## BECOME A LIFE MEMBER AND YOU'LL JOIN PRESTIGIOUS COMPANY

Become a Life Member of Fauna & Flora International to show an extraordinary commitment to an organisation that has been at the forefront of conservation for over 100 years.

Since its inception in 1903 as the world's first international conservation organisation Fauna & Flora International has been working tirelessly for the preservation of plants and animals across the world. For over 100 years Life Members have provided the support and commitment that has helped us to achieve so much, not least key achievements such as:

- Reintroducing the Arabian oryx to the wild
- Establishing the International Gorilla Conservation Programme
- Establishing Vietnam's first locally managed conservation organisation

Collaboration is key to our approach, and wherever possible we work with other global conservation organisations to ensure we are effective and efficient. That's why in 2015 we moved into the David Attenborough Building of the Cambridge Conservation Initiative with several other global conservation groups. Now we are asking you to be part of our wider collaborative work by becoming a Life Member.

As a Life Member you will receive Oryx—The International Journal of Conservation and our annual magazine Fauna & Flora, and you will also be invited to special events, where you can network with some of the world's leading conservationists. You will be joining a select group of supporters who have shown an extraordinary commitment to international conservation.

To join as a Life Member, you can: Call us on +44 (0)1223 749 019 Email us at members@fauna-flora.org Visit www.fauna-flora.org/life-membership By joining Fauna & Flora International as a Life Member with a one-off payment of £1,500 you will be making a genuine difference to our conservation work and will forever be part of our global conservation organisation.

"I have been a member of Fauna & Flora International since the 1950s... investment in the work of FFI is truly an investment in the future of our planet" **Sir David Attenborough**

135 Dawn at Mineral King Valley: The Sierra Club, The Disney Company, and the Rise of Environmental Law

*Cover* Studies of the illegal wildlife trade often focus on high-value, charismatic species traded internationally such as large mammals and colourful birds. Yet trade involves a wide diversity of organisms, including taxa such as the Goliath frog (pictured) and the caterpillar fungus that are important in domestic markets. A complex web of cultures, practices and needs fuels the domestic wildlife trade, the impacts of which we have yet to fully grasp. Although domestic wildlife markets in source countries have received less research and conservation attention, their impact is significant. The editorial and eight articles on wildlife trade in this issue highlight the diversity and conservation importance of the domestic wildlife trade, and demonstrate the breadth of important research being carried out on this topic. For further details, see pp. 1–2 & 15–24. (Photograph © Cyril Ruoso/NaturePL)
