OBITUARY.

We regret to record the death of C. E. Jones-Philipson, who practised for many years in Cape Town and who was well known to many of his colleagues in this country, which he visited at frequent intervals. He was always most anxious to keep his knowledge up to date by visiting home and foreign clinics, and his cheerful companionship will be much missed.

Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
