

# NEW AND NOTEWORTHY JOURNALS

**Call for papers!**

## JOURNAL OF MATERIALS SYNTHESIS AND PROCESSING

Co-Editors: Z. A. Munir and J. B. Holt

*Journal of Materials Synthesis and Processing*, to be published quarterly as of January 1993, is an international forum for peer-reviewed original papers and review articles on all aspects of high temperature synthesis and processing of materials, including ceramic, intermetallic, and composite materials.

**Papers are now being accepted for the first issue of *Materials Synthesis and Processing*.**

All inquiries should be directed to: Z. A. Munir, Division of Materials Science and Engineering, University of California, Davis, CA 95616-5294.

**Write to the Sample Copy Dept. for a free examination copy of any Plenum journal!**

Circle No. 45 on Reader Service Card.

**New!**

## JOURNAL OF SCIENCE EDUCATION AND TECHNOLOGY

Editor-in-Chief: Karen C. Cohen

*Journal of Science Education and Technology* begins publication in March 1992 as an interdisciplinary forum for original peer-reviewed articles aimed at improving science education at all levels in the United States. This new quarterly covers learning processes related to the acquisition and understanding of biology, chemistry, physics, mathematics, computer science, and engineering; the latest computer video, audio, and print technology; and legislative, implementation, administrative, and teacher enhancement issues.

## JOURNAL OF SUPERCONDUCTIVITY

Co-Editors: Donald U. Gubser, Vladimir Kresin, and Stuart A. Wolf

This international journal features the latest research in the science and technology of superconductivity, with articles on new materials, new mechanisms, new phenomena, and basic and technological properties of superconductivity, as well as both small- and large-scale applications.

## CLASSIFIED

### Positions Available

#### POSTDOCTORAL RESEARCH ASSOCIATE

We are starting a new multidisciplinary project titled Advanced Materials for Photonic, Lasers, and Electro-optics with openings for several Postdoctoral Research Associates. Individuals with backgrounds in the physics and chemistry of optical materials, materials science, and optical engineering are needed for this project. The work will involve the growth and preparation of optical materials, their characterization and their application. The thrust areas are nonlinear and photorefractive materials; sol-gel materials; and II-VI and III-V semiconductors. The initial appointment will be for twelve (12) months and may be renewed annually. Application should be made to: Prof. Joel J. Martin, Department of Physics, Oklahoma State University, Stillwater, OK 74078 before May 15, 1992.

OSU is an affirmative action/equal opportunity employer.

#### PROJECT SPECIALIST/TECHNICIAN POSITION

#### Laboratory for Surface Studies at the University of Wisconsin-Milwaukee

The Laboratory for Surface Studies is seeking applications for the position of Project Specialist/Technician. Skills required include a hands-on knowledge of vacuum technology including machining, welding, UHV equipment designing and building, and electronic equipment maintenance. The position involves interaction with faculty, postdocs, and students in the Laboratory for Surface Studies. LSS offers competitive compensation and a comprehensive benefits program. Send resume including job experience and names, addresses and phone numbers of three references to:

Prof. C.R. Aita,  
Chair, Hiring Committee  
Materials Department  
University of Wisconsin-Milwaukee  
P.O. Box 784  
Milwaukee, WI 53201

Candidate screening will begin immediately and continue through April 30, 1992. For additional information, contact Prof. Aita at (414) 229-4733 (phone) or (414) 229-6958 (fax).

UW-Milwaukee is an Affirmative Action/Equal Opportunity employer.

#### POSTDOCTORAL RESEARCH ASSOCIATE

#### Thin Film Surface Physics

The Thin Film Physics group at the University of Illinois, Urbana-Champaign, investigates the growth mechanisms of group IV semiconductors using *in-situ* spectroscopies. Materials under study include hydrogenated amorphous silicon and silicon-carbon alloys, micro-crystalline silicon, and low temperature epitaxial silicon. We seek a Postdoctoral Research Associate with expertise in one or more of the following areas: real time optical probes (spectroscopic ellipsometry, reflection infra-red absorption), mass spectroscopy (appearance potential, modulated beam), plasma-surface interactions (plasma probes, ion sources), growth simulations (TRIM, MD, plasma), and opto-electronic analyses of thin film semiconductors. Send a resume, publication list, copies of two significant publications, and the names of three references to: Prof. John R. Abelson, 1-109 Coordinated Science Laboratory, 1101 W. Springfield Ave., Urbana, IL 61801. Starting date is flexible, and two-year commitment is preferred.

