MICROIL®

Our claim that *MICROIL* is unsurpassed as a microscope immersion oil for routine use is supported by thousands of technicians and research workers in many lands who ask for it by name.

MICROIL is a colourless immersion oil, non-sticky, non-drying and neutral in reaction. It is ideal for use in any part of the world, including the tropics.

The chances are that you already have *MICROIL* on your bench, if not, write for details of this and other products.
