# TEE Clean<sup>®</sup>

AUTOMATED TEE PROBE CLEANER DISINFECTOR

## Complete Probe Reprocessing to Protect Patient • TEE Probe • Technician

- Validated Cleaning Process
- Validated High-Level Disinfection Process
- No MRC Efficacy Testing
- Filtered Rinse water — 5 Nanometer
- Advanced Vapor Management
- Electrical Leakage Testing
- Retains 15,000 Records In System Memory

## CONTENTS

### Original Articles

- 507** Use of a comprehensive program to review religious and personal seasonal influenza vaccination exemption requests by healthcare personnel  
*Benjamin C. Boone, Rochelle T. Johnson, Lori A. Rolando and Thomas R. Talbot*
- 513** Expanding mandatory healthcare personnel immunization beyond influenza: Impact of a broad immunization program with enhanced accountability  
*Thomas R. Talbot, Ruth Schimmel, Melanie D. Swift, Lori A. Rolando, Rochelle T. Johnson, Jannis Muscato, Paul Sternberg, Marilyn Dubree, Paula W. McGown, Mary I. Yarbrough and Gerald B. Hickson*
- 519** Pediatric research priorities in healthcare-associated infections and antimicrobial stewardship  
*Susan E. Coffin, Francisca Abanyie, Kristina Bryant, Joseph Cantey, Anthony Fiore, Stephanie Fritz, Judith Guzman-Cottrill, Adam L. Hersh, W. Charles Huskins, Larry K. Kociolek, Matthew Kronman, Ebbing Lautenbach, Grace Lee, Matthew Linam, Latania K. Logan, Aaron Milstone, Jason Newland, A. Christine Nyquist, Debra L. Palazzi, Sameer Patel, Karen Puopolo, Sujan C. Reddy, Lisa Saiman, Thomas Sandora, Andi L. Shane, Michael Smith, Pranita D. Tamma, Theoklis Zaoutis, Danielle Zerr and Jeffrey S. Gerber for the CDC Prevention Epicenters Program*
- 523** Antibiotic use during end-of-life care: A systematic literature review and meta-analysis  
*Alexandre R. Marra, Mireia Puig-Asensio, Erin Balkenende, Daniel J. Livorsi, Michihiko Goto and Eli N. Perencevich*
- 530** The impact of antibiotic allergy labels on antibiotic exposure, clinical outcomes, and healthcare costs: A systematic review  
*Nathan M. Krahn, Trahern W. Jones, Joanita Lake and Adam L. Hersh*
- 549** Evaluation of Connecticut medical providers' concordance with 2017 IDSA/SHEA *Clostridioides difficile* treatment guidelines in New Haven County, 2018–2019  
*Casey Morgan Luc, Danyel Olson, David B. Banach, Paula Clogher and James Hadler*
- 557** The use of laboratory-identified event surveillance to classify adverse outcomes due to *Clostridioides difficile* infection in Canadian long-term care facilities  
*Ye Shen, Jennifer Ellison, Jenine Leal, Kathryn R. Bush, A. Uma Chandran, Sumana Fathima and John M. Conly*
- 565** Risk factors for *Clostridioides difficile* colonization among hospitalized adults: A meta-analysis and systematic review  
*Scott Anjewierden, Zheyi Han, Adam M. Brown, Curtis J. Donskey and Abhishek Deshpande*

- 573** Pilot study of a combined genomic and epidemiologic surveillance program for hospital-acquired multidrug-resistant pathogens across multiple hospital networks in Australia  
*Norelle L. Sherry, Robyn S. Lee, Claire L. Gorrie, Jason C. Kwong, Rhonda L. Stuart, Tony M. Korman, Caroline Marshall, Charlie Higgs, Hiu Tat Chan, Maryza Graham, Paul D.R. Johnson, Marcel J. Leroi, Caroline Reed, Michael J. Richards, Monica A. Slavin, Leon J. Worth, Benjamin P. Howden and M. Lindsay Grayson on behalf of the Controlling Superbugs Study Group*
- 582** Risk factors for person-to-person transmission of severe fever with thrombocytopenia syndrome  
*Chao Ye and Rui Qi*
- 586** Comparison of diagnosis and prescribing practices between virtual visits and office visits for adults diagnosed with uncomplicated urinary tract infections within a primary care network  
*Kaitlyn L. Johnson, Lisa E. Dumkow, Lisa A. Salvati, Kristen M. Johnson, Megan A. Yee and Nnaemeka E. Egwuatu*

### Commentaries

- 592** Routine surveillance of asymptomatic healthcare personnel for severe acute respiratory coronavirus virus 2 (SARS-CoV-2): Not a prevention strategy  
*Erica S. Shenoy and David J. Weber*
- 598** Sum of the parts: Ensuring a resilient global drug supply chain  
*Katie J. Suda and Mina Tadrous*

### Concise Communications

- 600** Assessing severe acute respiratory coronavirus virus 2 (SARS-CoV-2) preparedness in US community hospitals: A forgotten entity  
*Sonali D. Advani, Esther Baker, Andrea Cromer, Brittain Wood, Kathryn L. Crawford, Linda Crane, Linda Adcock, Linda Roach, Polly Padgett, Deverick J. Anderson and Daniel J. Sexton, for the CDC Prevention Epicenter Program*
- 604** Prevalence of SARS-CoV-2 antibodies among Swiss hospital workers: Results of a prospective cohort study  
*Philipp P. Kohler, Christian R. Kahlert, Johannes Sumer, Domenica Flury, Sabine Güssewell, Onicio B. Leal-Neto, Julia Notter, Werner C. Albrich, Baharak Babouee Flury, Allison McGeer, Stefan Kuster, Lorenz Risch, Matthias Schlegel and Pietro Vernazza*
- 609** Implementation of infectious diseases rapid molecular diagnostic tests and antimicrobial stewardship program involvement in acute-care hospitals  
*Maiko Kondo, Matthew S. Simon, Lars F. Westblade, Stephen G. Jenkins, N. Esther Babady, Angela S. Loo and David P. Calfee on behalf of the SHEA Research Network*
- 612** Unnecessary antibiotic prescribing in pediatric ambulatory care visits for bronchitis and bronchiolitis in the United States, 2006–2015  
*Rachel L. Snyder, Laura M. King, Adam L. Hersh and Katherine E. Fleming-Dutra*

**616** India Antimicrobial Stewardship and Resistance (INTEREST) 2018: A needs assessment survey  
*Aditya Shah, Prakhar Vijayvargiya, John C. O'Horo, Varun Shah, Sanjiv Shah, Taru Dutt, Vikas Bansal and Rahul Kashyap*

**619** Effect of an external urinary collection device for women on institutional catheter utilization and catheter-associated urinary tract infections  
*Lindsey Rearigh, Gayle Gillett, Adrienne Sy, Terry Micheels, Luana Evans, Kelly Goetschkes, Trevor C. Van Schooneveld, Elizabeth Lyden and Mark E. Rupp*

**622** *Clostridioides difficile* infection and antibiotic prescription rates in the community: Explaining the gender gap  
*Mariam Younas, Julie Royer, Sharon B. Weissman, Hana R. Winders, Sangita Dash, P. Brandon Bookstaver, Julie Ann Justo, Katie S. Waites, Linda Bell and Majdi N. Al-Hasan*

### Research Brief

**625** Mass severe acute respiratory coronavirus 2 (SARS-CoV-2) testing of asymptomatic healthcare personnel  
*Scott C. Roberts, David R. Peaper, Craig D. Thorne, L. Scott Sussman, Thomas S. Murray, Steven J. Choi, Christian M. Pettker, Mark B. Russi and Richard A. Martinello*

**627** Surgical mask covering of N95 filtering facepiece respirators: The risk of increased leakage  
*Jeffrey T. Mueller, Soroor Karimi, Karl A. Poterack, Maria Teresa A. Seville and Steven M. Tipton*

**628** Use and perceptions of antibiotics among US adults aged 50–80 years  
*Preeti Malani, Erica Solway, Matthias Kirch, Dianne C. Singer and Jeffrey T. Kullgren*

### Letters to the Editor

**630** A safe and efficient, naturally ventilated structure for COVID-19 surge capacity in Singapore  
*Natasha Bagdasarian, Ian Mathews, Alexander J. Y. Ng, Eugene H. Liu, Clara Sin, Malcolm Mahadevan and Dale A. Fisher*

**632** Reshaping neonatal intensive care units (NICUs) to avoid the spread of severe acute respiratory coronavirus virus 2 (SARS-CoV-2) to high-risk infants  
*Domenico Umberto De Rose, Cinzia Auriti, Francesca Landolfo, Irma Capolupo, Guglielmo Salvatori, Stefania Ranno, Carlo Concato, Annabella Braguglia, Pietro Bagolan and Andrea Dotta*

**634** Interventions for healthcare professionals caring for COVID-19 patients (beyond vaccines): A systematic review  
*Barbara Russo and Michele Iudici*

**636** Stewardship of personal protective equipment (PPE): An important pandemic resource for PPE preservation and education  
*Ami B. Patel, Anna O'Donnell, Amanda Bonebrake, Matthew McHugh, Katrina Espiritu, Molly Steele, Maria Bovee, Robert Jones, Karen Richey, Genevieve Frey, Kathleen English, Jade Tucker and Larry K. Kociolek*

**637** Coronavirus disease 2019 (COVID-19) among healthcare workers: A call for a low-threshold in-hospital screening  
*Hytham K. S. Hamid*

- 638** The prevalence of severe acute respiratory coronavirus virus 2 (SARS-CoV-2) IgG antibodies in intensive care unit (ICU) healthcare personnel (HCP) and its implications—a single-center, prospective, pilot study  
*Mohsin Sheraz Mughal, Ikwinder Preet Kaur, Chandler D. Patton, Nagy H. Mikhail, Chairut Vareechon and Kenneth M. Granet*
- 639** A framework for nosocomial transmission of emerging coronaviruses  
*Seth D. Judson and Vincent J. Munster*
- 641** Adverse effects of nasopharyngeal swabs: Three-dimensional printed versus commercial swabs  
*Kalpana Gupta, Pamela M. Bellino and Michael E. Charness*
- 642** Pediatric antimicrobial stewardship in the COVID-19 outbreak  
*Eneritz Velasco-Arnaiz, Maria Goretti López-Ramos, Silvia Simó-Nebot, Iolanda Jordan, María Ríos-Barnés, Mireia Urrea-Ayala, Manuel Monsonís, Clàudia Fortuny and Antoni Noguera-Julian on behalf of the Kids Corona project*
- 645** Antimicrobial stewardship interventions to minimize healthcare worker exposure to SARS-CoV-2  
*K. Ashley Jones, Matthew Watson, Jesse T. Jacob and Zanthia Wiley*
- 646** Examining the need for eye protection for coronavirus disease 2019 (COVID-19) prevention in the community  
*Alexandre R. Marra, Michael B. Edmond, Saskia V. Popescu and Eli N. Perencevich*
- 647** Limited impact of selective susceptibility reporting of *Escherichia coli* and *Klebsiella* isolates from concurrent blood and urine cultures  
*Brenton C. Hall, Julie S. Alexander, Shelby S. Anderson, Jessica K. Ortwine, Norman S. Mang, Wenjing Wei, Linda S. Hynan and Bonnie C. Prokesch*
- 649** An Important Announcement from the World Health Organization: “Seconds Save Lives—Clean your Hands”: The May 5, 2021, World Health Organization *SAVE LIVES: Clean Your Hands* campaign  
*Benedetta Allegranzi, Ermira Tartari and Didier Pittet*

*An Official Publication of the Society for Healthcare Epidemiology of America*

## About the cover:

Starting in 2015, the cover format of each volume of *Infection Control and Hospital Epidemiology* will be changed in order to honor one of the many professionals throughout history who not only recognized how disease might be spread, but also how those principles could be applied to reduce healthcare associated infections.

Wu Lien-teh, M.D., MPH was born Gnoh Lean Tuck in Malaysia in 1879. His father, who was Chinese, immigrated to Penang to work as a goldsmith. In 1896, Wu won the Queen's Scholarship allowing him to enroll at Emmanuel College in Cambridge University. After training at St. Mary's Hospital in London, Wu pursued research at the Liverpool School of Tropical Medicine, the Pasteur Institute, and the Bacteriological Institute of Halle in the fields of bacteriology, malaria, and tetanus. By the age of 24, Dr. Wu was the first student of Chinese descent to graduate from Cambridge with a medical degree.

Dr. Wu returned to Malaysia in 1903, to find that there were no posts in the Medical Service for non-British specialists. After a brief time studying beri-beri, he returned to Penang to establish a medical practice. He advocated for the abolition of gambling, spirits and opium which impacted local government coffers. Wu soon found himself to be in possession of an ounce of opium for which he was prosecuted. In 1907, Wu left Malaysia to accept an invitation to serve as the Vice-Director of Imperial Army Medical College in Tientsin, China.

In 1910, an outbreak of a rapidly fatal respiratory disease occurred in the Chinese-Russian town of Harbin in Manchuria. The outbreak began amongst 10,000 hunters who stayed in crowded inns; they sought marmots for their pelts which, when appropriately dyed, could pass for sable. Wu, being conversant in French and German, was dispatched to work with foreign medical officers. No one had seen pneumonic plague in recent memory, but Dr. Wu strongly suspected the diagnosis and had to overcome Chinese prohibitions against performing postmortems to prove it. With his direction, travel was restricted, plague hospitals were built and the symptomatic isolated, their homes were disinfected, and asymptomatic contacts were identified and quarantined in freight cars. Bodies that could not be buried in the frozen soil were cremated contrary to the teachings of Confucianism. Everyone was encouraged to wear anti-plague masks, the forerunner of the N95 mask. One senior physician who notably refused to wear a mask died of the disease. By the Lunar New Year in 1911, the outbreak had ceased; 60,000 inhabitants had died.

Dr. Wu was nominated for the Nobel Prize for his work as a plague fighter; he directed the National Quarantine Service and was the first president of the China Medical Society. He also championed the modernization of Chinese Medical and Public Health Systems. After the Japanese occupation of China in 1937, he returned to Malaysia where he practiced medicine until retirement at the age of 80. Dr. Wu Lien-teh died on January 20, 1960 following a stroke.
