered.
