

# It shouldn't take much **research** to discover the finest resources in **Neuroscience**.

## SENIOR MEDICAL ADVISOR (CLINICAL PSYCHIATRY)

At SmithKline Beecham, Neurosciences Research makes a vital contribution to our ongoing drive to remain a global leader in the development of healthcare management. We have committed significant resources to pioneering new drugs that meet a variety of psychiatric needs including schizophrenia, depression, anxiety and dementia.

Our Neurosciences Therapeutic Unit is currently seeking a general Psychiatrist with at least 2 years' research experience to provide strategic medical input into our current psychiatry portfolio. It's a broad remit that extends from examining protocols and monitoring the safety of compounds to advising key opinion leaders and regulatory agencies. Using your research background and interest in neuropsychopharmacology, you will be well equipped to interact with the discovery scientists. The majority of your time will be spent concentrating on Phase II and III programmes, although you will be involved in extensive post-marketing studies of our anti-depression drug Seroxat - one of the market-leading products - giving you exposure to the commercial side of our business and the ability to use your excellent presentation skills.

You'll be joining a department known for its pioneering work in CNS research. As part of our determination to retain this

competitive edge, our scientists are encouraged to nurture their contacts within the medical community. Working at the New Frontiers Science Park in Harlow, where the Unit is based, you will enjoy access to extensive resources and benefit from our strong links with the nearby Addenbrooke's Hospital in Cambridge.

We offer a competitive salary together with a generous range of benefits including bonus, car, share options and relocation assistance where appropriate.

So if you'd like to develop your career in an environment where there is a fundamental and substantial commitment to research, please send your CV, quoting ref: NB/CLX/058/L, to the Recruiting Manager, SmithKline Beecham Pharmaceuticals, c/o A.E.P., Suite 6, Silk Mill House, 21 Marsh Parade, Newcastle-Under-Lyme, Staffordshire ST5 1BT.

For informal enquiries please contact Dr. Raj Kumar, Head of Psychiatry, on +44 (0) 1279 644713. Closing date for applications: 23rd May 1998.

For more information on SmithKline Beecham visit our website at [www.sb.com](http://www.sb.com)

It is part of our fundamental philosophy at SmithKline Beecham that we recruit, train, develop, reward and promote persons in all job areas solely on the basis of qualifications, skills, abilities and aptitudes. Decisions based on race, colour, age, religion, sex, sexual orientation, disability, ethnicity or national origin are unacceptable to the Company.
