

INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website www.austms.org.au/Bulletin. Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in L^AT_EX using $\mathcal{A}\mathcal{M}\mathcal{S}$ -L^AT_EX packages and submitted as a PDF file via our journal management system, at www.austms.org.au/Publications/Submissions/BAustMS. This permits authors to track their papers through the editorial process. Recent versions of T_EX are able to produce PDF files directly. A L^AT_EX class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at editor@bulletin.austms.org.au.

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification and Key Words. Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2020 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at www.ams.org/msc.

4. Abstracts of PhD Theses. The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

This journal issue has been printed on FSC[™]-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Table of Contents

A note on regular sets in Cayley graphs <i>Zhang, J. & Zhu, Y.</i>	1
Computing points on bielliptic modular curves over fixed quadratic fields <i>Michaud-Jacobs, P.</i>	6
Divisibility of the partition function $PDO_t(n)$ by powers of 2 and 3 <i>Barman, R., Singh, G. & Singh, A.</i>	14
A conjecture of Merca on congruences modulo powers of 2 for partitions into distinct parts <i>Du, J. Q. D. & Tang, D.</i>	26
Galois groups of reciprocal sextic polynomials <i>Awtrey, C. & Lee, A.</i>	37
Strict regularity for 2-cocycles of finite groups <i>Higgs, R. J.</i>	45
Hall subgroups and 2-cocycle regularity <i>Higgs, R. J.</i>	51
On the characterisation of sporadic simple groups by codegrees <i>Dolofino, M., Martin, L., Slonim, Z., Sun, Y. & Yang, Y.</i>	57
When is a numerical semigroup a quotient? <i>Bogart, T., O'Neill, C. & Woods, K.</i>	67
Arithmeticity of C-Fuchsian subgroups of some nonarithmetic lattices <i>Jiang, Y., Wang, J. & Yang, F.</i>	77
On the number of real zeros of polynomials of even degree <i>Ma, L. & Ma, Z.</i>	89
The third Hankel determinant for inverse coefficients of convex functions <i>Raza, M., Riaz, A. & Thomas, D. K.</i>	94
Bounds for functionals defined on a certain class of meromorphic functions <i>Bhowmik, B. & Parveen, F.</i>	101
Jacobian elliptic functions in signature four <i>Robinson, P. L.</i>	110
The growth of solutions of Monge–Ampère equations in half spaces and its application <i>Ma, S. S. & Jia, X. B.</i>	125
A dynamical system proof of Niven’s theorem and its extensions <i>Panraksa, C., Samart, D. & Srivongsa, S.</i>	138
Min-phase-isometries in strictly convex normed spaces <i>Tan, D. & Zhang, F.</i>	152
Abstracts of PhD Theses	
Cayley graphs and graphical regular representations <i>Zheng, S.</i>	161
Harmonic-measure distribution functions and related functions for simply connected and multiply connected two-dimensional regions <i>Mahenthiram, A.</i>	163
Eventual positivity and asymptotic behaviour for higher-order evolution equations <i>Mui, J.</i>	165
Geometric and topological shape analysis: Investigating and summarising the shape of data <i>Bleile, Y. B.</i>	168
Corrigenda	
Correction to ‘On the complement of the zero-divisor graph of a partially ordered set’ <i>Devhare, S., Joshi, V. & Lagrange, J.</i>	170
Correction to ‘Existence and box dimension of general recurrent fractal interpolation functions’ <i>Ruan, H.-J. & Xiao, J.-C.</i>	174
