
NUTRITION RESEARCH REVIEWS, VOLUME 32 - ISSUE 2

Caffeine and blood pressure: a critical review perspective <i>Rachele De Giuseppe, Ilaria Di Napoli, Francesca Granata, Antonia Mottolose & Hellas Cena</i>	169-175	The role of one-carbon metabolism and homocysteine in Parkinson's disease onset, pathology and mechanisms <i>Lauren K. Murray & Nafisa M. Jadavji</i>	218-230
Gut rest strategy and trophic feeding in the acute phase of critical illness with acute gastrointestinal injury <i>Dong Zhang, Hongxiang Li, Yuting Li & Lai Qu</i>	176-182	Insights on modulators in perception of taste modalities: a review <i>Shanmugaprema Deepankumar, Muthuswamy Karthi, Krishnan Vasanth & Subramaniam Selvakumar</i>	231-246
Molecular mechanisms relating to amino acid regulation of protein synthesis <i>Yangchun Cao, Shimin Liu, Kai Liu, Imtiaz Hussain Raja Abbasi, Chuanjiang Cai & Junhu Yao</i>	183-191	A review of the putative causal mechanisms associated with lower macular pigment in diabetes mellitus <i>Grainne Scanlon, James Loughman, Donal Farrell & Daniel McCartney</i>	247-264
Mechanisms of vitamin D action in skeletal muscle <i>Karina Romeu Montenegro, Vinicius Cruzat, Rodrigo Carlessi & Philip Newsholme</i>	192-204	Food habits during treatment of childhood cancer: a critical review <i>S. Beaulieu-Gagnon, V. Bélanger & V. Marcil</i>	265-281
Metabolism, bioenergetics and thermal physiology: influences of the human intestinal microbiota <i>Lawrence E. Armstrong, Douglas J. Casa & Luke N. Belval</i>	205-217	Biological underpinnings from psychosocial stress towards appetite and obesity during youth: research implications towards metagenomics, epigenomics and metabolomics <i>Nathalie Michels</i>	282-293
