

THE JOURNAL OF ANIMAL ECOLOGY

EDITORS: H. N. SOUTHERN and L. R. TAYLOR

VOL. 43, No. 1

FEBRUARY 1974

- M. J. F. Jarvis.** The ecological significance of clutch size in the South African gannet (*Sula capensis* (Lichtenstein)).
- M. Llewellyn, R. Rashid and P. Leckstein.** The ecological energetics of the willow aphid *Tuberolachnus salignus* (Gmelin); honeydew production.
- J. D. Thomas and M. Benjamin.** The effects of population density on growth and reproduction of *Biomphalaria glabrata* (Say) (Gasteropoda: Pulmonata).
- A. Sasekumar.** Distribution of macrofauna on a Malayan mangrove shore.
- J. F. Benson.** Population dynamics of *Bracon hebetor* Say (Hymenoptera: Braconidae) and *Ephestia cautella* (Walker) (Lepidoptera: Phycitidae) in a laboratory ecosystem.
- T. G. Wood.** The distribution of earthworms (Megascolecidae) in relation to soils, vegetation and altitude on the slopes of Mt Kosciusko, Australia.
- R. A. Cheke.** Experiments on the effect of host spatial distribution on the numerical response of parasitoids.
- Graham Bell.** The reduction of morphological variation in natural populations of smooth newt larvae.
- T. Lewis, G. V. Pollard and G. C. Dibley.** Rhythmic foraging in the leaf-cutting ant *Atta cephalotes* (L.) (Formicidae: Attini).
- T. Lewis, G. V. Pollard and G. C. Dibley.** Micro-environmental factors affecting diel patterns of foraging in the leaf-cutting ant *Atta cephalotes* (L.) (Formicidae: Attini).
- J. M. Harman and A. L. Turnbull.** The interaction of spatial heterogeneity, predator competition and the functional response to prey density in a laboratory system of wolf spiders (Araneae: Lycosidae) and fruit flies (Diptera: Drosophilidae).
- B. D. Turner and E. Broadhead.** The diversity and distribution of psocid populations on *Mangifera indica* L. in Jamaica and their relationship to altitude and micro-epiphyte diversity.
- S. D. Wratten.** Aggregation in the birch aphid *Euceraaphis punctipennis* (Zett.) in relation to food quality.
- M. A. Learner and D. W. B. Potter.** Life-history and production of the leech *Helobdella stagnalis* (L.) (Hirudinea) in a shallow eutrophic reservoir in South Wales.
- M. R. K. Lambert.** Observations on the feeding activity of the Australian plague locust *Chortoicetes terminifera* (Walker) in field populations in eastern Australia.
- L. R. Taylor.** Insect migration, flight periodicity and the boundary layer.
- D. J. Rogers and M. P. Hassell.** General models for insect parasite and predator searching behaviour: interference.

THE JOURNAL OF ECOLOGY

EDITORS: A. J. WILLIS and P. J. GRUBB

VOL. 62, No. 1

MARCH 1974

M. E. S. Morrison and A. C. Hamilton. Vegetation and climate in the uplands of south-western Uganda during the later Pleistocene period.

R. A. Armstrong. The descriptive ecology of saxicolous lichens in an area of south Merionethshire, Wales.

J. C. Sheldon. The behaviour of seeds in soil. III. The influence of seed morphology and the behaviour of seedlings on the establishment of plants from surface-lying seeds.

P. S. Ramakrishnan and Promila Kapoor. Photoperiodic requirements of seasonal populations of *Chenopodium album* L.

J. N. B. Bell and J. H. Tallis. The response of *Empetrum nigrum* L. to different mire water regimes, with special reference to Wybunbury Moss, Cheshire and Featherbed Moss, Derbyshire.

S. Kays and J. L. Harper. The regulation of plant and tiller density in a grass sward.

Jacob Friedman and Gideon Orshan. Allopatric distribution of two varieties of *Medicago laciniata* (L.) Mill. in the Negev Desert.

J. J. Mott and A. J. McComb. Patterns in annual vegetation and soil microrelief in an arid region of western Australia.

R. E. Daniels and M. C. Pearson. Ecological studies at Roydon Common, Norfolk.

Jose Sarukhán. Studies on plant demography: *Ranunculus repens* L., *R. bulbosus* L. and *R. acris* L. II. Reproductive strategies and seed population dynamics.

Alan Cooper and J. R. Etherington. The vegetation of carboniferous limestone soils in South Wales. I. Dolomitization, soil magnesium status and plant growth.

R. S. Clymo and E. J. F. Reddaway. Growth rate of *Sphagnum rubellum* Wils on Pennine blanket bog.

H. Godwin, D. R. Clowes and B. Huntley. Studies in the ecology of Wicken Fen. V. Development of fen carr.

Winifred Pennington (Mrs T. G. Tutin). Seston and sediment formation in five Lake District lakes.

A. J. Morton. Ecological studies of a fixed dune grassland at Newborough Warren, Anglesey. I. The structure of the grassland.

A. J. Morton. Ecological studies of a fixed dune grassland at Newborough Warren, Anglesey. II. Causal factors of the grassland structure.

S. R. A. Shamsi and F. H. Whitehead. Comparative eco-physiology of *Epilobium hirsutum* L. and *Lythrum salicaria* L. I. General biology, distribution and germination.

John Ogden. The reproductive strategy of higher plants. II. The reproductive strategy of *Tussilago farfara* L.

BIOLOGICAL FLORA OF THE BRITISH ISLES

R. J. Summerfield. *Narthecium ossifragum* (L.) Huds.

New Books from Blackwell

The Structure of Marine Ecosystems

John H. Steele. 1974. 128 pages, 42 illustrations. £2.75

This book considers how open sea systems can absorb perturbation imposed on them. It examines both the general structure of marine ecosystems and the detailed responses of the main groups of organisms. It appears that the critical parts of marine ecosystems may be different from those usually postulated for terrestrial ecology, even though some of the basic biological mechanisms can be similar. Thus, management of the sea could require quite different rules from those used on land.

The Ecology of the Seas

Edited by D. H. Cushing, Ph.D. and J. J. Walsh, Ph.D. Late 1974. 400 pages, fully illustrated. About £7.50

Algal Physiology and Biochemistry

Botanical Monographs Volume 10, edited by W. D. P. Stewart, Ph.D., D.Sc. June 1974. 960 pages, 75 illustrations. £15.50

Handbook of Marine Science

Edited by F. G. Walton Smith and Frederick A. Kalber, and published originally by the CRC Press

Volume 1. August 1974. 640 pages. About £15.00

Volume 2. Autumn 1974. 520 pages. About £15.00

Volume 3. Autumn 1974. 520 pages. About £15.00

Handbook Environmental Control

Edited by Richard G. Bond, M.S., M.P.H. and Conrad P. Straub, Ph.D., and Published originally by the CRC Press

Volume 1. Air Pollution. 1973. 550 pages. £16.50

Volume 2. Solid Waste. 1973. 590 pages. £14.50

Volume 3. Water Supply and Treatment. 1974. 864 pages. £18.50

Volume 4. Waste Water - Treatment and Disposal. June 1974. 940 pages. About £18.50

THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

TERMS OF MEMBERSHIP

Annual Members, receiving the Journal . . .	per annum	£ 5.00
Annual Members, without the Journal . . .	per annum	1.05
Junior Members, receiving the Journal . . .	per annum	2.00
Life Members	Composition fee	60.00
Founders		100.00
Governors		500.00

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.
