

announcing **EXPERIMENTAL AGRICULTURE**

Experimental Agriculture is a journal concerned with the whole range of agricultural problems in developing countries. It aims to provide a link between academic research and agricultural practice. It will publish:

authoritative and up-to-date reviews of new developments in scientific agriculture;

accounts of new experimental techniques, especially those concerned with methods of studying the agricultural environment, the relative merits of new crops, varieties and cultural operations and the application of biometry to field experimentation;

contributions from developing countries on the specific problems of increasing agricultural production, especially where this is at present based on peasant subsistence agriculture;

papers on the more technical and economic aspects of farming systems, especially where these bear on the problems of changing an existing system;

descriptions of successful experiments in extension methods, cooperation, community projects and related topics concerned with the sociological aspects of agricultural improvements.

Experimental Agriculture is a quarterly journal published by Cambridge University Press. It is the successor to *The Empire Journal of Experimental Agriculture*.

The subscription price is £3. 15s. (U.S.A. \$13.50) including postage; single parts are available at £1. 5s. each (U.S.A. \$4.50). Orders may be sent to any bookseller or subscription agent, or direct to Cambridge University Press.

CONTENTS

	PAGE
GORDON, J. G. The relationship between rumination and the amount of roughage eaten by sheep. (With One Text-figure)	151
HAMILTON, HERMAN A. Influence of phosphorus and potassium on forage yields in relation to fertilization and stage of harvest of an oat companion crop	157
HOLLIDAY, R., HARRIS, P. M. and BABA, M. R. Investigations into the mode of action of farmyard manure. I. The influence of soil moisture conditions on the response of maincrop potatoes to farmyard manure. (With One Text-figure)	161
FREE, J. B. The effect on pollen collection of feeding honey-bee colonies with sugar syrup. (With One Text-figure)	167
BLAIR, R. and ENGLISH, P. R. The effect of sex on growth and carcass quality in the bacon pig	169
CASTLE, M. E., REID, D. and HEDDLE, R. G. The effect of varying the date of application of fertilizer nitrogen on the yield and seasonal productivity of grassland. (With Two Text-figures)	177
REID, D. and CASTLE, M. E. The response of grass-clover and pure-grass leys to irrigation and fertilizer nitrogen treatment. I. Irrigation effects. (With Two Text-figures)	185
BROWN, N. J., FOUNTAINE, E. R. and HOLDEN, M. R. The oxygen requirement of crop roots and soils under near field conditions. (With Two Plates and Eight Text-figures)	195
EKPETE, D. M. and CORNFIELD, A. H. Effect of varying static and changing moisture levels during incubation on the mineralization of carbon in soil. (With Two Text-figures)	205
JOHNSTON, MARGARET J. and WAITE, R. Studies in the lignification of grasses. I. Perennial rye-grass (S 24) and cocksfoot (S 37). (With Two Plates and Two Text-figures)	211
BLIGH, J. and LAMPKIN, G. H. A comparison of the deep-body temperature of Hereford and zebu cows recorded continuously by radio-telemetry under similar field conditions. (With Six Text-figures)	221
CUNNINGHAM, R. K. and KARIM, A. Cation-anion relationships in crop nutrition. IV. Maximum contents of cations and anions in Italian rye-grass. (With Two Text-figures)	229
OKORIE, I. I., HILL, D. H. and McILROY, R. J. The productivity and nutritive value of tropical grass/legume pastures rotationally grazed by N'Dama cattle at Ibadan, Nigeria. (With Eight Text-figures)	235
PÁLSSON, H. and VERGÉS, JUAN B. The effect of the plane of nutrition on the shape of the ribs in lambs. (With Three Plates and Two Text-figures)	247
AKKADA, A. R. ABOU and EL-SHAZLY, K. Effect of presence or absence of rumen ciliate protozoa on some blood components, nitrogen retention, and digestibility of food constituents in lambs	251
INNES, N. L. Inheritance of resistance to bacterial blight of cotton. I. Allen (<i>Gossypium hirsutum</i>) derivatives	257
PATTERSON, D. S. P. The association between depot fat mobilization and the presence of xanthopyll in the plasma of normal sheep. (With Two Text-figures)	273
WALKER, D. M. and CAMPBELL, M. K. The development of the digestive system of the young animal. VII. The total and partial apparent digestibility of a pelleted diet by lambs and adult sheep	279
SPEDDING, C. R. W., LARGE, R. V., BROWN, T. H. and WILSON, I. A. N. The use of 'worm-free' sheep in grazing experiments. (With One Text-figure)	283

The Journal of Agricultural Science is issued every other month in parts of about 150 pages with plates and figures, three parts constituting a volume. Two volumes yearly.

Quotations for available back volumes and parts may be obtained on application to the Cambridge University Press.

Papers for publication should be typewritten or written in a very legible hand, and may be sent to Dr G. D. H. BELL, Plant Breeding Institute, Maris Lane, Trumpington, Cambridge, or to the Associate Editors. Other communications should be addressed to the University Press, Cambridge.

If Plates in excess of one per 24 pages of text or coloured plates are submitted the author may be asked to bear the cost of such Plates.

The lettering on text figures should be clear of the illustration and indicating by blue pencilled lines the desired position.

Bibliography should be given in the form of 'References' in the following form:

Surname of authors (in alphabetical order), initials, date of publication (in brackets), title of Journal (abbreviated according to the *World List of Scientific Periodicals*), volume and page of reference. In the text a reference should be quoted by the author's name and date (in brackets).

All names of Journals and books are set in italics; they should be indicated on the typescript by underlining.

Contributors will receive twenty-five copies of their papers free.

The subscription price, payable in advance, is 75s. net per volume (post free); single numbers 32s. 6d. net. Subscriptions may be sent to any bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

Subscription price in the U.S.A. is \$13.50 per volume; single numbers \$5.50. Enquiries should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022.
