ADVERTISING GUIDELINES

Advertising Policy and Guidelines

General Statement

*Prehospital and Disaster Medicine* (PDM) is a scientifically based, peer-reviewed, medical journal. It is the policy of the editorial office of PDM that all advertising material be sound scientifically and thus meet the following guidelines:

- 1) Claims must be supported scientifically, and references provided—either within the advertisement or made available upon request;
- 2) Every effort must be directed to minimize the likelihood of possible erroneous interpretations of the claims; and
- 3) Advertisements should be aimed at a sophisticated, medical audience.

Review

Each advertisement considered for publication is submitted to the editorial office for review. Any advertisement that does not meet the guidelines will be returned to the advertiser with suggestions for revisions; the editorial office is available for consultation at any time.

Use of these guidelines and the process used for review add to the credibility of PDM and of the product. Questions may be directed to Marvin L. Birnbaum, MD, PhD, Editor-in-Chief; (608) 263-9641; e-mail: mlb@medicine.wisc.edu
