# INFECTION CONTROL & HOSPITAL EPIDEMIOLOGY

**The Society for Healthcare Epidemiology of America (SHEA) and the University of Chicago Press are pleased to inaugurate a publishing alliance to bring greater visibility to important research in healthcare epidemiology and infection control. Written by and for infection control practitioners, this peer-reviewed journal will provide you with a monthly forum for all your critical research needs.**

# VAP

IS A TOUGH  
ENEMY.

Are you doing  
all you can to  
ZAP VAP®?

You are when you add the *Mallinckrodt®*  
*Hi-Lo Evac®* endotracheal tube to your  
arsenal of VAP interventions.

Clinical studies show hospitals  
that added the *Hi-Lo Evac* tube  
to existing VAP intervention  
efforts, such as head of the bed  
elevation and regular oral care, real-  
ized **additional** VAP rate reductions up  
to **74 percent**\*. Continuous aspiration  
of subglottic secretions (CASS) with the  
*Hi-Lo Evac* endotracheal tube is clinically  
proven to significantly reduce VAP – a claim  
no other endotracheal tube can make.

Need more proof? Call 1-800-NELLCOR  
or go to [www.ZAPVAP.com](http://www.ZAPVAP.com) to read published  
VAP guidelines and improvement stories  
using the *Hi-Lo Evac* endotracheal tube.
