ERRATUM

In the paper 'Measurement of clay surface areas by polyvinylpyrrolidone (PVP) sorption and its use for quantifying illite and smectite abundance' from *Clays and Clay Minerals*, vol. **52**, 2004, 589−602, equation 3 should read:

$$SA^*_{\text{sample}} \left[\frac{\text{m}^2}{\text{g}} \right] = \frac{\text{mass of PVP uptake [g/g]}}{0.99 [\text{mg/m}^2]} \tag{3}$$

with the units of the denominator on the right side reading mg/m^2 rather than g/m^2 as in the original text.
