

## INSTRUCTIONS FOR CONTRIBUTORS

### SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

**Declaration of Interest:** A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

**REFERENCES** (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

**Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC** (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

**Cleckley HJ** (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

**Brewer WJ, Wood SJ, DeLuca C, Pantelis C** (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

*doi (when published online prior to printed issue)*

**Lauritsen MB, Pedersen CB, Mortensen CB** (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

Quantitative techniques for health equity analysis – Technical Notes ([http://siteresources.worldbank.org/INTPAH/Resources/Publications/Quantitative-Techniques/health.eq\\_tn07.pdf](http://siteresources.worldbank.org/INTPAH/Resources/Publications/Quantitative-Techniques/health.eq_tn07.pdf)). Accessed 15 February 2006.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

**FIGURES AND TABLES** Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. **Tables** Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

# PSYCHOLOGICAL MEDICINE

## CONTENTS

### EDITORIAL

#### The place of implementation science in the translational medicine continuum

Thornicroft G, Lempp H & Tansella M 2015

### ORIGINAL ARTICLES

#### Co-morbidity between major depressive disorder and anxiety disorders: shared etiology or direct causation?

Mathew AR, Pettit JW, Lewinsohn PM, Seeley JR & Roberts RE 2023

#### A longitudinal etiologic model for symptoms of anxiety and depression in women

Kendler KS & Gardner CO 2035

#### Co-occurrence of anxiety and depression amongst older adults in low- and middle-income countries: findings from the 10/66 study

Prina AM, Ferri CP, Guerra M, Brayne C & Prince M 2047

#### Factors associated with symptoms of anxiety and depression in five cohorts of community-based older people: the HALCyon (Healthy Ageing across the Life Course) Programme

Gale CR, Aihie Sayer A, Cooper C, Dennison EM, Starr JM, Whalley LJ, Gallacher JE, Ben-Shlomo Y, Kuh D, Hardy R, Craig L, Deary IJ & the HALCyon Study Team 2057

#### Predicting the onset of major depression in primary care: international validation of a risk prediction algorithm from Spain

Bellón JÁ, de Dios Luna J, King M, Moreno-Küstner B, Nazareth I, Montón-Franco C, GildeGómez-Barragán MJ, Sánchez-Celaya M, Díaz-Barreiros MÁ, Vicens C, Cervilla JA, Švab I, Maarros H-I, Xavier M, Geerlings MI, Saldivia S, Gutiérrez B, Motrico E, Martínez-Cañavate MT, Oliván-Blázquez B, Sánchez-Artiaga MS, March S, del Mar Muñoz-García M, Vázquez-Medrano A, Moreno-Peral P & Torres-González F 2075

#### Citalopram plus low-dose pipamperone versus citalopram plus placebo in patients with major depressive disorder: an 8-week, double-blind, randomized study on magnitude and timing of clinical response

Wade AG, Crawford GM, Nemeroff CB, Schatzberg AF, Schlaepfer T, McConnachie A, Haazen L & Buntinx E 2089

#### The nature, frequency and course of psychiatric disorders in the first year after traumatic brain injury: a prospective study

Gould KR, Ponsford JL, Johnston L & Schönberger M 2099

#### A neurocognitive comparison of cognitive flexibility and response inhibition in gamblers with varying degrees of clinical severity

Odlaug BL, Chamberlain SR, Kim SW, Schreiber LRN & Grant JE 2111

#### Do cannabis and urbanicity co-participate in causing psychosis? Evidence from a 10-year follow-up cohort study

Kuepper R, van Os J, Lieb R, Wittchen H-U & Henquet C 2121

#### Symptomatic remission and neurocognitive functioning in patients with schizophrenia

Hofer A, Bodner T, Kaufmann A, Kemmler G, Mattarei U, Pfaffenberger NM, Rettenbacher MA, Trebo E, Yalcin N & Fleischhacker WW 2131

#### Movement disorders are associated with schizotypy in unaffected siblings of patients with non-affective psychosis

Koning JP, Tenback DE, Kahn RS, Vollema MG, Cahn W & van Harten PN 2141

#### Cognitive distortions in an acutely traumatized sample: an investigation of predictive power and neural correlates

Daniels JK, Hegadoren K, Coupland NJ, Rowe BH, Neufeld RWJ & Lanius RA 2149

#### A randomized, double-blind, placebo-controlled trial on the efficacy and tolerability of sertraline in Iranian veterans with post-traumatic stress disorder

Panahi Y, Rezazadeh Moghaddam B, Sahebkar A, Abbasi Nazari M, Beiraghdar F, Karami G & Sadaat AR 2159

#### Noradrenergic-glucocorticoid modulation of emotional memory encoding in the human hippocampus

Kukolja J, Klingmüller D, Maier W, Fink GR & Hurlmann R 2167

#### Olanzapine versus placebo for out-patients with anorexia nervosa

Attia E, Kaplan AS, Walsh BT, Gershkovich M, Yilmaz Z, Musante D & Wang Y 2177

#### Agouti-related protein in patients with acute and weight-restored anorexia nervosa

Merle JV, Haas V, Burghardt R, Döhler N, Schneider N, Lehmkühl U & Ehrlich S 2183

#### In utero exposure to virus infections and the risk of developing anorexia nervosa

Favaro A, Tenconi E, Ceschin L, Zanetti T, Bosello R & Santonastaso P 2193

#### Latent class analysis of co-morbidity in the Adult Psychiatric Morbidity Survey in England 2007: implications for DSM-5 and ICD-11

Weich S, McBride O, Hussey D, Exeter D, Brugha T & McManus S 2201

#### Do adult emotional and behavioural outcomes vary as a function of diverse childhood experiences of the public care system?

Dregan A, Brown J & Armstrong D 2213

#### The influence of immigrant status and concentration on psychiatric disorder in Canada: a multi-level analysis

Menezes NM, Georgiades K & Boyle MH 2221

### BOOK REVIEWS

#### *Migration and Mental Health*

Breslau J 2233

#### *The Brain and Behavior: An Introduction to Behavioral Neuroanatomy, 3rd edn*
