

# 2009 CAEP / ACMU Scientific Abstracts

## Keyword Index

<b>KEYWORD</b>	<b>ABSTRACT No.</b>			
911	78	bicycle helmet utilization	84	<b>D</b>
<b>A</b>		biphasic allergic reactions	89	D-dimer
ABCD2 rule	24	blood alcohol content	83	death notification
abdominal radiography	60	brain natriuretic peptide (BNP)	81	deep breathing
access block	30	Broselow Tape	76, 113, 126, 141	depersonalization
accuracy	116	burnout	70	diagnostic error
acetaminophen levels	96	<b>C</b>		62, 68, 99, 157
acetaminophen poisoning	55, 65, 96	calcium channel blocker toxicity	79, 132	diagnostic evaluation
acetaminophen toxicity	80	Canadian Emergency Department		117
acetylcysteine	55, 80	Triage and Acuity Scale (CTAS)	25, 30,	155, 160
acute atrial fibrillation	98, 143	85, 124, 150		diagnostic performance
acute atrial flutter	143	cardiac arrest	21, 33	135
acute coronary syndromes	86, 157	cardiopulmonary resuscitation	33	100
acute elevation ST-elevation		cardioversion	98	disaster exercises
myocardial infarction	34	case-control study	68, 151	disaster medicine training
acute myocardial infarction	10	case series	144	90
acute pain	66	casting	19	discharge decisions
administration time	54	chest compression fraction	40	129
administrative database research	97	chest compressions	40	diverticulitis
administrative databases	7, 25, 42, 52,	clinical decision-making	129	160
58, 99, 136, 151		clinical prediction rule	24, 63, 87,	do not resuscitate orders
admission criteria	5, 35		128, 165	142
admission rates	28	clinical research	130, 164	door to antibiotic time
advance directives	142	clinical supervision	93	134, 148
adverse drug related events	48	cognitive forcing strategies	62	drug-related visits
adverse events	7, 105	cohort study	8, 10	48, 75
adverse events reporting	93	Colle's fracture	92	<b>E</b>
adverse outcomes	42	colonization	26, 112	ectopic pregnancy
aeromedical evacuation	144	communication	37	162
agonal breathing	33	community acquired MRSA	26, 145	ED clerkship
air-medical transport	12, 105	community based naloxone		56, 82
allergic reactions	89	programs	104	ED crowding
analgesia	54, 125	community of practice	149	9, 27, 69, 72, 77, 109, 154
anaphylactoid reactions	55	complementary difficult airway		127, 156
anaphylaxis	111	techniques	120	ED discharge
animal model research	95	computerized physician order		159
antibiotic prescribing	128	entry (CPOE)	81, 157	ED pharmacy database
antibiotic susceptibility	17	conducted energy weapon	53, 71, 95	ED staffing
antibiotic utilization	31	COPD	58, 97	29
antipyresis	131	COPD-related relapses	97	education research
assessment tool	36	corneal injuries	136	56, 62, 74
asthma	2, 6, 38, 59, 163	corticosteroids	20, 32	electrocardiogram
asthma relapse	2, 6, 38, 163	CPR training	23	41
audit	161	critically ill patients	91	electronic patient tracking
<b>B</b>		croup	67	130
bicycle helmet legislation	84	CT scan	43, 160	EM Research Associates Program
		curriculum evaluation	118	164
		cutaneous abscesses	145	Emergency Coma Scale
				165
				emergency department
				overcrowding
				114
				emergency department (ED)
				revisits
				103, 140, 101
				emergency medical dispatch
				78
				emergency medical services
				9, 34, 39
				emergency pharmacist
				8
				emergency physician in triage
				69
				emergency physician interpretation
				60
				emergency physician recognition
				75
				Emergency Solutions and Systems
				Capacity Project
				77
				emergency ultrasound

