

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, USA*

PROF. F. D. KAHN

Department of Astronomy, University of Manchester, Manchester M13 9PL, England

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, USA

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/85/2828-0001 \$05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, NY 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 33 and 34 (1985) is £80.00 net per volume (US \$197.50 in the USA and Canada) for institutions; £40.00 (US \$98.75) per volume for individuals. Single parts cost £28.00 each (US \$70.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, and Canada to *Journal of Plasma Physics*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

CONTENTS TO VOLUME 33

PART 1 FEBRUARY 1985

Dispersion surfaces. M. ANDRÉ	1
On the self-modulation of whistler waves propagating along the external magnetic field. G. MANN	21
Nonlinear evolution of double layers and electron vortices in an unstable plasma diode. S. IIZUKA and H. TANACA	29
Oscillation-centre fluid theory of the ponderomotive force. G. W. KENTWELL and D. A. JONES	43
Solitary surface waves on a magnetized plasma cylinder. O. M. GRADOV, L. STENFLO and D. SUNDER	53
Period doubling of azimuthal oscillations on a non-neutral magnetized electron column. R. W. BOSWELL and M. J. GILES	59
A study of plasma expansion phenomena in laboratory generated plasma wakes: preliminary results. K. H. WRIGHT, N. H. STONE and U. SAMIR	71
Switched-on evolution due to a temporal electron charge drifting sub-thermally through a warm collisional plasma. L. CHEE-SING	83
Nonlinear propagation and localization of intense electromagnetic waves in relativistic plasmas. U. A. MOFIZ and U. DE ANGELIS	107
Effects of positive potential in the catastrophe theory study of the point model for bumpy tori. A. PUNJABI and G. VAHALA	119
Nonlinear interaction of the surface waves at a narrow inhomogeneous layer of the magnetoactive plasma. A. M. HUSSEIN	151

PART 2 APRIL 1985

Nonlinear bound on unstable electrostatic fluctuation energy for non-relativistic non-neutral electron flow in a planar diode with applied magnetic field. R. C. DAVIDSON	157
Self-focusing of nonlinear ion-acoustic waves and solitons in magnetized plasmas. E. INFELD	171
Some properties of the Fokker-Planck equation. G. J. LEWAK and L. A. SOTO	183
On the exponential flattening of current sheets near neutral X-points in two-dimensional ideal MHD flow. P. L. SULEM, U. FRISCH, A. POUQUET and M. MENEGUZZI	191
Resistive decay of Alfvén waves in a non-uniform plasma. Y. MOK and G. EINAUDI	199
Modulational instability of obliquely modulated ion-acoustic waves in a two-electron-temperature plasma. YASHVIR, T. N. BHATNAGAR and S. R. SHARMA	209
The general Lie group and similarity solutions for the one-dimensional Vlasov-Maxwell equations. D. ROBERTS	219

Experiments on ion-acoustic rarefactive solitons in a multi-component plasma with negative ions. Y. NAKAMURA, J. L. FERREIRA and G. O. LUDWIG	237
The Fermi golden rule for ideal magnetohydrodynamics. A. E. LIFSHITZ	249
RF current drive with magnetic helicity injection. D. K. BHADRA and C. CHU	257
Multi-species kinetic generalization of the Appleton–Hartree dispersion formula. A. J. M. GARRETT	265
Stability of strong electromagnetic waves in overdense plasmas against long-wavelength perturbations. F. J. ROMEIRAS and G. ROWLANDS	285
Kinetic theory of stimulated Raman scattering from a magnetized plasma. T. J. M. BOYD and R. RANKIN	303

PART 3 JUNE 1985

Resonance cone structure in a warm inhomogeneous bounded plasma with lower-hybrid resonance layers. C. L. GRABBE	321
The thermodynamics of the Vlasov equilibria. E. MINARDI	359
Effects of asymmetries on the collisionless reconnecting instability. B. CHIKE-Obi	369
Compton and Raman free electron laser stability properties for a cold electron beam propagating through a helical magnetic wiggler. J. A. DAVIES, R. C. DAVIDSON and G. L. JOHNSTON	387
Plasmoid motion across a tangential discontinuity (with application to the magnetopause). J. LEMAIRE	425
Instability of low-frequency waves in a cold plasma mixed with hot electrons. H. HAMABATA and T. NAMIKAWA	437
Propagation of hydromagnetic waves in a cold plasma mixed with hot ions. H. HAMABATA and T. NAMIKAWA	443
BOOK REVIEW	
<i>Introduction to Plasma Physics</i> (2nd edition), by F. F. Chen	455
AUTHOR INDEX TO VOLUME 33	456
