

PILOT ERROR

A professional study of contributory factors
Edited by RONALD HURST

The emotive phrase *Pilot Error* is now synonymous in the public mind with an instant verdict of guilt against the pilot involved. **PILOT ERROR** illustrates that it is not without cause that pilots reject and despise this verdict. They believe that in far too many cases, acquiescence in "pilot culpability" merely denotes failure to identify other, and perhaps more significant, causes of the accident.

In the pages of this stimulating and provocative book seven key members of the international aviation community examine the professional, legal and medical implications of pilot error.

Foreword by SIR PETER MASEFIELD
Introduction by RONALD HURST
Pilot's View by CAPTAIN PETER BRESSEY
Human Factors by DR MARTIN ALLNUTT
Engineer's View by JOHN ALLEN
Air Traffic Control Factors by PHILIP MARTIN
Management/Pilot Relations by
CAPTAIN ARNE LEIBING
Legal Implications by CAPTAIN NORMAN PRICE

'This book is one of the most important contributions to air safety that has been compiled because it sets out in a more comprehensive way than has been gathered together before the factors which – in the long run – will lead to the elimination of the words "Pilot Error" from any Report.'

From the foreword by SIR PETER MASEFIELD

Publications subscriptions

At its meeting on 24th June 1976, Council approved the revised subscription charges for all the Society's publications, to be effective from 1st January 1977. The new rates, brought in to meet the increasing costs of printing and distribution, are as follows:—

<i>Aerospace</i> (10 issues)	Members	Free
	Non-Members	£6.00

<i>The Aeronautical Journal</i> (12 issues)	Members	£7.50
	Student Members	£5.00
	Non-Members	£36.00

<i>The Aeronautical Quarterly</i> (4 issues)	Members	£6.00
	Non-Members	£16.00

DECCA AVIONICS

Decca Aviation Electronics—the choice of an ever growing number of users.

Decca Doppler Navigation Systems have been installed in 75 different types of rotary and fixed wing aircraft and supplied to 35 different countries.

The TANS Computer/Display is in service in a number of countries and has been ordered by the British Ministry of Defence for a number of aircraft programmes.

The Decca Navigator is used by the Royal Air Force, British

Airways and in a wide variety of fixed and rotary wing civil and military aircraft throughout the world.

Decca Loran is used by the RAF, the USAF and the US Coast Guard.

The MONA area navigation system, certified by the CAA and FAA in the Lockheed TriStar, is now in widespread airline service.

Decca provides a range of airborne VHF Nav/Comm and DME equipment, ordered in quantity by the M.O.D.

Ground equipment includes a CAA approved NDB, ILS and a Doppler/VOR Beacon recently awarded a contract by the Portuguese Directorate General of Civil Aviation. The AN/TRN-26 portable TACAN has been chosen by the Ministry of Defence (RAF).

The Decca range of equipment includes electronic warfare systems, ASMI, radio communications and Omega.

Throughout the world, Aviation relies on Decca for safety and reliability in navigation.