**Positions Available****DIREKTOR/DIREKTORIN**

Institut für Ionenstrahlphysik  
und Materialforschung

Das FORSCHUNGZENTRUM ROSENDORF wird aufgrund der Empfehlungen des Wissenschaftsrates als Institut der Blauen Liste zum 1. Januar 1992 gegründet. Rossendorf ist ein traditioneller Forschungsstandort östlich der Landeshauptstadt Dresden.

Das Forschungszentrum hat mit etwa 500 Mitarbeitern die Aufgabe, Grundlagen und anwendungsorientierte Forschung auf den Gebieten Kernphysik, Materialforschung insbesondere mit Ionenstrahlen, Sicherheitsforschung, Radiochemie und bioanorganische Chemie in enger Zusammenarbeit mit Hochschulen und anderen Instituten durchzuführen.

Wir suchen für das neugegründete INSTITUT für IONENSTRAHLPHYSIK und MATERIALFORSCHUNG einen Wissenschaftler oder eine Wissenschaftlerin als Direktor/Direktorin (C4).

Ein Arbeitsbereich des Institutes umfasst überwiegend anwendungsorientierte Grundlagenforschung auf den Gebieten Ionenstrahleinführung von Materialien in Oberflächennähe. Das betrifft in erster Linie die Modifizierung von Halbleitern, Metallen, Keramiken aber auch die gezielte Veränderung organischer Materialien. Techniken sind die Ionenimplantation, das Ionenstrahlmischen und die ionenstrahlgestützte Abscheidung. Ionenstrahletechniken werden zur Erzeugung von Festkörperstrukturen für die Mikrosystemtechnik, insbesondere von Sensoren eingesetzt. Eine theoretische Gruppe soll an physikalischen Modellen zur Computersimulation der Ion-Festkörperwechselwirkung sowie der Wirkung nachfolgender thermischer Prozesse arbeiten.

Ein weiterer Arbeitsbereich des Instituts umfasst Grundlagenuntersuchungen und anwendungsorientierte Grundlagenforschung auf den Gebieten Ion - Festkörper - Wechselwirkungen, insbesondere die Wechselwirkung hochgeladener Ionen mit Festkörperoberflächen sowie die Weiterentwicklung der Analytik mit hochgeladenen und schweren Ionen.

Zu dem Institut gehören die Ionenbeschleuniger (2 MV Van-de-Graaff, 5 MV Tandem, 4 Implanter) und ein Labor für Halbleiterpräparation. Eine wichtige Aufgabe besteht in der Anpassung der Beschleunigertechnik an die wechselnden Aufgaben des Institutes.

Gesucht wird ein/e Wissenschaftler/in mit nachgewiesener Erfahrung in der Ionenstrahlfestkörperphysik und/oder in der Ionenstrahlanalytik, der/die auch das Gebiet der elektrostatischen Beschleuniger überschaut und angemessener Qualifikation. Verlangt werden die Fähigkeit zur Leitung einer größeren wissenschaftlichen Gruppierung, die sowohl experimentell als auch theoretisch arbeitet, Erfahrungen in der akademischen Lehre und die Bereitschaft zur Kooperation mit anderen Forschungseinrichtungen und Universitäten im In- und Ausland.

Es ist vorgesehen, den/die Direktor/in gleichzeitig auf einen entsprechenden Lehrstuhl der Technischen Universität Dresden zu berufen. Dabei sind in der akademischen Ausbildung die Gebiete Wechselwirkung von Ionen mit Festkörpern sowie Anwendungen von Ionenstrahlverfahren in der Oberflächenphysik und Dünnenschicht-technik oder der Einsatz von Ionenstrahltechniken in der Fertigung von Halbleiterbauelementen zu vertreten. Habilitation oder gleichwertige wissenschaftliche Leistungen werden vorausgesetzt.

