# NATURAL LANGUAGE ENGINEERING

*Edited by*

*Ruslan Mitkov*

*John Tait*

*Branimir K. Boguraev*

VOLUME 23 PART 6 NOVEMBER 2017

**CAMBRIDGE**  
UNIVERSITY PRESS

*Natural Language Engineering* meets the needs of professionals and researchers working in all areas of computerised language processing, whether from the perspective of theoretical or descriptive linguistics, lexicology, computer science or engineering. Its aim is to bridge the gap between traditional computational linguistics research and the implementation of practical applications with potential real-world use. As well as publishing research articles on a broad range of topics - from text analysis, machine translation, information retrieval and speech analysis and generation to integrated systems and multi modal interfaces - it also publishes special issues on specific areas and technologies within these topics, an industry watch column, an emerging trends column and book reviews.
