

Subscription rates

Subscription rates for volume **50** (2018) of *Advances in Applied Probability* (AAP) are as follows (post free and online access at <http://cambridge.org/apr>). For libraries and institutions: US\$381.00, £246.00 (online only); US\$418.00, £270.00 (online & print). For individuals, US\$144.00, £92.00 (online & print). The subscription rates for volume **55** (2018) of *Journal of Applied Probability*, the companion publication, are the same; for individual subscribers that order both journals at the same time, the combined price is discounted by 10%. Please send all subscription renewals and enquiries to: subscriptions_newyork@cambridge.org in the Americas and journals@cambridge.org for the Rest of the World.

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as portable document format (PDF) files, not exceeding 1 Mb, to the email address submissions_japaap@sheffield.ac.uk. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/18

Volume 50 **Number 3**

- 671 GIORGIO FERRARI AND SHUZHEN YANG. On an optimal extraction problem with regime switching
- 706 JULIE FOURNIER. Identification and isotropy characterization of deformed random fields through excursion sets
- 726 WISSEM JEDIDI AND STAVROS VAKERLOUDIS. Windings of planar processes, exponential functionals and Asian options
- 743 N. LANCHIER AND S. REED. The role of cooperation in spatially explicit economical systems
- 759 MATTHEW COULSON, ROBERT E. GAUNT AND GESINE REINERT. Compound Poisson approximation of subgraph counts in stochastic block models with multiple edges
- 783 YONGHUI HUANG, ZHAOTONG LIAN AND XIANPING GUO. Risk-sensitive semi-Markov decision processes with general utilities and multiple criteria
- 805 BOHAN CHEN, CHANG-HAN RHEE AND BERT ZWART. Importance sampling of heavy-tailed iterated random functions
- 833 ROMAIN AZAÏS, BERNARD DELYON AND FRANÇOIS PORTIER. Integral estimation based on Markovian design
- 858 ALEXEY MEDVEDEV AND GÁBOR PETE. Speeding up non-Markovian first-passage percolation with a few extra edges
- 887 KRZYSZTOF DĘBICKI AND PENG LIU. Extremes of nonstationary Gaussian fluid queues
- 918 R. I. OLIVEIRA, R. RIBEIRO AND R. SANCHIS. Disparity of clustering coefficients in the Holme–Kim network model
- 944 TANGUY CABANA AND JONATHAN D. TOUBOUL. Large deviations for randomly connected neural networks: I. Spatially extended systems
- 983 TANGUY CABANA AND JONATHAN D. TOUBOUL. Large deviations for randomly connected neural networks: II. State-dependent interactions
- 1005 Correction
