

Concepts in Child Development *from Bradford Books*

CATEGORIZATION AND NAMING IN CHILDREN

Problems of Induction

Ellen Markman

In this landmark work on early conceptual and lexical development, Markman challenges the fundamental assumptions of traditional theories of language acquisition and proposes a new notion of how children acquire categories.

Available 264 pp. \$25.00

LEARNABILITY AND COGNITION

The Acquisition of Argument Structure

Steven Pinker

In tackling a learning paradox that has engaged scholars for more than a decade, Pinker synthesizes a vast literature in linguistics and psycholinguistics and outlines explicit theories of the mental representation, learning, and development of verb meaning and syntax.

August 296 pp. \$29.95

CONCEPTS, KINDS, AND COGNITIVE DEVELOPMENT

Frank C. Keil

Keil provides a coherent account of how concepts and word meanings develop in children. Weaving together issues in cognitive development, philosophy, and cognitive psychology, he reconciles numerous theories, backed by empirical evidence from nominal-kinds studies, natural-kinds studies, and studies of fundamental categorical distinctions.

August 250 pp. \$22.50

THE PSYCHOBIOLOGY OF DOWN SYNDROME

edited by Lynn Nadel

There has been notable progress in understanding the psychobiological concomitants of Down syndrome. This book covers recent research with its neurobiological and cognitive features and numerous vital topics.

Available 300 pp. \$35.00

International Journal of Behavioral Development

Official Journal of the International Society for the Study of Behavioral Development

Editor: Harry McGurk, University of Surrey, UK

Associate Editors: Margret Baltes, *Freie Universität Berlin, FRG*, Michael Chandler, *University of British Columbia, Canada*, Pierre Dasen, *Université de Genève, Switzerland*, Richard Lerner, *Pennsylvania State University, USA*, Doreen Rosenthal, *University of Melbourne, Australia*.

Exists to promote the discovery, dissemination and application of knowledge about developmental processes at all stages of the lifespan - infancy, childhood, adolescence, adulthood and old age. Established in 1978, the journal is a foremost international publication devoted to reporting interdisciplinary research, theoretical reviews, book reviews and other items of scientific communication. Commensurate with its international status, the journal publishes occasional state-of-the-art papers on behavior development research within particular geographical regions.

Special Issues

1988 - Development Disability in Lifespan Context, guest editors **David Wood, University of Nottingham** and **Bernard Tervoort, University of Amsterdam**.

NOTES FOR CONTRIBUTORS

Papers, notes and reviews should be sent to Dr A. Cruttenden, Department of Linguistics, University of Manchester, Manchester, M13 9PL, UK. They should normally be written in English. Major articles should not exceed twenty printed pages.

Three copies of the typescript should be submitted, and of any revisions or resubmissions. Contributions should be clearly typed with double spacing, on one side of the paper only, using a conventional size of paper, preferably A4 (or 21.6 by 28 cm). Authors should hold one copy for correction of proofs. Footnotes should not be used unless absolutely necessary, and should be listed on a separate sheet (double-spaced) at the end of the article. Tables and figures should be drawn on separate pages at the end of the article. Each table/figure should have a title, and there should be an indication in the body of the text as to placement. Tables and figures should each be numbered independently of examples of utterances. A separate title-page should include the title, author's name and affiliation, together with an asterisked footnote which should include acknowledgements and an address for correspondence. Titles should be so worded that part may be used as a running headline (with a maximum length of 40 characters, including spaces). An abstract of the article, giving aims, general method, and principal conclusions, should be typed on a separate sheet (max. 120 words for articles and 60 words for notes).

Chronological age should be stated in years, months and (where needed) days as follows; 4;5.17. Cited forms should be underlined to represent italicization in print. Translational 'meanings' should be placed within single quotation marks. Emphasis or technical terms should be marked by the use of small capitals. Phonetic transcriptions should, wherever possible, employ the symbols and conventions of the IPA; they must never be used in footnotes, and should in no case be narrower than absolutely necessary for the purpose.

References are to be made in the text thus; (Neisser 1967: 222). If the author's name is part of the text, the following form should be used; 'Piaget (1967: 131) investigates...'. When a work written by three or more authors is referred to, all names should be given in the first citation, with an ampersand linking the last two, e.g. (Fraser, Bellugi & Brown 1963); in subsequent citations the first name only should be given, with '*et al.*' added. A group of references within the text should be date-ordered.

All works referred to should be listed at the end of the article, double-spaced and in alphabetical order. The titles of journals should be given in full. Examples of references (note the use of punctuation marks) are:

- Brown, R. (1973). *A first language: the early stages*. Cambridge MA: Harvard University Press.
- Crystal, D. (1986). Prosodic development. In P. Fletcher & M. Garman (eds), *Language acquisition: studies in first language development*. Second edition. Cambridge: C.U.P.
- Clark, R. (1974). Performing without competence. *Journal of Child Language* 1. 1-10.
- Ferguson, C. A. & Slobin, D. I. (eds) (1973). *Studies of child language development*. New York: Holt, Rinehart & Winston.

With the exception of the title-page, book reviews should be submitted in the same form as articles. (Three copies should be sent.) The heading should be in the following form:

M. BOWERMAN, *Early syntactic development: a cross-linguistic study with special reference to Finnish*. Cambridge: C.U.P., 1973. Pp. xii + 302.

and the ending as follows:
