BULLETIN ISSN 0004-9727

of the

AUSTRALIAN MATHEMATICAL SOCIETY

Volume 26 Number 3 **December 1982**

An average distance result in Euclidean n-space
by John Strantzen 321
Average distances in compact connected spaces
by David Yost 331
On a class of polynomials associated with the subgraphs of a graph and its application to chromatic and dichromatic polynomials
by E. J. Farrell 343
Cyclically separated groups
by Brian Hartley, John C. Lennox and Akbar H. Rhemtulla 355
Laws in groupoids derived from semigroups
by Ann Chi Kim 385
A non-abelian automorphism group with all automorphisms central
by M. J. Curran.. 393

AUSTRALIAN MATHEMATICAL SOCIETY APPLIED MATHEMATICS CONFERENCE

Rational roulette
by F. Downton 399
Differential equations and the real world
by A. B. Tayler 421
Deferred correction for the ordinary differential equation eigenvalue problem
by King-wah Eric Chu.. 445

ABSTRACTS OF AUSTRALASIAN PHD THESES

The mathematical work of John Napier (1550-1617)
by William F. Hawkins. 455
Time-frequency analysis of speech via modulated splines
by Michael John Flaherty 469
Semigroups in a topos and structure theory in inverse semigroups
by Ross Wilkinson 471
Semigroup varieties with the amalgamation property
by G. T. Clarke 473
Linear groups: On non-congruence subgroups and presentations
by Phillip Ronald Helm 477
Degree multisets of hypergraphs
by David Billington 479

The University of Queensland Press, St Lucia, Queensland, 4067, Australia
Printed in Australia by Watson Ferguson & Co.
Registered by Australia Post—Publication No. QBQ2945

BULLETIN OF THE AUSTRALIAN MATHEMATICAL SOCIETY

Editor: Sidney A. Morris

Deputy Editor: K. R. Pearson
Honorary Editor: B. H. Neumann

Associate Editors

Robert S. Anderssen
Alan L. Andrew
B. D. Craven
Brian A. Davey
P. Donovan
B. J. Gardner
J. R. J. Groves
James M. Hill
D. A. Holton
D. C. Hunt
P. E. Kloeden
J. S. Maritz
Rodney Nillsen
Sheila Oates-Williams
A. J. van der Poorten
J. H. Rubinstein
Leon Simon
Ross Street
G. Szekeres
D. G. Tacon
Colin J. Thompson
H. B. Thompson
Rudolf Výborný

Assistant Editors

Robert S. Anderssen
M. S. Brooks

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after being evaluated by the Editor and an Associate Editor or another expert. Of course responsibility for the correctness of results published in the BULLETIN remains with the authors.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

(i) the exposition should be clear and attractive, and
(ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Pure Mathematics, La Trobe University,
Bundoora, Victoria 3083, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.

As even minor revisions are generally not permitted, authors should read carefully all the details listed on the inside back cover.

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 3 months of the degree being approved.

Contents

DAVID BILLINGTON, Degree multisets of hypergraphs [A] 479
R. D. Braddock, *see* J.-Y. Parlange
A. BROWN, Solutions of period seven for a logistic difference equation.. 263
JAMES R. BUNCH, Stable algorithms for solving symmetric and skew-symmetric systems .. 107
KING-WAH ERIC CHU, Deferred correction for the ordinary differential equation eigenvalue problem.. 445
G. T. CLARKE, Semigroup varieties with the amalgamation property [A] 473
IAN F. COLLINS, Boundary value problems in plasticity theory 121
WILLIAM H. CORNISH and A. S. A. NOOR, Standard elements in a nearlattice.. 185
STEPHEN C. COWIN, Adaptive elasticity. 57
M. J. CURRAN, A non-abelian automorphism group with all automorphisms central .. 393
F. DOWNTON, Rational roulette.. 399
E. J. FARRELL, On a class of polynomials associated with the subgraphs of a graph and its application to chromatic and dichromatic polynomials 343
J. D. FENTON, On the numerical solution of convective equations 81
M. J. FIELD, On the structure of a class of equivariant maps 161
MICHAEL JOHN FLAHERTY, Time-frequency analysis of speech via modulated splines [A] .. 469
MARIA FRAGOULOPOULOU, Abstract Bochner-Weil-Raikov theorem in topological algebras 39
BRIAN HARTLEY, JOHN C. LENNOX and AKBAR H. RHEMTULLA, Cyclically separated groups 355
WILLIAM F. HAWKINS, The mathematical work of John Napier (1550–1617) [A] 455
PHILLIP RONALD HELM Linear groups: On non-congruence subgroups and presentations [A] 477
G. M. KELLY, On the essentially-algebraic theory generated by a sketch 45
G. M. KELLY, Two addenda to the author's 'Transfinite constructions'. 221
M. A. KHAN, A theorem on power-open LCA groups and its consequences 239
ANN CHI KIM, Laws in groupoids derived from semigroups 385
JOHN C. LENNOX, *see* Brian Hartley
D. A. LOCKINGTON, *see* J.-Y. Parlange
D. K. MCILROY, A molecular model of ionic conductivity in nerve 285
GERALD MYERSON and C. J. SMYTH, On measures of polynomials in several variables: Corrigendum 317
SUBHASHIS NAG, Hyperbolic manifolds admitting holomorphic fiberings 181
A. S. A. NOOR, *see* William H. Cornish
J.-Y. PARLANGE, D. A. LOCKINGTON and R. D. BRADDOCK, Nonlinear diffusion in a finite layer 249
FRANZ PEHERSTORFER, Weight functions which admit Tchebycheff quadrature 29
J-C. RENAUD, Recurrence relations in a modular representation algebra 215
AKBAR H. RHEMTULLA, *see* Brian Hartley
R. W. RICHARDSON, Conjugacy classes of involutions in Coxeter groups 1
I. W. SAUNDERS, Stochastic modelling in CSIRO: two examples.. 143
LEON SIMON, Boundary behaviour of solutions of the non-parametric least area problem .. 17
C. J. SMYTH, *see* Gerald Myerson
JOHN STRANTZEN, An average distance result in Euclidean n-space 321
A. B. TAYLER, Differential equations and the real world 421
ROSS WILKINSON, Semigroups in a topos and structure theory in inverse semigroups. .. 471
ZHAN SHENG WU, On the optimal control of a class of hyperbolic systems 157
DAVID YOST, Average distances in compact connected spaces 331