<b>F</b>		long-acting beta agonists	59	patient safety	49, 105
facial injuries	88	low acuity patients	30	patient satisfaction	106, 115, 156
failure mode effects analysis	119	low-fidelity simulation	118	patient severity assessments	124
family members	91			patient simulators	100
FAST	135	<b>M</b>		pediatrics	1, 13, 18, 66, 73, 76, 85, 101, 108, 109, 113, 131, 140
febrile neutropenia	148	management patterns	136	percutaneous coronary intervention	3, 34
fever	140	medical education	94, 133	peritonsillar abscess	20, 31
fever beliefs	131	Medical Interview Satisfaction Scale	106	peritonsillar cellulitis	31
first aid and rescue	102	medical records review	161	pharmacists	75
First Nations people	107, 113	medication errors	8	pharmacoinvasive strategy	3
flow improvement	121	medication utilization	159	pharyngitis	32
flow management	9, 27	mental health	108	physical restraints	64
functional impact	138	methamphetamine intoxication	95	physician assessed risk	86
		Methicillin resistant <i>Staphylococcus aureus</i> (MRSA)	17, 26, 112	physician recognition	48
<b>G</b>		minor chest trauma	57	pneumothorax management	158
gender	51	minor head injury	122	poison control centers	79
gender differences	6	minor thoracic injuries	138	postintubation hypotension	22
geriatrics	39, 142, 153	mnemonic	61	posttraumatic cardiac arrest	73
		mortality	71	practice variation	158
<b>H</b>		mortality prediction	150	prediction rule	41, 45, 57
headache	4	motivation	133	prehospital	73
health care students	164	multifaceted strategies	77	prehospital care	111
health records review	45, 89, 101, 102, 103, 108, 117, 123, 127, 132, 134, 135, 139, 145, 152, 162, 164	<b>N</b>		prehospital identification	123
helicopter EMS	44	n-acetylcysteine	96	prehospital intubation	16
hematoma block	92	narcotic analgesia	54	prehospital transport	153
hemothorax	57	narrative review	146	pre-post evaluation	72
hepatotoxicity	65, 80	needle exchange	104	pre-post study	120
high risk CPR components	119	needs assessment	74	procedural sedation	1
		neuroimaging	4	prophylactic hypothermia	11
<b>I</b>		NICE clinical practice guideline	161	public education	116
impaired drivers	83	nontransportation	39	<b>Q</b>	
implementation science	21	nontraumatic chest pain	51	qualitative research	23, 49, 149, 166
inadequate analgesia	107	non-VT out-of-hospital cardiac arrests	40	quality improvement	148
in-hospital resuscitation	118			quality of care	114
interdisciplinary education	47	<b>O</b>			
International Space Station	146	observation unit	109	<b>R</b>	
internet health care information	116	organizational change culture	121	radiology skills	166
interpretation errors	43	onboard emergencies	146	randomized controlled trial	1, 20, 47, 61, 125
interprofessional education	149	online education	166	randomized trial	18
intimate partner violence	110	Ontario ED waiting time strategy	72	renal colic	155
intraosseus infusion devices	18	OPALS	46	reperfusion therapy	137
intubation	44, 46	opioid dependence	104	residency training	37, 82, 93
intussusception	60	Ottawa Aggressive Protocol	98, 143	resident education	28, 90
Irish children	126	outcomes	51, 59	resident selection	5, 35
		out-of-hospital cardiac arrest	127	restraints	53
<b>J-K</b>		out-of-hospital pediatric cardiac arrest	119	resuscitation	74, 76, 126, 141
just-in-time assistance	78	outpatient management	139	retrospective cohort	54
ketamine	44	<b>P</b>		risk assessment	110
knowledge translation	14, 23, 61, 81	pain management	106	risk factors	38, 52, 68, 162, 163
		parental assessment	85	risk prediction	86
<b>L</b>				rupture	162
left without being seen (LWBS)	7, 42, 69			rural medicine	103, 134, 147, 159
length of stay	25, 28			rural populations	141
long bone fractures	107				

<b>S</b>					
S100B	122	structured interviews	5, 35	treatment delays	137
satisfaction survey	91	study logistics	130	triage	10, 29, 147, 150
Saudi Arabia	154	subarachnoid hemorrhage	4	trauma	12
screening	110, 152	substance abuse	83, 152	<b>U–V</b>	
seasonality patterns	67	sudden in custody death	64	unplanned ED revisits	99, 155
secondary prevention	15	suicide	52	use of force	53, 64, 71
sepsis protocol	14	survey research	70, 79, 84, 87, 115, 121, 124, 138, 153, 154, 155, 156, 158	vaccination	13
septic shock	14	syncope	41, 45	validation	63
serum lactate	50	systematic review	11, 16, 22, 32, 43, 133	Vancouver Chest Pain Rule	63
severe sepsis	123	<b>T</b>		vapocoolant	13
simulation	12, 29, 36, 90, 94	teamwork	47	venipuncture	50
ski helmets	88	therapeutic hypothermia	21	ventricular fibrillation	36
ski patrol	102	TIA	24	verbal numeric scale	66
skiers and snowboarders	88	toddler's fractures	19	videolaryngoscopy	120, 144
skin and soft tissue infections	17, 112	tourniquet	50	vital signs	147
spirometry	2	transient ischemic attack	87, 117	<b>W–Z</b>	
splinting	19	trauma centers	15	waiting room medicine	115
spontaneous pneumothorax	139	traumatic brain injury	11, 16, 46, 165	waiting time strategy	27
ST-elevation myocardial infarction (MI)	3, 137	treatment algorithms	132	Web-based education	94
streptococcal pharyngitis	128			youth violence	15
