HIGH ENERGY PROCESSES AND PHENOMENA IN ASTROPHYSICS

IAU SYMPOSIUM VOLUME 214

COVER ILLUSTRATION:

The Chandra image of NGC 6240, a butterfly-shaped galaxy that is the product of the collision of two smaller galaxies, revealed that the central region of the galaxy (inset: 5-8 keV) contains not one, but two active giant black holes.

Contents

Preface	xiii
Part 1. Introduction	
The Phenomena of High Energy Astrophysics	3
<i>R. D. Blandford</i>	
Part 2. The Data Base of High Energy Astrophysics	
The Gamma-Ray Astronomy Database: 1990-2002	23
<i>K. Hurley</i>	
Studying the Nearby Universe with <i>Chandra</i>	32
<i>Q. D. Wang</i>	
Studying the Evolving Universe with <i>XMM-Newton</i> and <i>Chandra</i>	46
<i>G. Hasinger</i>	
X-ray Properties of Spiral Galaxies	59
<i>R. Soria</i>	
Imaging in Hard X-ray Astronomy	70
<i>T. P. Li</i>	
Part 3. Theoretical Considerations	
Extraction of Black Hole Rotational Energy by a Magnetic Field	87
<i>S. Koide</i>	
Mode Transitions of Black Hole Accretion Disks	91
<i>J. F. Lu, W. M. Gu, and Y. Q. Lin</i>	
Non-axisymmetric Instabilities in Shocked Accretion Flows	95
<i>W. M. Gu and T. Foglizzo</i>	
The Shape of the K_{α} Line as the Evidence for the Black Hole Existence	97
<i>A. F. Zakharov and S. V. Repin</i>	
Gravitational Lensing by Globular Clusters and Arp Objects	101
<i>A. Yushchenko, C. Kim, A. Sergeev, P. Niarchos, and V. Manimanis</i>	

Part 4. Supernovae and Supernova Remnants

The Progenitors of Type Ia Supernovae	109
<i>Z. Han and P. Podsiadlowski</i>	
X-Ray Emission from Young Supernovae	113
<i>S. Immler</i>	
Magnetorotational Mechanism: Supernova Explosions and Ejections . .	117
<i>N. V. Ardeljan, G. S. Bisnovaty-Kogan, and S. G. Moiseenko</i>	
SNR 1987A: the Birth of a Supernova Remnant	121
<i>R. McCray</i>	
<i>Chandra</i> Observations of the Guitar Nebula	135
<i>D. S. Wong, J. M. Cordes, S. Chatterjee, E. G. Zweibel, J. P. Finley, R. W. Romani, and M. P. Ulmer</i>	
“Hypernova” Radio Remnants	137
<i>A. I. Asvarov</i>	
Neutron Stars in Supernova Remnants and Beyond	141
<i>V. V. Gvaramadze</i>	
Point X-Ray Sources in the Supernova Remnant RCW 86	145
<i>V. V. Gvaramadze and A. A. Vikhlinin</i>	

Part 5. Pulsars and Other Neutron Stars

Pulsars: A Roundup of Recent Results	149
<i>R. N. Manchester</i>	
Pulsar Observations in China – Status and Results	159
<i>N. Wang, J. Zhang, and X. J. Wu</i>	
Correlation between the X-ray Spectra of Young Pulsars and their Wind Nebulae	163
<i>E. V. Gotthelf</i>	
A Joint Model for Radio and γ -ray Emission from Pulsars	167
<i>G. J. Qiao, K. J. Lee, H. G. Wang, and R. X. Xu</i>	
A Re-investigation to the Death Line of Radio Pulsars	171
<i>G. J. Qiao, Y. Q. Xue, B. Zhang, R. X. Xu, F. F. Ye, and H. G. Wang</i>	
Pulsar Spin-Down by ${}^3\text{P}_2$ Superfluid Neutrons	175
<i>X. L. Luo, Q. H. Peng, M. Zhang, and C. K. Chou</i>	
Modelling X-ray and Gamma-ray Emission from Pulsars	177
<i>B. Rudak and J. Dyks</i>	
Matter and Radiation in Superstrong Magnetic Fields and Thermal Emission from Neutron Stars	181
<i>D. Lai and W. C. G. Ho</i>	

Strange Quark Stars — A Review	191
<i>R. X. Xu</i>	

Part 6. X-Ray Binaries

Microquasars as Sources of High Energy Phenomena	201
<i>I. F. Mirabel</i>	
Flashes in Be/X-ray Binary A0535+26	211
<i>T. Dorokhova and N. Dorokhov</i>	
The Relation between Spin and Orbital Periods in HMXBs	215
<i>Q. Z. Liu, X. D. Li, and D. M. Wei</i>	
Long-Term X-ray Variability of Circinus X-1 as Observed by the <i>RXTE</i> All Sky Monitor	218
<i>J. Wang and W. N. Brandt</i>	
Two Modes of Disc Accretion in X-ray Pulsars?	220
<i>U. Torkelsson</i>	
Phase Offset of Rotation-Powered X-ray Pulsars	224
<i>H. G. Wang, G. J. Qiao, and R. X. Xu</i>	
Accretion Disk Oscillations and QPOs in Black Hole X-ray Binaries	227
<i>X. B. Wu</i>	
Time Lags of Horizontal Branch Oscillations in Z Source GX 5-1	231
<i>J. L. Qu, G. Q. Ding, J. F. Ji, and M. X. Zhang</i>	
Probing the X-ray Variability of X-ray Binaries	236
<i>W. F. Yu</i>	

