

# STUDIES IN SECOND LANGUAGE ACQUISITION

## Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

**Research Article.** These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

**Research Report.** These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Replication Study.** These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

**State-of-the-Scholarship Article.** These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

**Critical Commentary.** These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Methods Forum.** Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

# Studies in Second Language Acquisition

## Volume 46 Number 1 March 2024

---

### ANNOUNCEMENTS

- Announcing the 2024 Susan Gass Award for Impact in SLA* 1–1  
*2023 Valdman Award Acceptance Note* 2–2

### RESEARCH ARTICLES

- Age effects in spoken second language vocabulary attainment beyond the critical period*  
Kazuya Saito 3–27
- Scrutinizing LLAMA D as a measure of implicit learning aptitude*  
Takehiro Iizuka and Robert DeKeyser 28–50
- Can personality predict foreign language classroom emotions? The devil's in the detail*  
Elouise Botes, Jean-Marc Dewaele, Samuel Greiff, and Thomas Goetz 51–74
- The congruency effect in L2 collocational processing: The underlying mechanism and moderating factors*  
Yingzhao Chen 75–95
- How to present L2 Chinese words effectively for learning: Exploring learning outcomes and learner perceptions*  
Xuehong (Stella) He and Shawn Loewen 96–118
- Language proficiency modulates L2 orthographic learning mechanism: Evidence from event-related brain potentials in overt naming*  
Yang Fu, Beatriz Bermúdez-Margaretto, David Beltrán, Wang Huili, and Alberto Dominguez 119–140
- Modeling effects of linguistic complexity on L2 processing effort: The case of eye movement in text reading*  
Xiaopeng Zhang and Nan Gong 141–168
- Measuring the development of lexical richness of L2 Spanish: A longitudinal learner corpus study*  
María Díez-Ortega and Kristopher Kyle 169–199

### RESEARCH REPORTS

- Understanding L2-derived words in context: Is complete receptive morphological knowledge necessary?*  
Batia Laufer 200–213
- On the effects of task focus and processing level on the perception–production link in second-language speech learning*  
Miquel Llompart 214–226

### METHODS FORUM

- Estimating reliability for response-time difference measures: Toward a standardized, model-based approach*  
Bronson Hui and Zhiyi Wu 227–250
- Meta-analysis of second language research with complex research designs*  
Reza Norouzian and Gavin Bui 251–276

### ADDENDUM

- Meta-analysis of second language research with complex research designs – ADDENDUM*  
Reza Norouzian and Gavin Bui 277–277

### METHODS FORUM

- Evaluating evidence for the reliability and validity of lexical diversity indices in L2 oral task responses*  
Kristopher Kyle, Hakyung Sung, Masaki Eguchi, and Fred Zenker 278–299

---