Die Auswahl der Kandidaten/innen wird durch eine vom Gründungskomitee des Forschungszentrums Rossendorf gebildete Berufungskommission vorgenommen. Bewerbungen mit Lebenslauf, Zeugnissen, Veröffentlichungsliste und einer kurzen Darstellung der bisherigen wissenschaftlichen Tätigkeit richten Sie bitte bis zum **27 April 1992** an den Wissenschaftlichen Direktor des Forschungszentrums Rossendorf, Herrn Prof. Dr. Wolf Häfele, Postfach 19, D-8051 DRESDEN, Germany.

**PHOTOVOLTAICS:**

**Since the beginning of time, man has sought ways to harness the power of the sun. Join us in accepting this challenge.**

We are Siemens Solar Industries, the world's leading manufacturer of photovoltaic modules. Solar electric (photovoltaic) energy is rapidly becoming the power supply choice for an expanding range of products and applications. Our modules serve as a dependable power source in everything from consumer electronics to utility power plants.

We are committed to advancing the development of photovoltaic technology to make it the power source of the future. Our success in reaching our goal depends largely on our scientists and engineers.

Positions are now available, and we are seeking individuals with training in Materials Science, Electrical, Mechanical, Industrial or Chemical Engineering, Physics, or Chemistry.

If you are interested, please submit your resume to:

Jacqueline J. Fraser, Manager, Human Resources,  
Siemens Solar Industries

P.O. Box 6032  
Camarillo, California 93011      Equal Opportunity Employer

**THIN FILM MATERIALS**

**University of California, Berkeley  
Department of Materials  
Science & Mineral Engineering**

The University of California at Berkeley, Department of Materials Science & Mineral Engineering, invites applicants for a tenure-track position in thin film materials with expertise in the control of microstructure during thin film synthesis and processing. Preference will be given to an appointment at the assistant professor level, although appointment at a tenured level will be considered for an exceptionally qualified and experienced candidate.

The successful candidate will be responsible for teaching undergraduate and graduate courses in the Department, and must show potential for high quality research. A doctoral degree in an appropriate field is required. The position is available in the Spring Semester of 1993.

Interested persons should apply (include resume, statement of interest, copies of publications, names and addresses of references) by **July 1, 1992** to:

Prof. Ronald Gronsky, Chairman  
Department of Materials Science  
& Mineral Engineering  
210 Hearst Memorial Mining Building  
University of California  
Berkeley, CA 94720  
Phone: (510) 642-3801

*The University of California is an Equal Opportunity, Affirmative Action Employer.*

**Positions Available****CHAIR**

**Department of Materials Science  
and Engineering**  
**University of Alabama at Birmingham**

Applications and nominations are invited for the position of Chair of the UAB Department of Materials Science and Engineering. UAB is one of three autonomous institutions in the University of Alabama System. The department consists of eight full-time faculty members, approximately 20 junior-senior undergraduates, and 25 doctoral degree candidates. The faculty currently direct sponsored research programs in excess of \$1M/year. The department offers BS, MS, and PhD degree programs in materials engineering. A PhD degree in materials science is also offered in collaboration with other universities in the University of Alabama System. The Chair will be expected to serve as the UAB Campus Director of the Materials Science PhD program.

Candidates for the position should have an earned doctorate in materials science, materials engineering, or a related field, and have a record of successful teaching and scholarship. The candidate should demonstrate the leadership qualities necessary to enhance the current growth and quality of the program, and provide interactions with related disciplines. The department is seeking the appropriate leadership to help it continue to advance toward its goal of national recognition as a leader in materials research and education. Position available to all qualified U.S. citizens and resident aliens. Applications should include a resume that contains a description of current research, and a list of future research goals. Applications and nominations will be accepted until the position is filled. Please respond to:

Dr. Martin McCutcheon

Chairman, Materials Science and  
Engineering Search Committee  
Department of Biomedical Engineering  
University of Alabama at Birmingham  
UAB Station  
Birmingham, Alabama 35294  
Telephone: 205-934-8420

*UAB is an equal opportunity, affirmative action employer.*

**Ad Closing for the June  
issue is May 1, 1992**  
**Technical Focus:**  
**Ion-Assisted Processing of  
Electronic Materials**

**MOLECULAR BEAM EPITAXY**

Newly created positions available at rapidly growing MBE equipment manufacturer. Please indicate interest and/or experience applicable to the following areas: sales, marketing, process control, product development, and engineering (mechanical and electrical). Send resume and references to: Marie Meyer, EPI, 261 East Fifth Street, Saint Paul, MN 55101. Tel. (612) 224-1140, FAX (612) 224-0266.

*Equal Opportunity Employer.*

平成5年度基礎科学特別研究員の  
公募について

科学技術庁と理化学研究所とは、連携して我が国 の基礎研究を強力に推進するため、平成5年度の基礎科学特別研究員を募集します。斬新な研究課題を自由に遂行できる若い在外の我が国研究者の応募を期待します。

- 1.採用予定人員／25名程度
- 2.受入機関／理化学研究所
- 3.募集分野／物理学、化学、生物学、工学の各分野で、理化学研究所で実施可能な研究
- 4.応募資格／原則として平成5年4月1日現在35歳未満の健康な者で、博士号取得者又はこれと同等の研究能力を有すると認められる者
- 5.待遇等／
  - ①謝金／月額485千円程度(社会保険料、税込)
  - ②通勤費／実費(上限30千円／月)
  - ③住宅費／家賃の一部支給  
以上のほか、研究費として1,370千円／年程度
- 6.契約期間／通算3年間を限度とし、毎年度所要の評価により契約更新
- 7.応募書類の受付は平成4年6月25日(木)迄です。  
応募したい方は平成4年6月5日(金)迄に下記にお問い合わせ下さい。  
理化学研究所研究業務部基礎科学特別研究員担当  
〒351-01 埼玉県和光市広沢2番1号  
☎ 0484-62-1111 内線2451、2452  
(直通 0484-63-3687) FAX 0484-62-1554
- 8.その他／本件は関係予算の成立を前提としており、その事情により変更がり得ますので、その旨御承知おき下さい。

**FACULTY POSITION  
IN MATERIALS CHARACTERIZATION**  
**University of North Texas**

Center for Materials Characterization at the University of North Texas has a tenure-track position at the assistant professor level, starting in August 1992, the fall semester. Applicants should have a doctorate in materials science or a related discipline, with an emphasis in metallurgy. Applicants should be qualified to teach undergraduate and graduate courses in materials science, develop independent and cooperative research programs. Research areas of special interest include high temperature behavior of metals, failure analysis, microstructural development, innovative semiconductors, and high resolution electron microscopy. Applicants should submit a complete resume including a summary of past and proposed research, a list of publications and three letters of recommendation.

Contact: David Golden, Chair Search Committee, Center for Materials Characterization, University of North Texas, P.O. Box 5308, Denton, TX 76203. Applications will be accepted until position is filled.

*UNT is an equal opportunity, affirmative action employer.*

**FACULTY POSITION IN SURFACE  
TECHNOLOGY**

**Swiss Federal Institute of  
Technology Zurich (ETHZ)**

Responsibilities include the teaching of undergraduate and graduate courses in science and technology of surfaces and interfaces. Research will focus on the creation and modification of specifically functionalized surfaces, the tribological functions being of particular interest. The new professor is further expected to build up and supervise the operation of a service laboratory for surface analysis.

Candidates must hold a university degree and have accomplished outstanding research work in the above-mentioned area, and they should be interested in interdisciplinary cooperation.

Please apply with a curriculum vitae, a record of projects and a list of publications, by June 15, 1992, to the President of ETHZ, Prof. Dr. J. Nüesch, ETH Zentrum, CH-8092 Zurich. The ETHZ specifically encourages women to apply with a view towards increasing the proportion of female professors.
