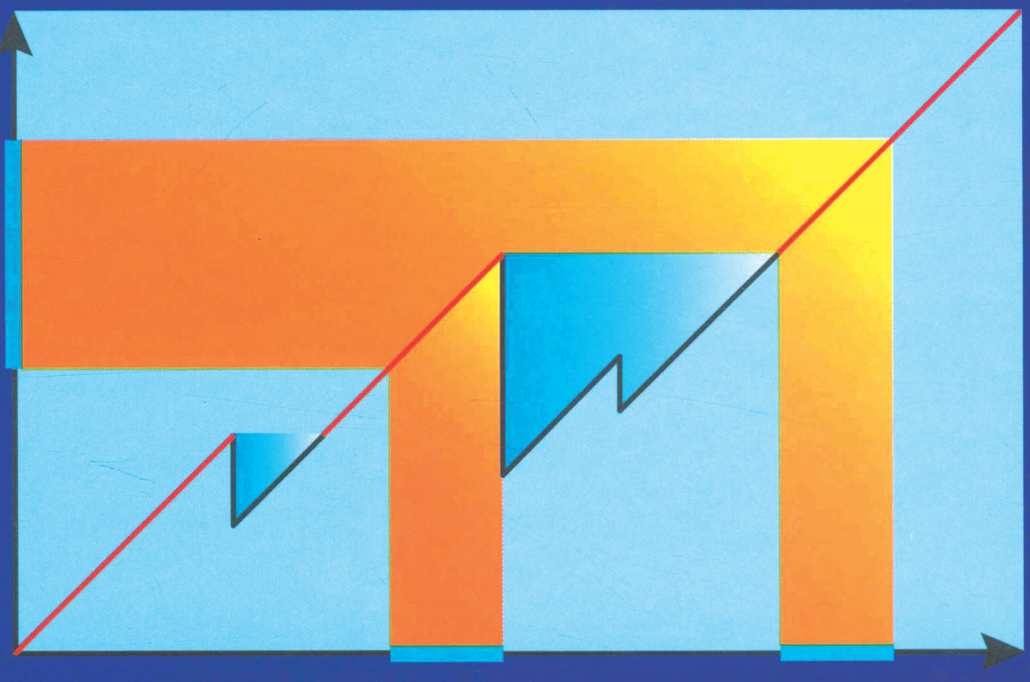
NEW FRONTIERS IN APPLIED PROBABILITY

A Festschrift for
SØREN ASMUSSEN

Edited by
P. GLYNN, T. MIKOSCH and T. ROLSKI



JOURNAL OF APPLIED PROBABILITY
SPECIAL VOLUME 48A (2011)

CONTENTS

Søren Asmussen vii
Publications of Søren Asmussen xi

Part 1. Risk theory

HANSJÖRG ALBRECHER, SEM C. BORST, ONNO J. BOXMA AND JACQUES RESING. Ruin excursions, the G/G/∞ queue, and tax payments in renewal risk models 3

DAMIEN BANKOVSKY, CLAUDIA KLÜPPELBERG AND ROSS MALLER. On the ruin probability of the generalised Ornstein–Uhlenbeck process in the Cramér case . 15

ONNO J. BOXMA, ANDREAS LÖPKER AND DAVID PERRY. Threshold strategies for risk processes and their relation to queueing theory 29

JAN GRANDELL AND HANSPETER SCHMIDLI. Ruin probabilities in a diffusion environment 39

MARTIN JACOBSEN. Exit times for a class of random walks: exact distribution results 51

TOMASZ ROLSKI AND AGATA TOMANEK. Asymptotics of conditional moments of the summand in Poisson compounds 65

Part 2. Lévy processes

TAKIS KONSTANTOPOULOS, ANDREAS E. KYPRIANOU AND PAAVO SALMINEN. On the excursions of reflected local-time processes and stochastic fluid queues 79

ZBIGNIEW PALMOWSKI AND PRZEMYSŁAW ŚWIĄTEK. Loss rate for a general Lévy process with downward periodic barrier 99

JOSH REED AND BERT ZWART. A piecewise linear stochastic differential equation driven by a Lévy process 109

Part 3. Heavy tail phenomena

ANASTASIOS G. BARDOUTSOS AND DIMITRIOS G. KONSTANTINIDES. Characterization of tails through hazard rate and convolution closure properties 123

THOMAS MIKOSCH, ZBYNĚK PAWLAS AND GENNADY SAMORODNITSKY. A large deviation principle for Minkowski sums of heavy-tailed random compact convex sets with finite expectation 133

Part 4. Simulation

JOSE H. BLANCHET AND LEONARDO ROJAS-NANDAYAPA. Efficient simulation of tail probabilities of sums of dependent random variables 147

https://doi.org/10.1017/S0021900200099368 Published online by Cambridge University Press

JOSE H. BLANCHET AND KARL SIGMAN. On exact sampling of stochastic perpetuities 165

JOSHUA C. C. CHAN, PETER W. GLYNN AND DIRK P. KROESE. A comparison of cross-entropy and variance minimization strategies 183

LESTER LIPSKY, DEREK DORAN AND SWAPNA GOKHALE. Checkpointing for the RESTART problem in Markov networks 195

KARL SIGMAN. Exact simulation of the stationary distribution of the FIFO M/G/c queue 209

Part 5. Stochastic growth and branching

ONNO BOXMA, OFFER KELLA AND DAVID PERRY. On some tractable growth-collapse processes with renewal collapse epochs 217

DARYL J. DALEY AND RANDALL J. SWIFT. The size of a major epidemic of a vector-borne disease 235

PETER JAGERS AND FIMA C. KLEBANER. Population-size-dependent, age-structured branching processes linger around their carrying capacity 249

Part 6. Statistics

OLE E. BARNDORFF-NIELSEN AND SVEND ERIK GRAVERSEN. Volatility determination in an ambit process setting 263

MOGENS BLADT, LUZ JUDITH R. ESPARZA AND BO FRIIS NIELSEN. Fisher information and statistical inference for phase-type distributions 277

JENS LEDET JENSEN. Asymptotic normality of M-estimators in nonhomogeneous hidden Markov models 295

Part 7. Queueing theory and Markov processes

SOOHAN AHN AND VAIDYANATHAN RAMASWAMI. Duality results for Markov-modulated fluid flow models 309

PETER W. GLYNN. On exponential limit laws for hitting times of rare sets for Harris chains and processes 319

ALLAN J. MOTYER AND PETER G. TAYLOR. Decay rates for some quasi-birth-and-death processes with phase-dependent transition rates 327

Part 8. Point processes

FRANCOIS BACCELLI AND SERGEY FOSS. Poisson hail on a hot ground 343

PAUL EMBRECHTS, THOMAS LINIGER AND LU LIN. Multivariate Hawkes processes: an application to financial data 367

GÜNTER LAST AND HERMANN THORISSON. What is typical? 379
