

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

HISTORICAL REVIEW

- Richard von Krafft-Ebing's views on the etiology of major psychiatric illness**
Engstrom EJ & Kendler KS 1345

ORIGINAL ARTICLES

- Amygdala-hippocampal shape and cortical thickness abnormalities in first-episode schizophrenia and mania**
Qiu A, Gan SC, Wang Y & Sim K 1353

- Disturbances of the basic self and prodromal symptoms among non-psychotic help-seeking adolescents**
Koren D, Reznik N, Adres M, Scheyer R, Apter A, Steinberg T & Parnas J 1365

- Hippocampal volume as marker of daily life stress sensitivity in psychosis**
Collip D, Habets P, Marcelis M, Gronenschild E, Lataster T, Lardinois M, Nicolson NA & Myin-Germeys I, for G.R.O.U.P. 1377

- Increased stress reactivity: a mechanism specifically associated with the positive symptoms of psychotic disorder**
Lataster T, Valmaggia L, Lardinois M, van Os J & Myin-Germeys I 1389

- Subsyndromal depression in the United States: prevalence, course, and risk for incident psychiatric outcomes**
Pietrzak RH, Kinley J, Affi TO, Enns MW, Fawcett J & Sareen J 1401

- Time trends in coroners' use of different verdicts for possible suicides and their impact on officially reported incidence of suicide in England: 1990–2005**
Gunnell D, Bennenwith O, Simkin S, Cooper J, Klineberg E, Rodway C, Sutton L, Steeg S, Wells C, Hawton K & Kapur N 1415

- Prevalence of depression and utilization of health care in single and multiple morbidity: a population-based cohort study**
Bhattarai N, Charlton J, Rudisill C & Gulliford MC 1423

- Shifted inferior frontal laterality in women with major depressive disorder is related to emotion-processing deficits**
Briceño EM, Weisenbach SL, Rapport LJ, Hazlett KE, Bieliauskas LA, Haase BD, Ransom MT, Brinkman ML, Peciña M, Schteingart DE, Starkman MN, Giordani B, Welsh RC, Noll DC, Zubieta J-K & Langenecker SA 1433

- Effectiveness of a nationwide aftercare program for suicide attempters**
Pan Y-J, Chang W-H, Lee M-B, Chen C-H, Liao S-C & Caine ED 1447

- Assessing your mood online: acceptability and use of Moodscope**
Drake G, Csipke E & Wykes T 1455

- Prospective study of risk factors for suicidal behavior in individuals with anxiety disorders**
Uebelacker LA, Weisberg R, Millman M, Yen S & Keller M 1465

- Prefrontal dysfunction during emotion regulation in generalized anxiety and panic disorders**
Manber Ball T, Ramsawh HJ, Campbell-Sills L, Paulus MP & Stein MB 1475

- Family history of alcohol dependence modulates functional neurophysiology in mood/anxiety disorders**
Sjoerds Z, van Tol M-J, van den Brink W, van der Wee NJA, Aleman A, Beekman ATF, Penninx BWJH & Veltman DJ 1487

- Specialized psychosocial treatment plus treatment as usual (TAU) versus TAU for patients with cannabis use disorder and psychosis: the CapOpus randomized trial**
Hjorthøj CR, Fohlmann A, Larsen A-M, Gluud C, Arendt M & Nordentoft M 1499

- Identification and management of prisoners with severe psychiatric illness by specialist mental health services**
Senior J, Birmingham L, Harty MA, Hassan L, Hayes AJ, Kendall K, King C, Lathlean J, Lowthian C, Mills A, Webb R, Thornicroft G & Shaw J 1511

- The neural basis of flashback formation: the impact of viewing trauma**
Bourne C, Mackay CE & Holmes EA 1521

- Childhood and adult trauma both correlate with dorsal anterior cingulate activation to threat in combat veterans**
Herringa RJ, Phillips ML, Fournier JC, Kronhaus DM & Germain A 1533

- The neuropsychological profile of children at high risk of developing an eating disorder**
Kothari R, Solmi F, Treasure J & Micali N 1543

- Forum** 1555

- Correspondence** 1568
