

Acta Numerica 1994

CONTENTS

Formalization and computational aspects of image analysis

Luis Alvarez and Jean Michel Morel

Domain decomposition algorithms

Tony F. Chan and Tarek P. Mathew

Aspects of the numerical analysis of neural networks

S. W. Ellacott

A review of pseudospectral methods for solving partial differential equations

Bengt Fornberg and David M. Sloan

Exact and approximate controllability for distributed parameter systems

R. Glowinski and J. L. Lions

On the numerical evaluation of electrostatic fields in composite materials

Lesli Greengard and Monique Moura

Numerical geometry of surfaces

Malcolm Sabin

Numerical analysis of dynamical systems

Andrew Stuart

Acta Numerica is an annual publication containing invited survey papers by leading researchers in a number of areas. The papers present overviews of recent developments in their area and provide 'state of the art' techniques and analysis.
