HEINEMANN AFRICAN STUDIES

AFRICAN ECONOMIC HISTORY

Internal Development & External Dependency

Ralph Austen

Professor Austen provides the first comprehensive study of Africa's economic history. The analysis in this book draws on over two thousand years; it begins with the origins of domesticated food production and concludes in the third decade after the attainment of political independence from colonial rule. The study deals with all of black Africa, but emphasizes the regions south of the Sahara and west of the Nile Valley.

The author applies various theoretical perspectives to the two themes of internal development and external dependency. In particular, the blend of market and structural analysis constitutes a major contribution to the on-going debate over the understanding of economic change not only in Africa but in the Third World generally.

BANDITRY, REBELLION AND SOCIAL PROTEST IN AFRICA

Edited by Donald Crummey

This book marks a new stage in African resistance studies. Previous work has tended to place the subject exclusively within an anti-colonial context. This collection broadens the concept to include crime and violence and refines it to exclude much of what up to now has been termed 'resistance'.

The substantial introduction by Donald Crummey is a summation of past research and a corrective of where work has gone wrong. It provides a strong message for future research in the area of violence, crime, and rebellion. He—and his contributors—have a respect for past studies of the best type but open up new areas to scrutiny.

'This collection is a major addition to any African Studies library.'—*CHOICE*

The New Black Middle Class

BART LANDRY

Landry contributes significantly to the study of black American life and its social stratification, with sensible analyses of class models; to the study of social mobility; and above all to the study of the American middle class, both black and white, and its economic, social, and daily household life. \$22.50

Legitimizing the Illegitimate

State, Markets, and Resistance in South Africa

STANLEY P. GREENBERG

Greenberg provides a rare glimpse into the actual workings of the South African state, the thinking of officials attempting to manage the movement and lives of the African majority, and the breakdown of state control under African resistance and market pressures.

Warriors, Merchants, and Slaves

**THE STATE AND THE ECONOMY IN THE
MIDDLE NIGER VALLEY, 1700–1914**

Richard L. Roberts. Over two centuries, the region of the Middle Niger valley of the Western Sudan was dominated by three successive states: the indigenous Segu Bambara, the Islamic Umerian, and the French colonial. In each state, warriors were the rulers and the survival of the state depended on an ability to reproduce its capacity to make war; in order to do so, the warrior state intervened in the economy. The interrelationship of warfare, the state, and the economy produced different results in the three states, expanding and contracting in response to an ability to provide conditions favorable to commercial development, capital accumulation, and investment. How each state actually intervened in the economy and influenced its structure and performance is the subject of this book. \$37.50