Part 7. Normal Galaxies and Clusters

Giant-Amplitude X-ray Flares as Probes of the Black Hole Region of Nearby Galaxies	243
<i>S. Komossa, W. Yuan, and D. W. Xu</i>	
Galaxies at the Detection Limits of Deep X-ray Surveys	246
<i>R. E. Griffiths, T. Miyaji, and A. Knudson</i>	
X-ray Spectroscopy of the Cluster of Galaxies PKS 0745-191 with <i>XMM-Newton</i>	254
<i>Y. Chen, Y. Ikebe, and H. Böhringer</i>	

Part 8. Active Galaxies and their Nuclei

New <i>Chandra/HST-STIS</i> Results on Seyfert I AGN: Photoionized Outflows	259
<i>B. McKernan and T. Yaqoob</i>	

New <i>Chandra</i> Results on Seyfert I Galaxies: Fe-K lines	265
<i>U. Padmanabhan and T. Yaqoob</i>	
Seyfert 2 Galaxies with Spectropolarimetric Observations	271
<i>Q. Gu and J. Huang</i>	
Emission Line Properties of Seyfert 1 Type AGN from RASS	273
<i>D. W. Xu, S. Komossa, J. Y. Wei, X. Z. Zheng, and Y. Qian</i>	
Fe K α Lines of Seyfert I Galaxies: Thin-Torus Model	275
<i>Z. G. Ma</i>	
Prediction of the Black-Hole Mass in 3C 273 by Multiband Observations	281
<i>Z. G. Ma and X. Z. Zhang</i>	
Does the Black Hole Rotation Lead to Higher X-Ray Variability in the Narrow-Line Objects?	287
<i>W. Bian and Y. Zhao</i>	
A <i>Chandra</i> View of the Multi-scale Structures in Centaurus A	289
<i>M. Karovska, G. Fabbiano, M. Elvis, F. Nicastro, S. S. Murray, and R. P. Kraft</i>	
A Model of the Molecular Maser Disk in NGC4258	293
<i>N. Babkovskaia and J. Poutanen</i>	
Beaming Effect and Polarization of Blazars	295
<i>J. H. Fan</i>	
The X-ray Spectral Properties for Gamma-ray Loud Blazars	299
<i>B. Z. Dai</i>	
Discovery of Helical Magnetic Fields in AGN, and CME and Ejection of Large-Scale Magnetic Fields from AGN	303
<i>H. S. Chu, L. B. Baath, F. J. Zhang, and R. E. Spencer</i>	

Part 9. Gamma Ray Bursters

Some Recent Developments in γ -ray Burst Afterglow and Prompt Emission Models	311
<i>B. Zhang, P. Mészáros, and J. Wang</i>	
Beaming Effects in Gamma-Ray Burst Afterglows	321
<i>Y. F. Huang, T. Lu, Z. G. Dai, and K. S. Cheng</i>	
Poynting Flux Dominated Black Hole-Accretion Disk System as GRB Power House	323
<i>H. K. Lee and H. K. Kim</i>	
e^{\pm} -rich GRB Fireball and Infrared Flashes	331
<i>Z. Li, Z. G. Dai, and T. Lu</i>	
Simple Reduction of Gamma-Ray Bursts	333
<i>X. Liu</i>	

Gamma-ray Burst Spectrum Influenced by the Doppler Effect of Fireballs	335
<i>Y. P. Qin</i>	
Characteristic Variability Time Scales of Long Gamma-Ray Bursts . . .	339
<i>R. Shen and L. Song</i>	
Possible Geometries for Afterglow of GRB990705	341
<i>X. Y. Wang, Z. G. Dai, and T. Lu</i>	
Optical Flash and Radio Flare in Wind Environment	343
<i>X. F. Wu, Z. G. Dai, Y. F. Huang, and T. Lu</i>	

Part 10. Non-Photon Astrophysics and the Future

Neutrino Masses and Mixing	347
<i>Y. Totsuka</i>	
Physics and Results from the AMANDA-II High Energy Neutrino Telescope	357
<i>S. W. Barwick, for the AMANDA Collaboration</i>	
Towards Teraton EeV Neutrino Telescopes	372
<i>P. W. Gorham</i>	
On the Present Time Approximate Values of the Characteristic Parameters of the Primordial Gravitational Waves	376
<i>M. Melek</i>	
Recent Status of High-Energy Gamma-Ray Astronomy	382
<i>M. Takita</i>	
REM: A Fast Slewing Robotized Telescope to Catch Near-Infrared Afterglow of GRBs	387
<i>L. A. Antonelli, F. M. Zerbi, G. Chincarini, G. Ghisellini, M. Rodonò, G. Cutispoto, P. Conconi, S. Covino, E. Molinari, G. Tosti, L. Nicastro, and E. Palazzi</i>	
GLAST and Gamma-Ray Bursts	391
<i>R. D. Preece</i>	
The Highest Energy Cosmic Rays, A Review and Prospects	399
<i>M. Fukushima</i>	

Part 11. Summing Up

Conference Summary: What is High Energy Astrophysics?	411
<i>V. Trimble</i>	
Author Index	425
