Information about editors and editorial board members correct as of 17 November 2021. For the latest information please see <https://www.cambridge.org/core/journals/nutrition-research-reviews/information/editorial-board>

Aims & Scope

Nutrition Research Reviews offers a comprehensive overview of nutritional science today. By distilling the latest research and linking it to established practice, the journal consistently delivers the widest range of in-depth articles in the field of nutritional science. It presents up-to-date, critical reviews of key topics in nutrition science advancing new concepts and hypotheses that encourage the exchange of fundamental ideas on nutritional well-being in both humans and animals.

The Nutrition Society

The Nutrition Society was established in 1941 and is dedicated to delivering its mission of advancing the scientific study of nutrition and its application to the maintenance of human and animal health. Highly regarded by the scientific community, the Society is one of the largest learned societies for nutrition in the world.
